

# Fully Managed Posit Environment (previously RStudio)

Jumping Rivers is a full-service partner, reseller, and distributor of RStudio software. We support clients with deployment, consultancy, and training. Typically, we offer 10% of RStudio licence cost as a discount against our services.

*Example:* RStudio Team Standard (~£25,000) → £2,500 discount.

## Our Services and Solutions

We provide tailored support for different client needs:

| Problem / Need                                      | Service Offered            |
|-----------------------------------------------------|----------------------------|
| More than a standard deployment                     | RStudio Discovery          |
| Licence only                                        | RStudio Licence            |
| IT team struggles with Linux                        | Ad-Hoc Support             |
| Unsure if RStudio installed properly                | Health Check               |
| Do not want responsibility of environment           | Support & Maintenance      |
| Have third-party support but need installation help | Managed RStudio Deployment |

## Managed Service for RStudio

### Phase 1: Installation

#### 1. Managed RStudio Deployment (Standard)

- Simple build of Linux servers in cloud environments (AWS, GCP, Azure)

- Installation of single RStudio products or RStudio Team
- Timescales: 7 days (Standard), 10 days (Enterprise)
- Recommended: RStudio Discovery prior to RStudio Team Enterprise
- Estimated Price: Standard/Team: \$9,300 / \$13,400

## 2. Bespoke RStudio Deployment

- Complex builds with integration of other software and authentication
- High availability for testing, pre-production, production
- Timescales: Determined after RStudio Discovery
- Price: RStudio Team Enterprise – TBC after Discovery

## Phase 2: Support & Maintenance

| Support Type          | Overview                                                                        | Estimated Price                                             |
|-----------------------|---------------------------------------------------------------------------------|-------------------------------------------------------------|
| Support & Maintenance | Control and fully manage environments; 1–3 days/month plus 1.5–4 days quarterly | Core: \$8,000, Professional: \$16,000, Enterprise: \$48,000 |
| Ad-Hoc Support        | Support for environments we haven't created; Linux and data science safety net  | Core: \$8,000, Professional: \$16,000, Enterprise: \$32,000 |

## Pre- and Post-Installation Services

| Service   | Overview                                                   | Timescales | Estimated Price              |
|-----------|------------------------------------------------------------|------------|------------------------------|
| Discovery | Assist with architecture, specifications, and expectations | 2–5 days   | Standard/Enterprise: \$6,700 |

|              |                                                          |          |                                            |
