Data Migration

Introduction to Stellarmann

Bespoke built, expert led, delivery driven

Stellarmann is a specialist technology and business transformation consultancy, supporting public and private sector organisations to deliver complex change with confidence.

We launched in 2020 to help clients access exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Since then, we've supported multi-million-pound programmes for major government departments and organisations, including HMRC and The Crown Estate, by building and leading high-performing outcome-focused teams matched to each engagement.

Our shared-risk commercial approach keeps delivery anchored to agreed outcomes and measurable progress, while our Engagement Delivery Management team provides hands-on oversight shaping robust Statements of Work, maintaining alignment to deliverables and acceptance criteria and reducing the operational burden on client-side leaders.

Data Migration

Service Description

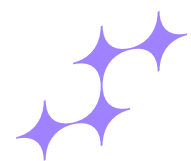

Data migrations fail when source quality is unknown, mappings are unclear and cutovers are rushed. The impact is defects, delays and lost confidence after go-live.

Stellarmann delivers migrations with clear evidence and controlled cutovers. We profile source data to understand volume, quality, exceptions and constraints. We define mappings and transformations with explicit rules and ownership, coordinating cleansing activity where needed.

We run rehearsals and validation so issues are found early. We define cutover and rollback plans, including performance windows and operational dependencies. During execution we manage triage and resolution with clear reporting, and we produce audit trails and evidence packs to support sign off.

We tune batch performance and build runbooks that operations teams can use after go live. We transfer knowledge so teams can repeat the approach for future migrations. The outcome is predictable migrations, reduced disruption and integrity you can defend without unnecessary complexity.

We leave behind documentation and clear ownership so the approach is sustained after the engagement.

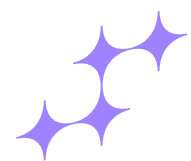

Features

- ✦ Source data profiled to understand quality, volume and exceptions
- ✦ Mappings and transformations defined with clear consistent rules
- ✦ Cleansing actions coordinated and outcomes tracked
- ✦ Rehearsals run and results validated against agreed criteria
- ✦ Cutovers and rollback planned to minimise disruption
- ✦ Issues triaged quickly and driven to resolution
- ✦ Audit trails and evidence packs produced for sign off
- ✦ Batch performance tuned to meet agreed windows
- ✦ Runbooks created with full operational handover
- ✦ Knowledge transferred so teams can repeat the approach independently

Benefits

- ✦ Rehearsals and cutover planning reduce disruption
- ✦ Validation and evidence protect data integrity
- ✦ Runbooks and windows make cutovers predictable
- ✦ Early validation reduces post go live defects
- ✦ Evidence packs support confident sign off
- ✦ Clear triage and support paths speed stabilisation
- ✦ Patterns and templates make future migrations easier
- ✦ Batch tuning keeps performance within agreed limits
- ✦ Transparent reporting improves confidence throughout
- ✦ Runbooks and handover enable sustained operations

How this enables better outcomes

Data migration supports cloud, platform and integration services by moving data safely and predictably. It connects to governance and testing to provide readiness evidence, supporting transformation without unnecessary complexity.

Common triggers

- ✦ A platform change requires moving data safely
- ✦ Data quality and exceptions are not understood
- ✦ Cutover risk needs rehearsals and rollback plans
- ✦ Audit or regulatory evidence is required
- ✦ Operations need clear runbooks and handover

Service Constraints

Requires environment access, data owners, agreed change windows and relevant tooling. Tool licensing and large scale cleansing effort are out of scope unless separately commissioned.

Remote-first delivery; onsite cutovers by agreement.

Engaging Stellarmann

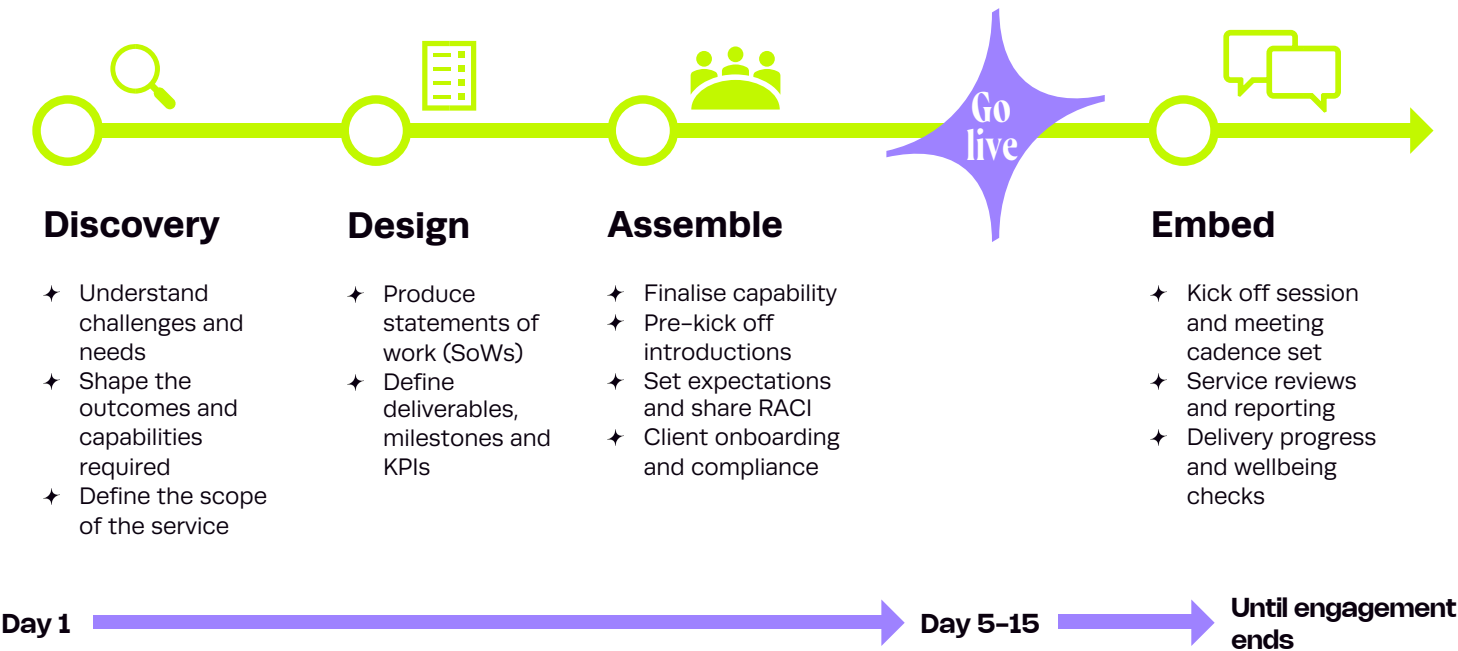

Ordering

Our services can be engaged inline with the G-Cloud 15 framework call off terms. Please get in touch initially by emailing gcloud@stellarmann.com

Service Delivery

We assign each of our clients a dedicated, free of charge engagement delivery manager who will be responsible for shaping the services, outcome and deliverables as well as for ensuring the quality-of-service delivery.

We will guide you through our comprehensive four stage service delivery process that takes our buyers from initial discovery to the end of the engagement.

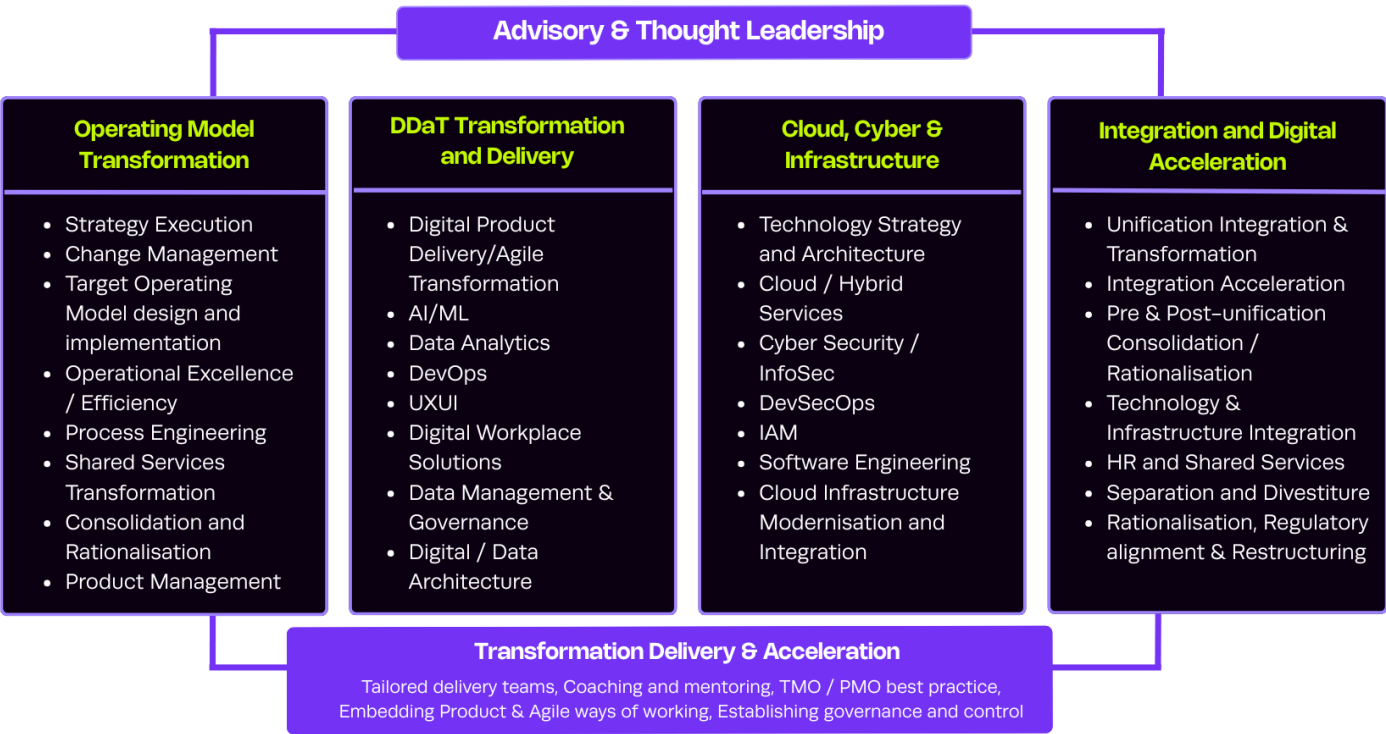

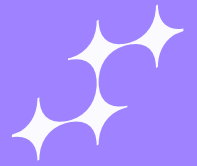

Stellarmann Services Overview

Our breadth of capability across technology and business transformation enables us to build long-term partnerships and support customers in achieving strategic outcomes, whether you need targeted expertise for a critical workstream or end-to-end delivery across a complex programme. We help organisations lean on exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Services are designed to accelerate progress while minimising unnecessary complexity: we mobilise quickly (often within 10–15 working days) embed as “one team” with client and supplier stakeholders and transfer knowledge so capability remains with your organisation. Every engagement involves a shared-risk commercial approach, anchored to agreed deliverables and acceptance criteria, supported by dedicated Engagement Delivery Management to provide delivery assurance, governance and clear reporting.

We do the hard yards of delivery alongside you. Bringing clarity, momentum and execution to every stage of the journey.
