

AI Implementation Co-Pilot Studio

Service Definition Document

Introducing

Robiquity

About Robiquity

- **Established:** 2016
- **Specialist:** automation, low code and AI specialist services provider
- **Technology:** Microsoft Power Platform, Blue Prism, UiPath
- **Secure:** 80% of staff hold NPPV3 + SC clearances
- **Approach - Rethink, Reimagine and Redesign:**
 - Co-innovation partnership
 - Discovery & design
 - Rapid prototyping
 - Agile development - scale and embed what works
 - Up-skill and knowledge transfer – citizen development and pro-development

Some of our clients

Robiquity Service Catalogue

End-to-End Service Support to Maximise Your ROI

Design Thinking

Service design enhances user experience and efficiency by employing a holistic, co-creative approach to innovate and streamline services, ensuring they are user-centred, effective and seamlessly integrated.

Intelligent Automation

Intelligent automation streamlines complex processes, boosts efficiency and enhances decision-making by integrating artificial intelligence into everyday operations.

Low-Code Solutions

Low-code solutions accelerate digital transformation by delivering solutions faster and cheaper through rapid application development.

Data and Analytics

Data and analytics capabilities unlock actionable insights, drive strategic decision-making and foster a culture of informed decision making through the deep analysis of trends and performance metrics.

Artificial Intelligence

Our AI Services integrate cutting-edge artificial intelligence to enhance your operations, revolutionise your capabilities, boost your creativity and drive outcomes.

Managed Services

Managed service capabilities provide organisations with operational reliability, strategic IT support and continuous optimisation, allowing you to focus on core functions while experts manage your technological infrastructure.

Alignment with Public Sector Priorities

AMBITION	CASHABLE SAVINGS/ COST AVOIDANCE	EFFICIENCIES/ PRODUCTIVITY	IMPROVED EXPERIENCE	REGULATORY AND COMPLIANCE	INTERNAL SKILLS DEVELOPMENT
HOW?	- Deliver items on IT roadmap faster and cheaper - Replace expensive third-party licensed systems	Refocus human time on higher-value, cognitive work	- Remove administrative burden - Reimagine fragmented processes - Digitise experiences and promote better services	- Standardise processes - Create clear audit trails - Improve adherence to SLAs - Real-time monitoring and alerts	- Knowledge transfer via blended teams - Dedicated training - Hackathons
ROBIQUITY PROOF POINTS	Through scaling low code, automation and AI, Robiquity helped a client achieve £8m cashable annual benefits and an 8:1 return on the Microsoft Power Platform.	Robiquity established a client's CoE delivering c.30 processes reimaged in the space of 12 months driving 85 FTE equivalent/cost avoidance benefit.	"I believe now I have my work life balance back. I would not want to have to go back to old ways of working."	Robiquity brought a police force's average disclosure time down from 64 days to an average of 17 days, (well within the applicable 28-day SLA).	Established client's CoE and up-skilled (via competency frameworks, knowledge transfer, tailored training) our client's internal team (BAs and Developers) to build self-sufficiency.

AI Implementation

Co-Pilot Studio

AI Implementation – Co-Pilot Studio

DESCRIPTION

Harness AI responsibly and effectively with end-to-end Co-Pilot Studio AI implementation services.

Robiquity provides AI strategy, solution design, rapid prototyping, implementation and ongoing optimisation, allowing you to integrate AI into workflows to enhance decision-making, efficiency and innovation.

FEATURES

Studio Deployment: design and implementation of agentic AI solutions.

Model Development: develop, train and fine-tuning of AI models.

AI Integration: embed AI into operational workflows using Co-Pilot Studio.

Prototyping & Proof of Concept: build AI PoCs and rapid prototypes.

Monitoring & Continuous Improvement: track AI performance, accuracy and optimise.

Security & Compliance: responsible AI, data protection/compliance with regulatory standards.

Training & Enablement: staff upskilling to manage, monitor and adopt AI.

BENEFITS

- Implementation of AI strategy roadmap aligned with organisational goals.
- Rapidly deploy AI solutions with demonstrable business value.
- Integrate AI into workflows for improved decision-making and efficiency.
- Ensure responsible AI adoption with governance, ethics and compliance embedded.
- Enable scalable AI deployment through Azure AI Foundry.
- Support innovation while reducing operational risk and resource inefficiency.
