G-CLOUD 14 SERVICE DEFINITION

Agile Cloud Development

AGILE CLOUD DEVELOPMENT

TXP's Agile Cloud Development services are aligned to GDS, TCoP, TDD and Continuous Integration principles.

Quality is assured by TXP's certification to ISO9001 and ISO27001 standards, our Microsoft Solution Partner designations for Digital & App Innovation on Azure and for Infrastructure on Azure. Our delivery teams hold over 70 Microsoft Certifications.

Multi-disciplinary teams align 'best of breed' tooling and processes to client requirements, delivering cross functional capabilities with a strong emphasis on ROI and early benefit.

Enterprise, full-stack and full-lifecycle development for the Cloud – including:

- Requirement Capture
- UX/UI Design
- Development
- Release
- Testing
- Operational Support

Front-end Technologies

- HTML
- CSS
- JavaScript
- AngularJS
- Bootstrap
- Various CMS
- And Others

Back-end Technologies:

- | | |
|-----------|--------------|
| • PHP | • Java |
| • Python | • Django |
| • Ruby | • .Net |
| • Apex | • C++ |
| • Node.js | • C# |
| • Scala | • And Others |

FEATURES & BENEFITS

Features

- True One Team ethics promotes close collaboration and team integration
- Multi-disciplinary teams delivering cross-functional capabilities
- Strong emphasis on delivering early benefit and ROI
- UK-led, cost effective, scalable resource pool
- Technology agnostic
- Individual and organisational certification, ISO9001, ISO27001, Microsoft Solution Partner designations for Digital & App Innovation on Azure and for Infrastructure on Azure
- Flexible engagement models: Best fit or client led
- Aligns 'best of breed' tooling and processes to GDS requirements
- Access to other Practices: Architecture, Business Analysis and Project Management

Benefits

- Extensive technology experience to guide and deliver the highest quality
- Experience, capability and process, centred on delivering what was committed
- Flexible resource options
- Embraces existing technical design principles or creates new principles
- Quality, secure delivery backed by industry standard certification
- Proven internal/external processes deliver from project conception
- Teams leverage domain expertise from other practices to enable delivery

ADDITIONAL SERVICE INFORMATION

Backup, Restore and Disaster Recovery

TXP has a robust DR plan, tested six-monthly (further details on request). Though we would look to use shared repositories when executing work with the client, any repositories which are within our domain will be subject to these disaster recovery and backup plans. The majority of repositories and tooling are typically cloud based and so benefit from the associated assurance of continuity of service.

Onboarding / Offboarding

As part of the service design phase, the onboarding requirements would be carefully scoped and planned. Typically, this would be sensitive to the impact of business change and underlying technology and services.

Benefits

TXP has a general four phase implementation plan that looks to pragmatically onboard, measure and continually improve services. Further information is available on request, but the phases are summarised as:

	Overview	Milestone
Phase 1	Scoping & Planning	Agree Plan
Phase 2	Initial Setup	Agree SLAs, KPIs
Phase 3	Transition	Service Sign Off
Phase 4	Continual Improvement	Monthly Service Reviews

Benefits

Due to the nature of the services being provided, the pricing is reflected in the SFIA model, referenced in the Pricing Document within the G-Cloud Service Description on Digital Marketplace.

ADDITIONAL SERVICE INFORMATION

Service constraints

There are no specific service constraints.

Service levels for support hours

Support is available by email/ticketing, phone and web – and is available 24/7/365. Extra charges may apply.

Service levels

These are typically on a project-by-project basis, but mechanisms for remedy include the use of service credits for example.

The process

Ordering, invoicing and cancellation are as per the G-Cloud process.

After-sales support

After-sales support for the cloud related services provided under G-Cloud is typically 9am-5pm and available by phone and email.

TXP also operates an ITIL-aligned, SLA driven support function which can provide 24/7 support as part of a specific offering. Our governance wrapper extends to the use of third-party support providers to deliver scalability.
