Document

'Hunter Healthcare played a pivotal role in developing our Integrated Performance Report (IPR). This comprehensive Power BI solution brings together key performance metrics into a single, accessible dashboard, supporting our Trust's strategic decision-making and operational oversight. The IPR has been fully adopted by our Board and executive teams, who use it routinely to monitor performance, drive informed discussions, and support forward planning. Feedback from Board members has been overwhelmingly positive and they have expressed high levels of satisfaction with both the functionality and the clarity of insights provided. Their team has demonstrated exceptional technical expertise and a deep understanding of our organisational needs. Their collaborative approach and commitment to quality delivery have resulted in a solution that has become central to how we manage and review performance across the Trust'.

1. Pricing Approach

Hunter Healthcare operates a transparent and flexible pricing model reflecting the bespoke nature of its NHS data integration and analytics platform services. Pricing is agreed based on the scope, complexity, and resource requirements of each engagement and is formalised within the G Cloud Order Form prior to service commencement. A rate card is available setting out the maximum daily charges for each resource type and seniority level.

2. Service Packages

- ICB System Wide Data Integration and Warehouse Implementation Service: £85,000 to £220,000
- Acute, Community and Mental Health Data Integration Service: £50,000 to £130,000
- NHS Cloud Data Warehouse Build and Optimisation Service: £65,000 to £150,000
- Data Quality Improvement and Validation Framework Service: £30,000 to £75,000
- API Enabled System Integration Service: £40,000 to £95,000
- Workforce Analytics Data Platform Implementation Service: £45,000 to £110,000
- Community Services Data Platform and Integration Service: £35,000 to £85,000
- Mental Health Data Integration and Analytics Platform Service: £40,000 to £100,000
- Technical Data Architecture and Integration Scoping Service: £5,000 to £45,000

Bespoke or highly complex services are priced following detailed scoping.

Prior to delivery, Hunter Healthcare will always agree the number and skill levels of resources required, the commercial model (fixed price or time and materials), and the total expected cost and duration, all documented within the G Cloud Order Form.

Onsite engagement is available where required and factored into the agreed price once the service scope has been confirmed.

3. What is Included

Standard pricing includes:

- Service initiation and onboarding

- Data integration and ETL pipeline development
- Data quality validation and transformation
- Data warehouse modelling and documentation
- API integration where required
- User support via email and ticket based channels
- Named technical lead and service oversight
- Onsite engagement where appropriate
- Governance, security, and operational processes
- Knowledge transfer and handover documentation

Onsite engagement is available where required and is included within the agreed service pricing following scope confirmation.

4. Additional Services

Where required, additional services can be agreed separately, including:

- Additional data integrations beyond the agreed scope
- Bespoke analytical or reporting development
- Extended migration or transition support
- Enhanced service management or reporting

All additional services are agreed in advance through formal change control and priced transparently.

5. Assumptions

Pricing assumes:

- Delivery within NHS approved hosting environments
- Access to agreed source systems and stakeholders
- Buyer engagement in onboarding and governance activities
- Standard security and information governance controls

Any material changes to scope or assumptions may require pricing adjustment through agreed change control.

'Hunter Healthcare were commissioned to support the development of a workforce analytics database, with the aim of creating a unified view across a number of disparate workforce datasets.'

'The resulting solution has significantly enhanced our ability to analyse workforce trends, support strategic workforce decisions, and monitor staffing across different service areas with much greater clarity and timeliness.'

'It has laid the groundwork for further analytical development and allowed internal teams to access high-quality, trusted data with confidence. Their collaborative approach, technical capability, and deep understanding of NHS workforce challenges were instrumental in the success of this project. We would highly recommend them to any NHS organisation looking to improve their data infrastructure and unlock actionable insight from complex data.'
