

THEIA360

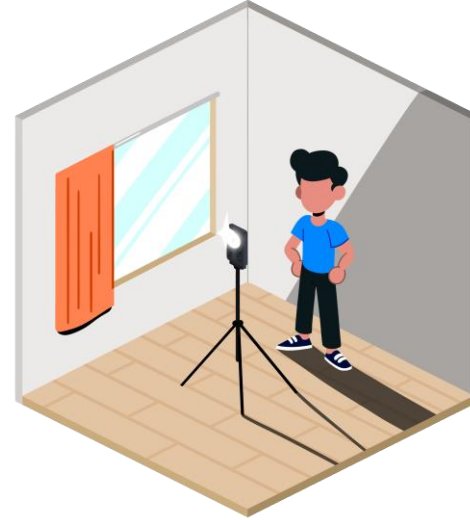

THEIA360 Pricing G-Cloud15

Step 1- *Snap Snap*

Take photos using a 360 Camera, THEIA360 will work with any 360 Panoramic image, this means that the cheapest of 360 Cameras will work and the specialist equipment is not required

Step 2 – *Create Scenes*

Once you have your photos ready, you will need to upload the photos to the THEIA360 platform where you will be able to rename all your scenes and link them together.

As you may be taking photos in peoples homes, you have the ability to redact and blur within the scenes to remove any personal information or people.

P.S – Dont worry if you havent taken all of the scenes yet, you can always go back in and add more!

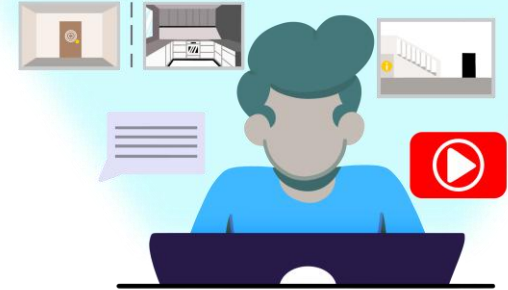

Step 3 – Tour Builder

The Tour builder easily will allow you to tag assets in a scene and bind them with your asset catalogue and therefore are able to show data on the asset from within the tour.

For example.... *uploading or integrating your asset system with THEIA360 would allow you show information from your systems directly when clicking the asset within a tour.*

You are also able to add more detailed images and videos anywhere in the tour to be replayed or viewed.

Step 4 – Thats it!

That's it , the tour is built and available to be viewed from the platform or shared to a external website. At any point you are able to go back into the tour and make changes.

Well done, you deserve a break...

Band	Units	Cost Per unit	Example Units	Example Annual Cost
