What is it?

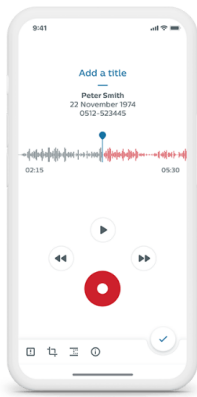

Philips SpeechLive is no ordinary digital dictation system, this is a true cloud solution with additional options and customisations which are typically only available in on-premise server based deployments. Users can dictate their audio files directly into the web browser recording window, into a digital voice recorder or via a smartphone using the SpeechLive App. This audio can be sent for typing to an in-house typing team, to the Philips outsourced transcription service based in the UK or the audio can be combined with speech recognition to automatically transcribe the audio into text.

SpeechLive offers professional recording features that help you turn your voice into text with ease.

 Professional recorder Perform professional recording and editing functions, such as insert, overwrite, append and cut recording sequences.	 Real-time job status Track the status of your dictations at any time.
 Automatic routing Automatically forward your dictations to the correct typist, saving time in your workflow.	 Priority Use a priority setting to assist "bumping up" urgent recordings in the queue.
 Organize and store dictations Store all your dictations in one place. Easily find previous recordings and listen or process them again.	 Security guaranteed File encryption and automatic backups ensure that your data is secure and no sensitive information is ever lost.

What devices can be used with SpeechLive?

Mobile App

APP

Be productive on the go

The SpeechLive app is part of each subscription. Record, edit and send dictation files directly from your smartphone and reduce document turnaround times.

Mobile Digital dictation device

Such as the Philips PDM 8000

<https://voicepower.co.uk/products/philips-voice-recorders/>

Fixed USB microphone

Such as the Philips SpeechMike

<https://voicepower.co.uk/products/hardware/>

Foot pedals and earphones

VoicePower Ltd - GCloud 15 – SpeechLive Digital Dictation, Speech Recognition with AI.

www.voicepower.co.uk

The new ergonomic foot pedal has been developed by closely studying transcriptionists' movements. It offers the perfect complement to the SpeechLive web player. Transcriptionists can work even faster and more accurately by managing the playback control with a slight movement of their foot tip. The foot pedal enables them to have their hands always free for typing and makes transcribing more comfortable.

What else does SpeechLive offer?

Speech to text

Philips SpeechLive speech to text is our most affordable speech recognition option without compromising on quality

In the office and on the go

Use our Windows app to use speech to text in any desktop software or our smartphone app to record on the go.

Works with any software

SpeechLive speech recognition works in any software, like Microsoft Word, Outlook or any CRM and EMR.

Multilingual capabilities

Transcribe text in up to 22 languages and variants with SpeechLive's recognition technology.

Fast turnaround time

Convert your voice to text either in real time or within minutes when you use pre-recorded audio files.

Up to 95% accuracy

Get highly accurate results through our advanced speech recognition software.

Voice command

Use voice commands to insert paragraphs, punctuation marks and special characters.

Features:

Constant file access:

VoicePower Ltd - GCloud 15 – SpeechLive Digital Dictation, Speech Recognition with AI.

www.voicepower.co.uk

Access all your dictation files anywhere, anytime. Even without an internet connection, you can still work in local mode and synchronise all your dictation files when you are online again.

Easy set-up and support:

Setting up SpeechLive is super easy and VoicePower is available to support you in needed.

Web-browser based workflow management:

Workflow can conveniently be managed from the web browser. No need to install any complicated software. Settings can be adjusted anywhere / anytime by those with sufficient privileges.

Secure on-line storage:

SpeechLive offers highly secure online storage, keeping your files safe from unauthorised access. The solution works with maximum connection security using the HTTPS protocol. All stored data is automatically encrypted and server mirroring keeps your data reliably secured and available anytime.

Double encryption in real-time:

To avoid unauthorized access, dictation files are encrypted in real time. The highest encryption standard available is used to protect your data, even during upload and download. Files can be encrypted for a third time if recorded in the DSS Pro format for maximum security.

Backup and restore function:

The automatic backup function protects your data against accidental loss. Your dictation files are always safe, even if your computer crashes, you suddenly lose Internet connection or unintentionally erase your data.

Independence from local infrastructure:

With SpeechLive you are ready to go – no local server infrastructure is required. Enjoy the full benefits of the solution right away, no matter if you are a one-man business or run a company with several employees. Your files are always available independent from changes to your IT environment.

Flexible subscriptions:

SpeechLive adapts to suit the needs of your business by giving you the opportunity to adjust the number of users at any time. New users to the system which join during the annual term are co-terminated to ensure that renewal is at the same time for the whole site.

Optional Transcription service:

Philips SpeechLive transcription service now does the typing for you. It even offers the transcription of multi-speaker recordings involving two or more persons. Get finished documents in three easy steps. First record, second send, third, receive the finished document. It is as easy as that and saves you valuable time, increasing the efficiency of your work life

Flexible workflow options:

01 Record your voice

Record your ideas, tasks and documents wherever you are and send it to SpeechLive. All your recordings are safely stored in the cloud.

02 Select your transcription option

Choose whether you want to send your recordings to your assistant, the Philips SpeechLive speech recognition software or the Philips SpeechLive transcription service.

03 Receive text file

Save time and resources by letting others do the typing for you. You can receive your recordings as finished text files straight to your email.

All your dictations in one place:

You can log into your SpeechLive account anytime wherever you are, and access all your dictation files. Download your recordings to your computer, assign them a priority status or send them off for transcription.

Maximum protection of your files:

SpeechLive guarantees the highest protection of your files and keeps your confidential data safe from unauthorised access. The most advanced encryption standard available protects your data during recording, up- and downloading to the cloud. SpeechLive offers double encryption in real-time by using HTTPS protocol.

Our transcriptionists are held to strict non-disclosure agreements. No client information or documentation is shared with anyone.

The automatic backup function protects data against accidental loss. All your recordings are safely stored in the cloud, even when your computer crashes, you suddenly lose internet connection or you accidentally delete dictation files from your device.

Philips only cooperates with renowned Azure data centres for its SpeechLive solution. They received the most important security certificate awards, complying with international, country and industry-specific regulatory requirements

https://www.speechlive.com/gb/data-security-and-privacy/?utm_medium=cpc&utm_source=google&utm_campaign=speechlivesearch2025ukregion&utm_content=brand-legal&utm_term=philips%2Bspeechlive%2Brecognition&gclid=CjwKCAiA0eTJBhBaEiwA-Pa-hWAHVwk9P2Y0Sfwwv2tPfFv_CzrHBPRPWuLAvzMdDYjqMdWhH-wRpxoCkA4QAvD_BwE

Highest level of security

E-Mail No encryption

E-mail messages can be attacked by hackers, due to unencrypted data being sent via an unencrypted connection.

Regular cloud Single encryption

Other cloud storages not dedicated to dictation typically only use simple encryption during file upload, but do not encrypt files when stored.

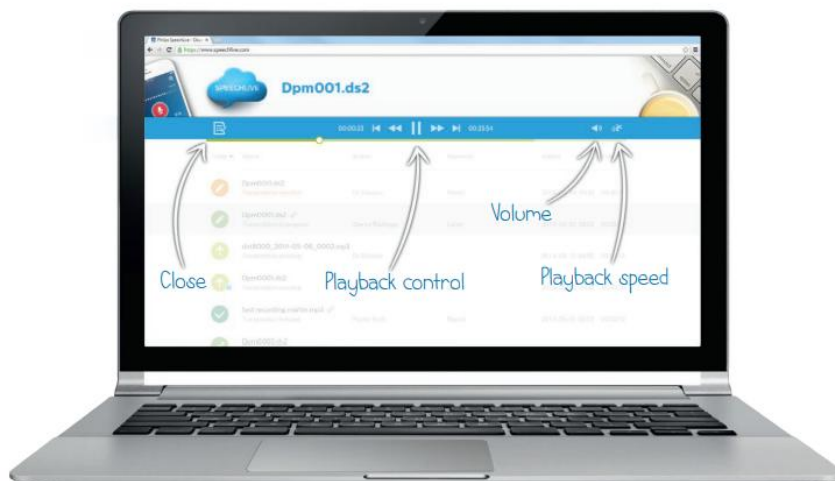

SpeechLive Double encryption

SpeechLive offers double encryption by using highly secure and industry standard HTTPS protocol. Additionally highest safety standards are guaranteed by always up-to-date security certificates.

Flexible working – transcribe from anywhere

Philips SpeechLive offers a flexible working environment. If your assistant cannot come into the office one day, they can easily transcribe documents from home by using their private computer. There is no need to download any additional software, all they have to do is to log-into their SpeechLive account. SpeechLive allows your assistants to access the file list and playback the recordings via the web player in their browser, regardless of where they are.

Transcription Service – save time & resources

Hours and hours of valuable time are used every month for typing all kinds of reports, leaving you less time to spend on more important things. Since the average person can speak seven times faster than they can type, Philips has created an innovative solution for you to speak your reports and turn them into documents in no time.

All you have to do is speaking naturally and dictate your documents or reports. Industry-specific trained professionals will accurately transcribe your recordings for you and send the finished document straight to your inbox.

How long does it take to create one page of text?

One page of text will take you approximately 14 minutes to type up yourself. But the same page can be filled up in only 2 minutes if you speak. Your time is precious and costs valuable resources. Saving time, will help you save money.

Speech Recognition as an option:

The speech recognition service allows you to get more work done, in less time. Simply dictate your notes or tasks into your Philips voice recorder or dictation recorder app and have your files transcribed almost immediately by our sophisticated software. Your finished text files will be sent straight to your inbox, saving you time and letting you focus on what is most important. You can save or share your document with your colleagues immediately.

Suitable for all professions

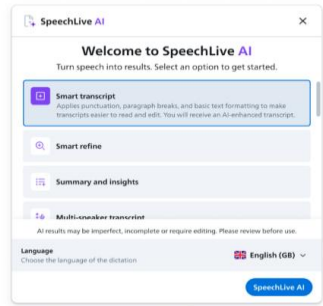

SpeechLive AI Features optional:

The SpeechLive AI features allow you to send dictation through different AI outputs, to create accurate transcripts and clear summaries. Whether you are dictating as a single user or in a meeting with multiple parties, Speech Live AI will provide a smarter, better workflow with effortless results.

What are the main features of SpeechLive AI:

1.

Welcome to SpeechLive AI
Turn speech into results. Select an option to get started.

- Smart transcript**
Applies punctuation, paragraph breaks, and basic text formatting to make transcripts easier to read and edit. You will receive an AI-enhanced transcript.
- Smart refine**
- Summary and insights**
- Multi-user transcription**
AI results may be imperfect, incomplete or require editing. Please review before use.

Language: Choose the language of the dictation **English (GB)**

SpeechLive AI

FOCUS ON SPEECH, NOT TYPING

Smart Transcript

Imagine dictating your ideas, legal notes, medical reports, or meeting minutes without worrying about punctuation or accuracy. Our Smart Transcript feature uses advanced AI to automatically insert punctuation, correct misspellings, and remove duplicate words for you, turning your speech into clear, polished text – ready for your next step.

- Automatic punctuation**
Polished transcripts, instantly
- Smart corrections**
Misspellings and duplicate words fixed automatically
- Editable files**
Ready to share immediately

2.

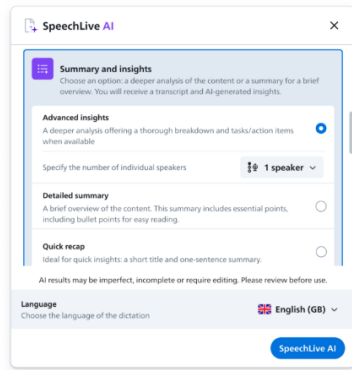

TAILOR TONE, INSTANTLY

Smart Refine

Whether you're drafting professional emails or legal documentation, Smart Refine helps tailor your transcript to the right tone. With just one click, AI adjusts the style of your text to match business or legal contexts, enhancing clarity and consistency while keeping the original meaning intact. It's a faster way to create polished, ready-to-use documents with minimal effort.

- Tone control**
Switch between business or legal formatting for a transcript that fits your purpose.
- Meaning preserved**
Refines the text while keeping the original dictation intent intact.
- Editing minimized**
Generates clearer, more consistent output that's ready to use faster.

3.

KEY INSIGHTS IN SECONDS

Summaries and Insights

Your dictations or meeting recordings hold more than just words — they contain valuable insights waiting to be unlocked. Quickly grasp the essentials of your recordings with concise summaries and deeper context-aware insights. Whether you need a quick refresher, detailed highlights, or next steps — AI-generated outputs help you stay efficient and informed.

Actionable summaries

Get clear overviews of your recordings — as concise or detailed as you choose.

Key discussion points

Highlights the most important topics and decisions

Suggested next steps

AI-detected action items to guide follow-up tasks (labeled as 'possible' to let users decide)

VoicePower Professional Services:
