

PRICING

G-Cloud 15

Abstract

Pricing document for G-Cloud 15

Howard Pycock

HRP000259/15

Contents

1. Pricing.....	2
2. Service Level Agreements (on demand application packaging only)	2

1. Pricing End User Compute (EUC) Services

Due to the range of services available, pricing is calculated based on client business requirements and the SFIA rate card (please see separate document)

2. Pricing (Application Packaging)

HRP provides a simplified application packaging pricing model with the intention of providing transparency and improved forecasting. The complexity of application packaging can vary, but rather than provide a convoluted pricing matrix HRP will work to a blended complexity pricing model that will apply to all service types.

Service Type	Volume Purchased			
	1-9	10-99	100-499	500+
Application Package (Standard SLA)	£550	£380	£350	£320
Application Package (Emergency SLA)	£825	-	-	-
Application Package Conversion	£30	£30	£30	£30
Application Compatibility*	£50	£40	£30	£30
Integration	£50	£50	£50	£50
UAT Provision/Acceptance	£50	£50	£50	£50

*setup costs may apply depending on media format and volume purchased

3. Service Level Agreements (on demand application packaging only)

Available to on demand services the following Service Level Agreements apply :-

- Standard delivered with 5 working days
- Emergency delivered with 1 working days

Please refer to section 4 of the service definition document for further details.

Volume application packaging will be completed to an agreed schedule with the client
