

Faster progress through technology

Enterprise Data Transformation

Clarity, direction, and real-world impact

Who we are

We partner with ambitious leaders to cut through digital complexity and accelerate the UK's security, resilience and prosperity. Our teams design and integrate solutions that fit seamlessly into existing systems, turning strategy into measurable progress.

We blend strategy, technology, and change expertise to tackle complex challenges. Our specialists deliver actionable plans, robust architectures, and sustainable transformation across digital strategy, AI, and data governance.

Defence, government, and industry leaders trust us to deliver results that matter.

Our three principles

These principles guide what we do and how we work:

Force for Good

We empower our team, clients, and society by investing in people, supporting positive change, and championing national resilience and prosperity.

Deliver Excellence

We set the highest standards in everything we do. We think long-term, focus on what matters, and enable our team to deliver outstanding results for ambitious clients.

Empathy & Integrity

We listen to understand, challenge constructively, and always act with honesty and care, owning our decisions and doing what's right, even when it's hard.

Enterprise Data Transformation

We deliver end-to-end data transformation: platforms, pipelines, governance and operating model.

We work alongside your teams and suppliers to implement changes and embed new ways of working.

The result is an AI ready, trusted data foundation that supports insight, interoperability and future capability.

Features

- Delivery of modern data platforms with secure access patterns.
- Data governance implementation including ownership, standards and controls.
- Pipeline engineering for ingestion, transformation and serving data.
- Data quality tooling, rules and monitoring embedded into delivery.

Benefits

- Trusted data foundations enabling faster decisions and better services.
- Reduced duplication through shared platforms, standards and reuse.
- Improved compliance through stronger governance, security and controls.
- Faster insight through reliable pipelines and accessible datasets.
