The solution modular construct and options makes a single price difficult to provide.

The pricing assumptions are:

- Numbers are based on the basic package without all options
- For social housing we price based on asset count
- For other buyers we price based on revenue. There are occasions whereby the asset count nor revenue are a good indicator of size and we would look to openly discuss this with prospective customers.

OCR capabilities will be priced at £0.30 + VAT per page that's scanned and classified and undertakes matching.
