

Pricing that scales with you

CultureAI comes pre-configured with best-practice policies and controls — ready to deploy, but fully customisable by hands-on security teams.

As your organisation matures, unlock advanced frameworks, enterprise integrations, and tailored support to move from safe adoption to full AI governance.

PLANS

Growth

Starting from £899 / \$1,125 per month

For security and compliance teams ready to secure and scale AI usage safely.

Includes:

- ✓ Prompt-level activity tracking
- ✓ Shadow AI & personal account detection
- ✓ Behaviour-led risk scoring
- ✓ Role-aware, adaptive policy enforcement
- ✓ Real-time coaching & just-in-time nudges
- ✓ Compliance audit trails + reporting
- ✓ Privacy-safe architecture (anonymised, regionalised)
- ✓ Integrations: Microsoft 365, Google Workspace, Okta, Splunk
- ✓ SSO (SAML 2.0), SCIM user provisioning
- ✓ Email support + structured onboarding
- ✓ 5 Admin seats

Enterprise

Custom Pricing

For larger or regulated organisations with complex environments, high user volumes, or advanced deployment needs.

Includes everything in growth, PLUS:

- ✓ Custom user volumes & tiered pricing
- ✓ Alignment with SOC 2, ISO 42001, HIPAA, GDPR
- ✓ Advanced integrations: SIEM, SOAR, DLP
- ✓ API access + webhook event streams
- ✓ Custom data residency (EU, UK, US, multi-region)
- ✓ Tailored onboarding & Customer Success
- ✓ Security + procurement review support
- ✓ 24/7 priority support with SLA

User support	Email + Knowledge Base	Priority + SLA
Data residency control	EU/UK default	Multi-region / custom
Dedicated Customer Success	—	✓
Procurement & security review support	—	✓
API access	—	✓

Frequently Asked Questions

How fast can we deploy?

Most customers are up and running in hours via a lightweight browser extension.

Can I add more users to my space?

Yes, we can easily scale with you, at your pace.

Do you offer a free trial?

Yes, we offer a free trial which gives you full visibility of how our platform works. You will have the ability to surface real AI risks from your environment and understand how best to mitigate them.

Is CultureAI a replacement for DLP/CASB?

We complement, not replace. DLP/CASB can't see prompt-level usage or embedded AI tools. CultureAI fills that gap.

Do you support regulated industries?

Yes, we're built privacy-first: in-browser models so your data never leaves, full opt-in logging, anonymised data collection, regional hosting, and no data retention beyond policy scope. Our platform has been designed with GDPR, HIPAA, ISO 42001, and the EU AI Act in mind.

What if we are a very large enterprise?

Enterprise plans support unlimited users, full stack integrations, and tailored onboarding. We'll guide you through legal, privacy, and procurement requirements.
