G-Cloud Service Name

Unstructured Data Discovery and Risk Reduction

Service Overview

Placecube Unstructured Data Discovery and Risk Reduction, enables you to reduce costs and risks from your ever-growing volumes of unstructured data.

Optimise your organisation with Unstructured Data Discovery, Classification, Risk Reduction, Governance, and Remediation, to help:

- Comply with regulations
- Reduce infrastructure costs
- Lower risk
- Strengthen security positions
- Optimise AI output

Pricing

Unstructured Data Discovery, Classification, Risk Reduction, Governance, and Remediation is provided on an Annual SaaS Subscription basis, priced by data size. Pricing, is as follows:

Name	Annual Subscription
Enterprise Insights	£180 per TB
Hosting and Support	Additional, according to requirements
Professional Services, including implementation	Additional, according to requirements
Actions	Additional option - £300 per TB
Comply360	Additional option - £3,480 per TB

Other options are also available upon request – please contact us for a personalised quotation. Any additional activities will be in line with resources required for that activity. The individual day rate for each resource type is included in the SFIA rate card.
