## Tool Partnerships

Silver Partner for providing Tricentis automation solutions using various Tricentis tools

Tx holds a **Gold-level partnership with UiPath**, gaining early access to its test automation innovations.

Gold Partner for their low code automation solution

Tx has established a **strategic partnership with Datagap**, leveraging its advanced data validation and migration solutions to enhance end-to-end data assurance.

Partners with AccelQ for functional and API Test Automation solution

databricks

Through its partnership with **Databricks**, Tx leverages **unified data engineering and AI-driven analytics**

DATADOG

Tx collaborates with **Datadog** to integrate **end-to-end observability within QA operations**

In partnership with **CrewAI**, Tx harnesses **multi-agent AI collaboration** to drive autonomous test case generation, impact analysis, and execution

QuerySurge

Tx has partnered with **QuerySurge** to deliver a unified framework for **data validation**

# Key Challenges in Testing Mobile Apps

## Key Challenges

**Device Fragmentation:** Testing across various devices, screen sizes, resolutions, etc.

**Operating System Fragmentation:** Testing across different operating systems (iOS, Android) and their versions, each with its own set of features, APIs, and behaviors.

**Network Conditions:** Mobile apps may behave differently under different network conditions (3G, 4G, 5G, Wi-Fi), leading to performance and reliability issues.

**User Interactions:** Mobile apps often involve complex user interactions, such as gestures, swipes, taps, and multitouch, which need to be tested comprehensively. Apps which has these features including we test these on the physical devices

**Integration with Device Features:** Testing integration with device features like camera, GPS, accelerometer, and sensors requires specialized testing approaches

**Security and Privacy Concerns:** Mobile apps often handle sensitive user data, making security and privacy testing critical to identify vulnerabilities and compliance issues.

## Tx Proposition

Perform **Compatibility Testing** by leveraging Tx's in-house **Mobile Testing Lab** equipped with **550+ physical** and unlimited cloud-based devices, including various versions of Android and iOS platforms.

**Cross-device testing** to analyze the consistency of the mobile app across various browsers (via cross-browser testing) and operating systems

**We need to talk about in house lab which has sims and connectivity to check**

Perform gesture, touchpoint, functional, compatibility, and real-device testing, leveraging automation tools to ensure seamless user interactions across devices.

Leverage real-device testing, automation, cloud-based testing platforms, and cross-platform tools to ensure seamless integration with device features like camera, GPS, and sensors.

**Security Testing** for Identifying and addressing security vulnerabilities, such as data breaches, unauthorized access, and insecure data storage

A fully equipped mobile testing lab in collaboration with leading tool vendors

TestingXperts, with its Advanced Mobile Test Lab, extensive expertise in **mobile testing engagements**, and breadth of experience in the right tools, ensures that mobile testing is thorough and cost-effective.

Mobile Device Lab

Our Mobile Testing Lab is equipped with **550+ physical and unlimited cloud-based devices**, including the latest **Android and iOS platforms**, and supports latest testing trends on **3G, 4G, 5G, and Wi-Fi** with various network carriers for comprehensive real-world validation.

## Major Mobile Testing Tools Expertise

## Infrastructure Security

- **ISO 27001-certified** Organization
- **Cyber Essentials and Cyber Essentials Plus Certified** Organization
- 3-tier security, i.e. at the **Campus level, Building level, and Work area level**
- **Biometric login access** is used to track the information on the real-time basis
- **24\*7 CCTV Monitoring**
- **Periodic Security Audits**
- **Disaster Recover / Business Continuity Setup**
- **Deployed Network level firewalls, Intrusion Prevention System (IPS)** to prevent the security threats from outside
- A well-structured **DR/BC plan** to minimize downtime and data loss in emergencies

## Data Privacy and Compliance Measures

- **GDPR Compliant** Organization for Data Security
- **End-to-end encryption** of data at rest and in transit to prevent unauthorized access
- Role-Based Access Control (**RBAC**)
- **Detailed tracking of access and modifications** to data for accountability
- Ensures employees are trained on regulations like **GDPR, HIPAA, and CCPA**, etc.
- **Regular assessment** of third-party vendors handling client data
- Regulatory Reporting

## Certifications & Benefits

**Alignment with Client security Requirements**

**Seamless Connectivity with Client**

**Immediate expansion capacity for 100+ seater ODC**

**Testing mobile applications across a diversity of handsets and global operators**
