

Legacy RPA Platform Migration to Microsoft Power Platform

Service Definition Document

Introducing

Robiquity

About Robiquity

- **Established:** 2016
- **Specialist:** automation, low code and AI specialist services provider
- **Technology:** Microsoft Power Platform, Blue Prism, UiPath
- **Secure:** 80% of staff hold NPPV3 + SC clearances
- **Approach - Rethink, Reimagine and Redesign:**
 - Co-innovation partnership
 - Discovery & design
 - Rapid prototyping
 - Agile development - scale and embed what works
 - Up-skill and knowledge transfer – citizen development and pro-development

Some of our clients

Robiquity Service Catalogue

End-to-End Service Support to Maximise Your ROI

Design Thinking

Service design enhances user experience and efficiency by employing a holistic, co-creative approach to innovate and streamline services, ensuring they are user-centred, effective and seamlessly integrated.

Intelligent Automation

Intelligent automation streamlines complex processes, boosts efficiency and enhances decision-making by integrating artificial intelligence into everyday operations.

Low-Code Solutions

Low-code solutions accelerate digital transformation by delivering solutions faster and cheaper through rapid application development.

Data and Analytics

Data and analytics capabilities unlock actionable insights, drive strategic decision-making and foster a culture of informed decision making through the deep analysis of trends and performance metrics.

Artificial Intelligence

Our AI Services integrate cutting-edge artificial intelligence to enhance your operations, revolutionise your capabilities, boost your creativity and drive outcomes.

Managed Services

Managed service capabilities provide organisations with operational reliability, strategic IT support and continuous optimisation, allowing you to focus on core functions while experts manage your technological infrastructure.

Alignment with Public Sector Priorities

AMBITION	CASHABLE SAVINGS/ COST AVOIDANCE	EFFICIENCIES/ PRODUCTIVITY	IMPROVED EXPERIENCE	REGULATORY AND COMPLIANCE	INTERNAL SKILLS DEVELOPMENT
HOW?	- Deliver items on IT roadmap faster and cheaper - Replace expensive third-party licensed systems	Refocus human time on higher-value, cognitive work	- Remove administrative burden - Reimagine fragmented processes - Digitise experiences and promote better services	- Standardise processes - Create clear audit trails - Improve adherence to SLAs - Real-time monitoring and alerts	- Knowledge transfer via blended teams - Dedicated training - Hackathons
ROBIQUITY PROOF POINTS	Through scaling low code, automation and AI, Robiquity helped a client achieve £8m cashable annual benefits and an 8:1 return on the Microsoft Power Platform.	Robiquity established a client's CoE delivering c.30 processes reimaged in the space of 12 months driving 85 FTE equivalent/cost avoidance benefit.	"I believe now I have my work life balance back. I would not want to have to go back to old ways of working."	Robiquity brought a police force's average disclosure time down from 64 days to an average of 17 days, (well within the applicable 28-day SLA).	Established client's CoE and up-skilled (via competency frameworks, knowledge transfer, tailored training) our client's internal team (BAs and Developers) to build self-sufficiency.

Legacy RPA Platform Migration to Microsoft Power Platform

Legacy RPA Platform Migration to Microsoft Power Platform

DESCRIPTION

Robiquity provides services to migrate legacy Robotic Process Automation (RPA) platforms (e.g. UiPath, Blue Prism, Automation Anywhere) to Microsoft Power Platform (including Power Automate and Power Apps).

Our approach ensures continuity, reduces operational risk, modernises automation capabilities and realises cashable savings through rationalisation and optimisation. Robiquity has successfully migrated several customers from legacy RPA platforms on time and within budget.

FEATURES

Assessment & Planning: evaluate legacy RPA estates, identify migration roadmap.

Process Discovery & Rationalisation: review and optimise existing bots.

Migration: migrate/rebuild bots and workflows on Microsoft Power Platform.

Integration Services: integrate with existing systems, ERP, CRM, cloud/on-premises applications.

Governance & CoE Enablement: CoE/governance frameworks for Power Platform.

Testing & Validation: validate migrated bots for functionality, performance, compliance.

Training & Knowledge Transfer: upskill teams on managing Power Platform.

Monitoring & Optimisation: implement monitoring, reporting and continuous improvement processes.

BENEFITS

- Modernise legacy RPA to a scalable, low-code platform.
- Reduce operational and licensing costs.
- Rationalise redundant or inefficient bots and processes.
- Enable faster deployment of new automation workflows.
- Improve governance, compliance and operational transparency.
- Facilitate future-ready automation with AI and advanced Power Platform capabilities.
