
Explore the cutting-edge world of Posit tools and platforms with our specialised training courses. Our Posit training is designed to equip participants with practical skills and deep insights into Posit Connect, Posit Workbench, and Posit Package Manager.

Features

- Courses covering Posit Connect, Posit Workbench, and Posit Package Manager.
- Learn to deploy content using RStudio's one-click method and from git repositories.
- Master content management, including access control and scheduling.
- Gain hands-on experience with navigating Posit Workbench and connecting to databases.
- Understand package management in R using Posit Package Manager.
- Interact with expert trainers who are consultants in the field.

Benefits

- Gain authoritative knowledge endorsed by industry leaders like the Royal Statistical Society.
- Access course materials and scripts post-training for continuous learning.
- Enhance day-to-day tasks with newly acquired skills.
- Engage in interactive sessions with time allocated for questions and discussions.
- Enjoy flexible training formats, including online and in-person sessions.

Constraints

- Customisation scope may be limited based on core training concepts.
- Consultant availability for ongoing support may vary.
- Extensive customisations may impact the budget and require additional consultation.

Our Posit training courses are ideal for individuals and teams seeking to harness the power of Posit tools effectively. Contact us to learn more or to tailor training to your specific needs
