

GUARDiAN Backup-as-a-Service

Powered by Commvault Cloud

With IT environment's expanding to include on-premise, hybrid, and cloud, the risk grows too.

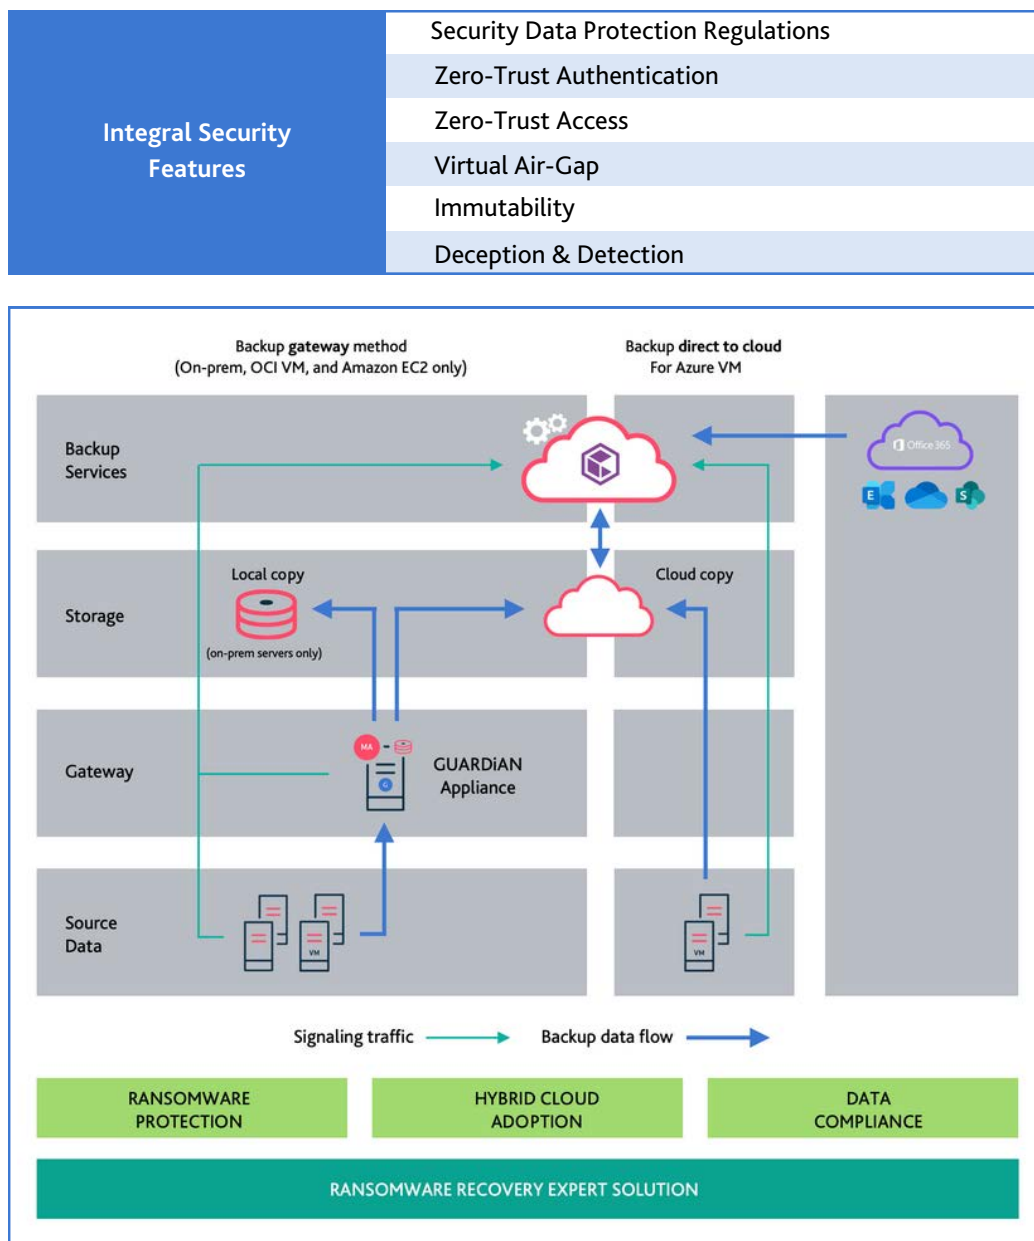

Combining industry-leading SaaS data protection from Commvault Cloud and best-in-class managed services from GUARDiAN means your data is safeguarded with a secure ransomware recovery strategy.

No longer will you have to get bogged down by backup infrastructure management or day-to-day backup and recovery with GUARDiAN here to do all the heavy lifting. Our dedicated team of backup specialists will ensure your data is protected at all times. Powered by Metallic, our solution provides flexible, multi-layered enterprise-grade security and backup. Making setup, support and control – simple.

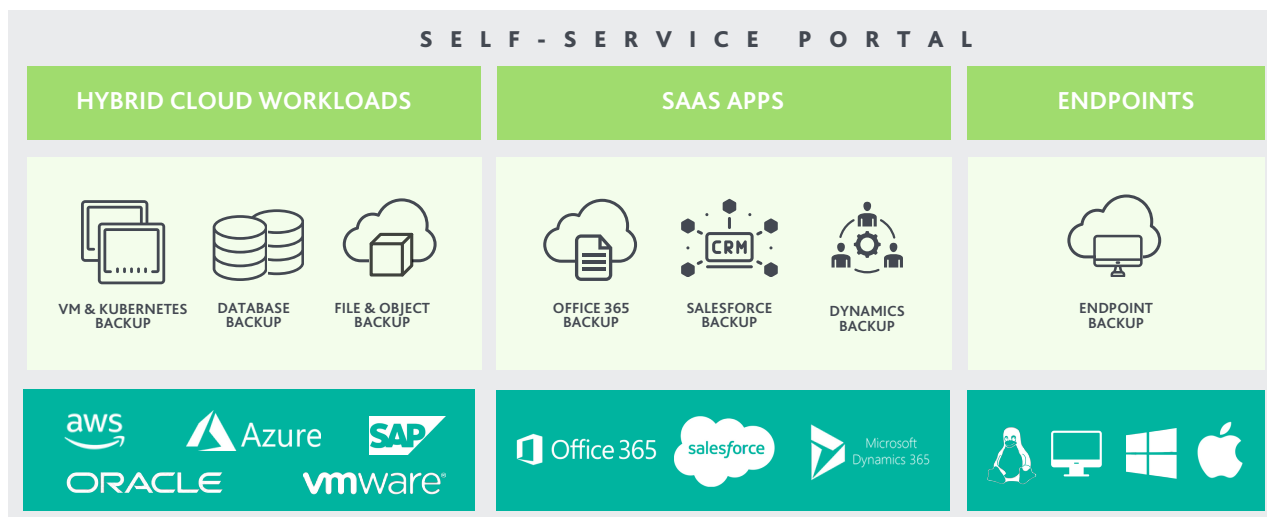

GUARDiAN BaaS is a cloud-based architecture that simplifies data protection while empowering users to safeguard valuable data assets and enjoy peace of mind.

The multi-layered security features of GUARDiAN BaaS deliver a hardened approach to data protection and compliance, to comprehensively safeguard your critical data. Advanced tools and actionable insights improve your security posture, uncover risks, and make more informed recovery decisions.

GUARDiAN BaaS, powered by Commvault Cloud, is securely controlled in an easy to use self-service portal, protecting all your industry-standard platforms and applications from any location:

With 10 years' experience designing, deploying and supporting our customer's Commvault environment, we've learned how to provide bespoke services that suit the needs of each customer, regardless of size or industry. Incorporating our comprehensive GUARDiAN managed service, GUARDiAN BaaS offers the following service features:

Finance	Flexible Payment Options
	Monthly, Annual or PAYG
