| Product enhancements ***  | 1 day                         | 1 day                         | 2 days                        | 2 days                        |

| Clinical Safety / Information Governance Support                                                                                                  | Daily Charge |
|---------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| Optional daily Consultative charge to support customers with CS issues such as DCB0129/0160 reviews and IG support to safely implement solutions. | £1,200.00    |

All prices exclude VAT at the prevailing rate.

\* A Locality based service is a clinical service (speciality) with up to 15 requesting units who will send less than 4,000 cases per year.

\*\* Implementation includes the allocation of a dedicated Project Manager who will manage implementation, service design, engagement and roll-out of the service(s). Further charges may be applied (at the corresponding day rate should the implementation period exceed this allowance).

\*\*\* In addition to standard integrations with eRS, NHS Spine, GP Systems (EMIS & SystmOne) and Trust Integration Engines (TIE), should any additional bespoke integrations / enhancements be required, we will include an allocation of days for scoping / design / development.

The rack rate for additional scoping/design/product enhancement/on-site training is £1,200 per day (exc. VAT).
