Pricing Examples

MonitorPro can be configured in a number of ways to suit the client's needs. This does give a number of options when pricing a system. The level of Support and the type and volume of licences impact the annual SaaS costs. A system can be configured for a combination of different user types and bulk discounts offered for volume of licencing.

The table below is an example of some solution package pricings. The total number of users are split across the 3 main applications (MP-Desktop, MP-Web and MP-Field) based on typical implementations. The costs are the full annual SaaS fee, which include all Hosting, Support and Licencing. There are significant savings for scales of economy and the larger systems are priced with Premium Support and dedicated Hosting options.

Type of System	Total users	Annual cost	
Smallest single user system	1	£	
Medium system	8	£	18,085
Medium large system	20	£	26,193
Larger system	35	£	48,381
