LexisNexis® Emailage®

LexisNexis Risk Solutions offers an award-winning suite of global fraud risk management solutions. These solutions help businesses make better risk decisions and improve the customer experience, while maintaining consistency in fraud controls and risk assessments across borders.

Email addresses are ideally suited to identifying good and bad actors. With 51% of users having the same email address for more than 10 years and 91% for more than 3 years (Source: DMA Insight, Consumer Email Tracking Study), emails can be considered as unique identifiers. An email address unlocks digital engagement and transactions because it is:

The unique
global identifier

Used in virtually
100% of all online
transactions

Rich with transaction
history and behaviour

Difficult to change because
it links multiple online
accounts for fraud risk
decisions

LexisNexis® Emailage® is a high-speed and effective risk assessment solution that will allow you to approve transactions faster and seamlessly predict trusted and high-risk interactions across multiple touchpoints. Whether a customer is setting up a new account and onboarding with your organisation, changing details and managing accounts or making online payments and transactions, we can help you keep your customers safe when they interact with your organisation without causing unnecessary disruption to the user experience.

LexisNexis® Emailage® is a proven fraud prevention solution that uses email intelligence as a core risk identifier, delivering succinct decisioning data that helps stop fraud without negative impact to genuine customers.

Pricing

LexisNexis Risk Solutions is pleased to provide the following pricing for G-Cloud 15.

Transaction Services

The price is based on transactional volumes.

	Committed Monthly Volume Tiers							
	List Price	10000	50000	100000	250000	500000	1000000	5000000
