Romano Security Consulting Cyber Risk Management Consultancy Service Description

Romano Security Consulting delivers cyber security risk management consultancy services to help organisations develop and implement a pragmatic, risk-based approach to managing cyber risk. We design tailored risk management strategies aligned to your organisation's size, risk profile, and business objectives and support you through the risk management process.

Romano Security Consulting Cyber Risk Management Consultancy

Romano Security Consulting can help you from the start in developing an information security risk management strategy, enabling you to take a pragmatic approach to risk management, whatever the size of your business or the size of the risks, we can design and implement a bespoke risk management solution for you.

This service will typically include support, guidance and advice on the following milestones:

- Establishing risk governance and responsibilities
- Defining and communicating the organisation's approach to risk management
- Establishing the scope and boundaries of the risks to be managed
- Establishing communication lines with Stakeholders, Senior Management Team and the Board
- Documenting a suitable risk management framework and risk appetite
- Identifying assets, processes and data
- Conducting a risk assessment, identifying, analysing and evaluating impact and likelihood, threats and vulnerabilities, threat surfaces and threat actors
- Selecting suitable controls to mitigate identified risks
- Producing a risk treatment plan
- Defining priorities for risk treatment
- Producing a risk register
- Establishing an ongoing risk monitoring and risk review process

Data Protection Impact Assessment (DPIA) Consultancy Service

Under the UK Data Protection Act 2018 and UK General Data Protection Regulation (UKGDPR) Data Protection Impact Assessments (DPIA's) are mandatory for any new personal data processing operations that are likely to result in a high risk to the rights and freedom of individuals or their data.

Our DPIA consultancy service assists you in conducting an assessment of the data protection risks associated with a new or existing single data processing operation within your organisation and recommendations on the appropriate controls to mitigate these risks.
