

Faster progress through technology

# AI & ML Enablement and Accelerator

Clarity, direction, and real-world impact

# Who we are

We partner with ambitious leaders to cut through digital complexity and accelerate the UK's security, resilience and prosperity. Our teams design and integrate solutions that fit seamlessly into existing systems, turning strategy into measurable progress.

We blend strategy, technology, and change expertise to tackle complex challenges. Our specialists deliver actionable plans, robust architectures, and sustainable transformation across digital strategy, AI, and data governance.

Defence, government, and industry leaders trust us to deliver results that matter.

# Our three principles

These principles guide what we do and how we work:

## Force for Good

We empower our team, clients, and society by investing in people, supporting positive change, and championing national resilience and prosperity.

## Deliver Excellence

We set the highest standards in everything we do. We think long-term, focus on what matters, and enable our team to deliver outstanding results for ambitious clients.

## Empathy & Integrity

We listen to understand, challenge constructively, and always act with honesty and care, owning our decisions and doing what's right, even when it's hard.

# AI & ML Enablement and Accelerator

We assess readiness for AI and ML, identify and prioritise use cases, and set up the foundations to deliver services safely and securely.

This includes governance, data readiness, processes and MLOps patterns for deployment, monitoring and scaling within security and assurance constraints.

## Features

- AI readiness assessment across data, skills, tooling and governance.
- Use case discovery workshops prioritising value, feasibility and risk.
- Responsible AI controls covering ethics, assurance and accountability.
- Data readiness actions for training, evaluation and monitoring datasets.

## Benefits

- Confidence to adopt AI safely within assurance expectations.
- Focus on use cases that deliver real operational value.
- Reduced AI risk through governance, controls and monitoring.
- Faster delivery through reusable MLOps patterns and tooling.
