**Amplify+® & AISA®** is an AI-powered clinical documentation and workflow solution offered via cloud hosting. Together, they enable healthcare organisations to convert clinician-patient encounters into high-quality, structured clinical documentation — reducing administrative burden, improving turnaround times, and ensuring compliance with clinical and data governance standards.

- **Amplify+®**: a next-generation clinical workflow platform combining digital dictation, AI speech recognition, and workflow automation to streamline medical documentation.
- **AISA®**: an ambient AI “scribe” — capturing single or multi-party patient encounters via audio, transcribing them, and automatically generating diarised transcripts, clinical summaries, structured data and documents for clinicians, patients, and administrators.
- The combined service integrates with electronic patient record (EPR) / electronic health record (EHR) systems via industry-standard interoperability protocols (FHIR, HL7, REST APIs).

- Deployment is cloud-based, offering flexibility (desktop, mobile), scalability, and remote/hybrid working support for clinical and administrative staff.

## What is it?

### Amplify+

**AI-powered, clinical documentation workflow solution offering FHIR-integrated digital dictation and Dragon Medical speech recognition**

#### MARKET CHALLENGES

The healthcare sector is under unprecedented strain and pressure. With staff shortages, the rising levels of reporting and lack of interoperable systems, clinician burnout rates are at record levels. In a recent BMA UK Survey, 80% of doctors were at high/very high risk of burnout ([www.bma.org.uk](http://www.bma.org.uk)).<sup>1</sup>

Clinicians are feeling overwhelmed with the burden of administration. With around 13.5 hours per week (a third of working hours) spent on clinical documentation ([www.nuance.com](http://www.nuance.com)).<sup>2</sup>

#### THE SOLUTION

Amplify+® provides healthcare organisations with a unified workflow platform, which enhances patient outcomes and helps alleviate pressures on hospital staff, thereby maximising time and increasing productivity.

As a complete, end-to-end, AI-powered clinical documentation workflow solution, Amplify+® streamlines and enables efficiencies for all clinical documentation. It leverages Microsoft's latest speech recognition technology and optionally integrates Dragon Medical One to improve quality and accuracy while eliminating errors and inconsistencies in clinical data.

#### THE BENEFITS

- ✓ Delivers efficient workflows to enable high quality, timely clinical correspondence
- ✓ Enables clinical and admin teams to collaborate in the same platform
- ✓ Eliminates risks around errors, saves time with auto-population of templates and patient demographics
- ✓ Standardises approach to clinical documentation across your organisation
- ✓ Enables management and prioritisation of important and urgent work. Enable simple workload monitoring
- ✓ Amplify+® mobile app allows clinicians to dictate from anywhere and instantly upload their recordings to the cloud for seamless speech-to-text transcription
- ✓ Fully integrated clinical correspondence within your EHR, EMR or PAS, meaning fewer logins
- ✓ Resilient cloud-based management of clinical documentation
- ✓ Enable your workforce to securely log in from any location

## Amplify+

### AMPLIFY+® FEATURES AND FUNCTIONALITIES

- ✓ **End-to-end AI-powered Workflow Management Solution**  
Providing a complete end-to-end clinical correspondence workflow
- ✓ **Speech Recognition powered by Microsoft**  
Using the latest speech recognition technology from Microsoft and optionally providing Dragon Medical One integration
- ✓ **Zero Client Install, Microsoft - Azure Based**  
Fully browser-based or options to launch new jobs from EPR containing the relevant patient information for the hospital staff as well as EPR sign-off
- ✓ **Populate and Manage Patient Pathways**  
Dictated clinician actions (e.g. schedule MRI) are automatically pulled from documents so that those can be monitored through to completion
- ✓ **Secure and Safe Platform**  
ISO 27001 (Information Security Management Systems) + ISO 9001 (Quality Management System) accredited + GDPR Compliant
- ✓ **Automated document distribution**  
Distribute documents across multidisciplinary teams, including via EMR, patient portals, Patient Administration Systems (PAS), DICOM, MDM and FHIR or centralised print and post
- ✓ **Single Sign-On (SSO) with Multi-Factor Authentication**  
Simplify user access with seamless SSO integration, compatible with Microsoft Entra ID (formerly Active Directory), LDAP, and other identity providers. Enhance security further with robust multi-factor authentication (MFA).
- ✓ **Barcode and QR Code Scanning**  
Streamline patient information capture with efficient scanning and automatic data population
- ✓ **Custom workflows**  
Multiple options for editing and sign-off for junior/senior clinicians and multidisciplinary teams
- ✓ **Unified Clinical Correspondence Workflow**  
Combining digital dictation and workflow alongside speech recognition
- ✓ **Offline mobile app capabilities**  
Amplify+® eliminates the risk of losing important information as we enable healthcare professionals to capture their dictation securely even in offline mode
- ✓ **Co-sourcing**  
Maximise the time of your in-house admin teams and seamlessly call upon Prescribe's highly skilled transcription and editing teams, when needed
- ✓ **Electronic sign off**  
Review and approve documents produced in your templates within the platform. At home, in the office or anywhere using our Mobile App
- ✓ **Full data set, reporting suite and analytics**  
Easily track jobs (in real time) from initial referral/appointment through to distribution, as well as ability to monitor and report on hospital, department and user performance
- ✓ **Full outsource transcription with control and flexibility**  
Seamless outsourcing of work where required, including automatic options, by specialty, department, ad-hoc or by condition (providing auto failover)
- ✓ **Foot Pedal Configuration**  
Enjoy hands-free reporting and seamless navigation through fields, supporting Pathology Workflows for hands-free, speech-enabled macro and micro reporting

## AISA:

### OVERVIEW & KEY FEATURES

**AISA®** is our latest Generative AI-powered medical scribe solution that automates medical note-taking during patient encounters. It is available as a self-service application (standalone solution for Web, iOS, and Android) or can be seamlessly integrated with our Amplify+® platform for a comprehensive workflow solution.

### CORE FEATURES & CAPABILITIES

-  **AI-POWERED SPEECH RECOGNITION**  
Ambient technology captures single or multi-party patient encounters using advanced transformer encoder-decoder AI technology.
-  **COMPREHENSIVE OUTPUT GENERATION**  
Automatically generates diarised transcripts, clinical summaries, output documents and structured data tailored for clinicians, patients, and administrators.
-  **SEAMLESS EPR INTEGRATION**  
Generates structured data and output documents directly into electronic patient records (EPRs) or endpoint distribution using FHIR/HL7 standards.
-  **CUSTOMISABLE WORKFLOWS**  
Supports fully automated or hybrid workflows, with optional clinical QA validation.
-  **MULTI-ENVIRONMENT USABILITY**  
Adapts seamlessly to all clinical settings such as outpatients, ward rounds, triage, and surgical investigations.

### KEY DIFFERENTIATOR

**AISA®** offers a unique dual-mode workflow, automatically generating clinical notes from patient encounters. With a simple press of a button on your mobile app or desktop, these notes can be validated by our medical language specialists, ensuring accuracy and compliance across all your clinical needs.

Transform your note taking with AI-powered automation and seamless EPR integration.  
Contact us today to schedule a demo or learn more.

## What devices can be used with SpeechLive?

### Mobile App

#### I. DOWNLOADING THE APP

1. The Amplify+ is available for download in **both Google Play for Android devices and the App Store for iOS.**
2. To download, click the link that corresponds to your device.
3. Google Play store ([Android](#)) (compatible with what version)
4. The App Store ([iOS](#)) (compatible with what version)

### Mobile Digital dictation device

Such as the Philips PDM 8000

<https://voicepower.co.uk/products/philips-voice-recorders/>

### Fixed USB microphone

Such as the Philips SpeechMike

<https://voicepower.co.uk/products/hardware/>

### Foot pedals and earphones

The new ergonomic foot pedal has been developed by closely studying transcriptionists' movements. It offers the perfect complement to the Amplify+ web app. Transcriptionists can work even faster and more accurately by managing the playback control with a slight movement of their foot tip. The foot pedal enables them to have their hands always free for typing and makes transcribing more comfortable.

### **Features:**

<https://youtu.be/DDX4DWMsSlw>

#### **Constant file access:**

Access all your dictation files anywhere, anytime. Even without an internet connection, you can still work in local mode and synchronise all your dictation files when you are online again.

#### **Easy set-up and support:**

Setting up SpeechLive is super easy and VoicePower is available to support you in needed.

#### **Web-browser based workflow management:**

Workflow can conveniently be managed from the web browser. No need to install any complicated software. Settings can be adjusted anywhere / anytime by those with sufficient privileges.

#### **Secure on-line storage:**

Amplify+ and AISA offers highly secure online storage, keeping your files safe from unauthorised access. The solution works with maximum connection security using the HTTPS protocol. All stored data is automatically encrypted and server mirroring keeps your data reliably secured and available anytime.

VoicePower Ltd - GCloud 15 – Pre-Scribe – Amplify+/AISA

[www.voicepower.co.uk](http://www.voicepower.co.uk)

**Double encryption in real-time:**

To avoid unauthorized access, dictation files are encrypted in real time. The highest encryption standard available is used to protect your data, even during upload and download. Files can be encrypted for a third time if recorded in the DSS Pro format for maximum security.

**Backup and restore function:**

The automatic backup function protects your data against accidental loss. Your dictation files are always safe, even if your computer crashes, you suddenly lose Internet connection or unintentionally erase your data.

**Independence from local infrastructure:**

With Amplify+ and AISA you are ready to go – no local server infrastructure is required. Enjoy the full benefits of the solution right away, no matter if you are a one-man business or run a company with several employees. Your files are always available independent from changes to your IT environment.

**Flexible subscriptions:**

SpeechLive adapts to suit the needs of your business by giving you the opportunity to adjust the number of users at any time. New users to the system which join during the annual term are co-terminated to ensure that renewal is at the same time for the whole site.

**Optional Transcription service:**

Philips SpeechLive transcription service now does the typing for you. It even offers the transcription of multi-speaker recordings involving two or more persons. Get finished documents in three easy steps. First record, second send, third, receive the finished document. It is as easy as that and saves you valuable time, increasing the efficiency of your work life

**Flexible workflow options:**

## AI-Powered Clinical Documentation & Workflow Automation

Amplify+® is a next-generation clinical workflow platform that combines digital dictation, AI speech recognition, and automation to streamline medical documentation and improve operational efficiency across healthcare organisations.

Designed for hospitals, clinics, and outpatient settings, Amplify+® helps clinicians reduce administrative burden, accelerate documentation turnaround, and refocus on high-quality patient care.

## Transforming Healthcare Workflows with AI

Amplify+® leverages both **traditional speech capture** and the latest in **generative and ambient AI** to enable fast, accurate, and structured clinical note creation. Whether using voice dictation or full ambient scribe capabilities, clinicians can capture patient encounters securely and effortlessly—from anywhere.

### All your dictations in one place:

You can log into your SpeechLive account anytime wherever you are, and access all your dictation files. Download your recordings to your computer, assign them a priority status or send them off for transcription.

## **VoicePower Professional Services:**

VoicePower can assist with free of charge trials/proof of concepts, demonstrations and assistance with on-boarding. Enhancing every deployment with expert consultation, integration, and support.

Our services include:

- ✔ Consultation & Requirements Gathering – Assessing organisational needs and defining THE correct solutions.
- ✔ Workflow Analysis.
- ✔ Management Portal Administration – Overseeing licences, workflow automation.
- ✔ Solution Deployment & Onboarding – Providing remote training, help guides, and seamless implementation.
- ✔ Support – Ongoing monitoring, updates, and performance enhancement.
