## Overview

---

Alcium Software delivers Umbraco CMS websites for the public sector, combining open-source technology with flexible, secure, and accessible design. This document outlines our typical pricing structure, daily rates, and hosting costs.

## Daily Rates

---

| Role                      | Daily Rate (£) |
|---------------------------|----------------|
| Content Editor / Writer   | £595           |
| Graphic Designer          | £630           |
| Digital Designer          | £630           |
| Tester                    | £630           |
| Digital Project Manager   | £700           |
| Web / Front-end Developer | £1,050         |
| Back-end Developer        | £1,150         |

## Typical Website Projects

---

Projects vary depending on client requirements, but most Umbraco CMS websites we deliver include:

- Website project management
- Website migrations (WordPress > Umbraco, Umbraco > Umbraco etc)
- Umbraco CMS upgrades
- Website design and UX/UI
- Website build and deployment
- Website testing and quality assurance
- Website accessibility
- Website integrations and workflows

We are an experienced design and digital team specialising in the development and delivery of Umbraco CMS websites for the public sector.

## Pricing

---

We provide custom quotations for design, development, or migration projects based on detailed requirements. Our team works with clients to define scope, functionality, and timelines to ensure accurate cost estimates.

## Hosting & Maintenance

---

Websites are hosted on UK-based Microsoft Azure cloud infrastructure with separate live and test environments.

### Annual hosting and maintenance typically include:

- Secure, reliable website hosting
- SSL certificate management and renewal
- Full access to the Umbraco CMS to Umbraco CMS user access
- Ongoing CMS user support
- Technical consultation and support for new features
- Proactive website monitoring to maintain availability and performance

### Hosting and Support Costs:

- Hosting costs vary depending on the site complexity, integrations, support levels and reporting requirements.
- For a standard website, annual hosting costs typically start from £1,200 + VAT.
- A bespoke quotation can be provided considering hosting and support requirements.

#### NOTES

- All rates and costs are exclusive of VAT.
- Pricing is flexible and scalable based on project size, complexity, and specific client requirements.
- Additional services (such as multilingual websites, advanced integrations, or accessibility compliance beyond WCAG AA) will be quoted separately.
