Quod Orbis

Who Are We

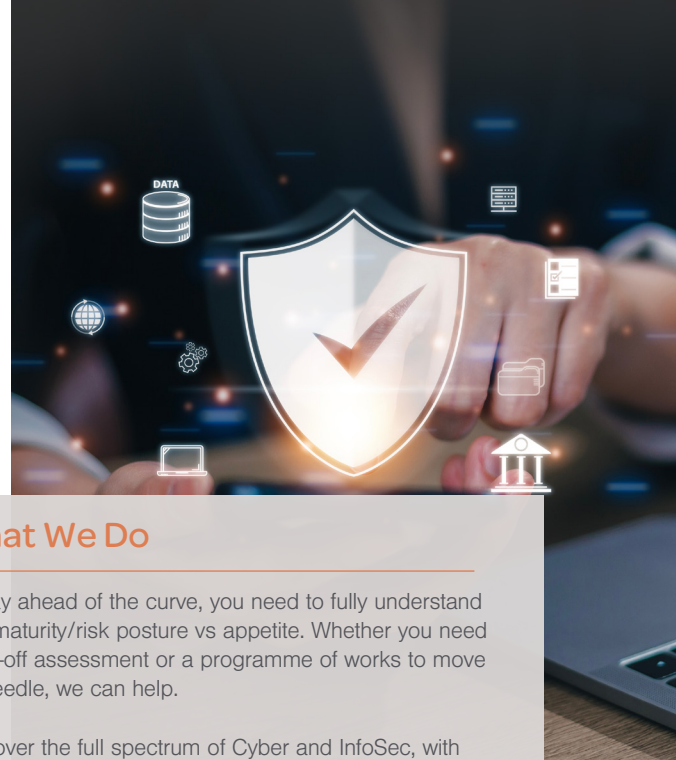

We provide a range of services to help you develop and implement a strategy that reflects the evolving cyber security threat landscape and aligns with your strategic goals.

Established in 2018, our company was founded by a group of the most experienced individuals in the cyber security industry. With a global presence, our mission from the outset was clear: to revolutionise the way businesses handle their cyber security, risk management, and compliance processes by creating flexible, innovative solutions tailored to each clients needs.

Whether providing expert guidance on digital and cyber risk in general, managing a client's digital transformation or moving their operations to the cloud, these solutions align to develop cyber security strategies for the future. Central to our projects is the navigation of existing and emerging technologies which we deliver, manage and develop for our clients.

**Agile, flexible & rapid response from
our specialists**

What We Do

To stay ahead of the curve, you need to fully understand your maturity/risk posture vs appetite. Whether you need a one-off assessment or a programme of works to move the needle, we can help.

We cover the full spectrum of Cyber and InfoSec, with specialists in GRC, Cloud, infrastructure, IAM, SOC design etc. We can also explore the softer sides of cyber such as people and culture as well as deep technical expertise.

As an agnostic consultancy, we often run impartial RFP's for organisations looking to make significant investments in cyber, with ready made templates and extensive market knowledge we can speed up the process and bring a level of professionalism. All of the below can be packaged together into one comprehensive improvement programme:

Cyber & InfoSec

- ✓ Security Audits/Assessments
- ✓ Risk Management & Strategy Development
- ✓ Security Architecture & Design
- ✓ Regulatory Compliance & Governance

Cloud

- ✓ Cloud Security Architecture
- ✓ Cloud Security Assessments
- ✓ Secure Cloud Migrations
- ✓ Cloud Compliance

GRC

- ✓ Ensure compliance
- ✓ Support audit readiness
- ✓ Frameworks (ISO27001, NIST, SOX, PCI, DORA etc.) and/or any bespoke internal frameworks

IAM

- ✓ IAM Strategy/Roadmap
- ✓ Access Management Solutions
- ✓ Privileged Access Management
- ✓ Regulatory Compliance & Audit Support

SOC Design

- ✓ Assessment & Planning
- ✓ Architecture Design
- ✓ Process Development
- ✓ Compliance & Governance
