

An evolutionary **global due diligence platform**

Combine extensive risk data with **next-generation filtering technology**

How much time do you spend screening the identity of a potential customer or processing false positives? Meeting global regulatory compliance requirements can be costly and involves many operational challenges, but failing to comply can be even more detrimental to your business.

Gaps in your company's defences can lead to...

The possible consequences...

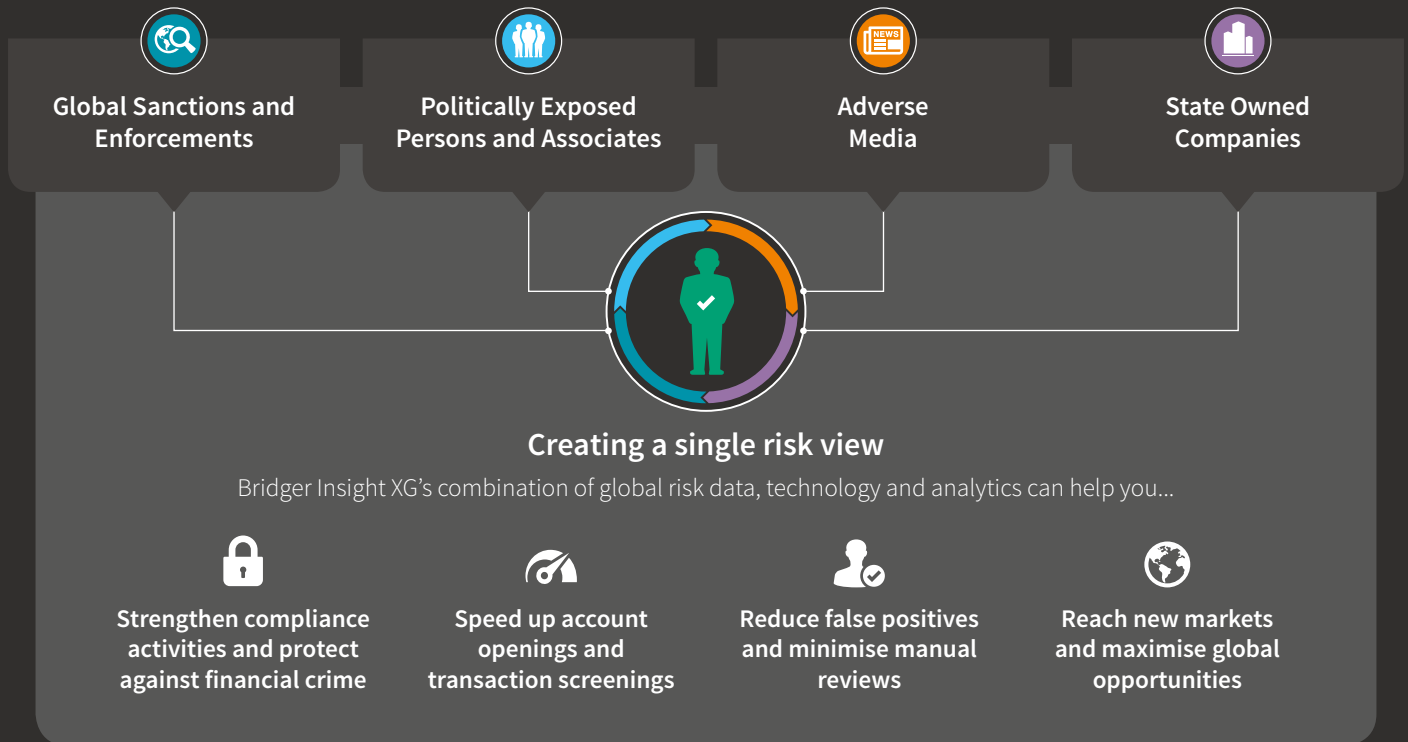

One of the most trusted compliance suites in the market, **LexisNexis® Bridger Insight® XG** is specifically designed to help organisations conduct due diligence, comply with global regulations and reduce financial crime risks more efficiently and cost-effectively – all through an intuitive browser-based user interface.

Global due diligence screening at your fingertips

By combining industry leading filtering software with the expansive content of LexisNexis® WorldCompliance™ Data, Bridger Insight XG delivers significant efficiencies in financial crime compliance processes. Bridger Insight XG helps organisations conduct due diligence and comply with government regulations, including those related to anti-money laundering, bribery and corruption, and terrorist financing.

A single request returns consolidated risk data within a secure online portal...

Intuitive and time efficient

Research an individual or a business from a perspective that accounts for global sanctions and enforcements, politically exposed persons and associates, adverse media and state owned companies, all within a single request.

Bridger Insight XG's cutting edge matching technology and machine based learning has been developed to intelligently reduce false positives and minimise manual reviews, enabling you to model your standard operating procedures to safely but dramatically reduce workloads.

Quick set-up and low maintenance

The Bridger Insight XG service runs on LexisNexis servers, eliminating product installation and system maintenance whilst allowing your existing systems to easily integrate with our API. The 'Automatic Batch' function enables automated processing of your data files.

If you prefer to retain data within your network, the enterprise version of Bridger Insight XG can be installed locally, behind your firewall.
