Romano Security Consulting Virtual CISO Service Description

A Virtual CISO (Chief Information Security Officer) is an outsourced security practitioner or provider who offers their time and insight to an organisation on an ongoing basis, usually part-time and remotely.

A vCISO is an individual who has spent years working in the cyber security industry and has a wealth of valuable experience and expertise having dealt with a wide variety of scenarios and consults on the development of an information security strategy and management of an organisation's information security.

If you're a start-up or small business our Virtual CISO managed service could be the answer to your prayers.

A Virtual CISO can provide your organisation with a cost-effective way of maintaining your information security and managing your risks.

Romano Security Consulting delivers Virtual CISO consultancy services to help organisations strengthen their cyber security leadership and risk management. We provide strategic guidance on security strategy, governance, risk and compliance to supplement internal teams and support your overall security programme.

Romano Security Consulting vCISO service allows you to concentrate on running and developing your business while we take care of your cyber and information security requirements.

Your vCISO can be on hand when and where you require the assistance to supplement the existing management team's expertise without having to pay for a full-time information security resource.

Romano Security Consulting Virtual CISO Consultancy Services

How does our Virtual CISO managed service work?

Tailored Solution

Romano Security Consulting tailor our vCISO consultancy service to fit the individual needs of your business and mitigate the risks that you face as a business.

Scoping

The first stage of the service involves a scoping exercise, so we can get the right level of managed vCISO service to match your business requirements.

Gap Analysis

We then conduct a gap analysis to identify your key risks, threats, and vulnerabilities, provide you with a detailed strategic roadmap to assist you in mitigating your risks and we then decide on the number of days a month or year that you require for your vCISO.

Risk Management

We assign you with a highly qualified and experienced consultant who will be your personal vCISO and work with you to mitigate your risks. You can then

schedule days with your vCISO as and when you require them to suit the needs of your business.

Flexible, Trusted, Security Resource

If you are looking for a flexible, trusted security resource to be able to call on and have on hand to suit your requirements we have several vCISO consultancy options available, we can be on hand to help as little or as often as you require.
