G-Cloud Service Name

Knowledge Hub Microsites

Service Overview

Your own branded mini website – microsite – hosted on Knowledge Hub to promote your knowledge, assets, resources and services publicly. An always open, accessible, digital exhibition space, where you can create responsive web pages and listings utilising Knowledge Hub’s extensive digital toolset, without the need for hosting and maintenance fees.

Please see Knowledge Hub Microsites service definition for more information.

Pricing

Minimum contract term: 1 year

Guideline Knowledge Hub Microsite pricing is as follows. Any additional activities such as data on-boarding, off-boarding, further development work, or establishment of integration with existing directory services, systems or networks will be in line with resources required for that activity.

The individual day rate for each resource type is included in the SFIA rate card. However, our standard fees are designed to be fully inclusive and it is therefore unusual to require additional services.

Each microsite includes as standard:

- Organisational branding
- Content management and digital collaboration tools
- Administrator access
- Full administrator training
- Ongoing support

Set-up fee = **£950 + VAT** (one-off)

Price per annum = **£950 + VAT**
