Cloud Transformation and Migration

Introduction to Stellarmann

Bespoke built, expert led, delivery driven

Stellarmann is a specialist technology and business transformation consultancy, supporting public and private sector organisations to deliver complex change with confidence.

We launched in 2020 to help clients access exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Since then, we've supported multi-million-pound programmes for major government departments and organisations, including HMRC and The Crown Estate, by building and leading high-performing outcome-focused teams matched to each engagement.

Our shared-risk commercial approach keeps delivery anchored to agreed outcomes and measurable progress, while our Engagement Delivery Management team provides hands-on oversight shaping robust Statements of Work, maintaining alignment to deliverables and acceptance criteria and reducing the operational burden on client-side leaders.

Cloud Transformation and Migration

Service Description

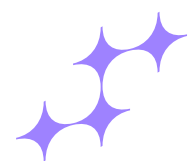

Moving to cloud is not just a technical exercise. Programmes stall when there is no clear inventory, sequencing is unrealistic, or cutovers are run without proper readiness. Teams also need to manage cost and operational impact, not just move workloads.

Stellarmann delivers practical cloud transformation and migration support from assessment through cutover. We start with migration discovery: application and data inventories, dependencies, risks and constraints. We define migration approaches and build a realistic wave plan based on complexity, value and readiness.

We put in place repeatable runbooks and a migration rhythm, coordinating teams and suppliers so responsibilities are clear. We right-size services and data as we migrate to avoid carrying waste into the cloud. We also ensure security and access controls are configured correctly, and that evidence is available for go-live decisions.

For cutovers, we plan rollback and recovery, run readiness checks and support the transition into operations, including hypercare where needed. We leave behind runbooks, documentation and measures so teams can run the platform confidently. The outcome is smoother migrations, predictable progress and services that are ready to operate without unnecessary complexity.

We leave behind clear documentation, ownership and measures so the approach is sustained after the engagement.

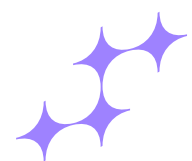

Features

- ✦ Applications and data assessed to shape migration scope
- ✦ Inventories and dependency views created to support planning
- ✦ Migration waves and sequencing defined based on readiness
- ✦ Repeatable runbooks and migration routines established
- ✦ Services and data right-sized to reduce cloud waste
- ✦ Cutover, rollback and recovery planned to minimise disruption
- ✦ Operational readiness checks completed before go-live
- ✦ Security and access controls configured for migrated services
- ✦ Teams and suppliers coordinated to maintain momentum
- ✦ Handover and hypercare provided to stabilise operations

Benefits

- ✦ Disruption reduced through planned cutovers and readiness
- ✦ Cutovers become more predictable and controlled
- ✦ Costs reduced through right-sizing during migration
- ✦ Security strengthened through consistent controls
- ✦ Throughput increased with repeatable runbooks and routines
- ✦ Go-live decisions strengthened with clear evidence
- ✦ Operations better prepared to run cloud services
- ✦ Technical debt reduced by removing waste and duplication
- ✦ Reliability improved through stronger patterns and controls
- ✦ Run and support made sustainable post-engagement

How this enables better outcomes

Cloud transformation sits alongside architecture, engineering, testing, governance and change. This service provides the structured migration approach and readiness needed to move safely, reduce disruption and establish sustainable cloud operations without unnecessary complexity.

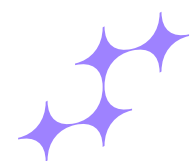

Common triggers

- ✦ Migration plans exist but are not realistic
- ✦ Inventories and dependencies are incomplete
- ✦ Cutover readiness and rollback plans are weak
- ✦ Cost control and right sizing are needed
- ✦ Operations needed clearer handover and runbooks

Service Constraints

Requires access to inventories, environments and relevant credentials. Major re-architecture and product rebuild are out of scope unless separately commissioned.

Remote-first; onsite cutover support by agreement.

Engaging Stellarmann

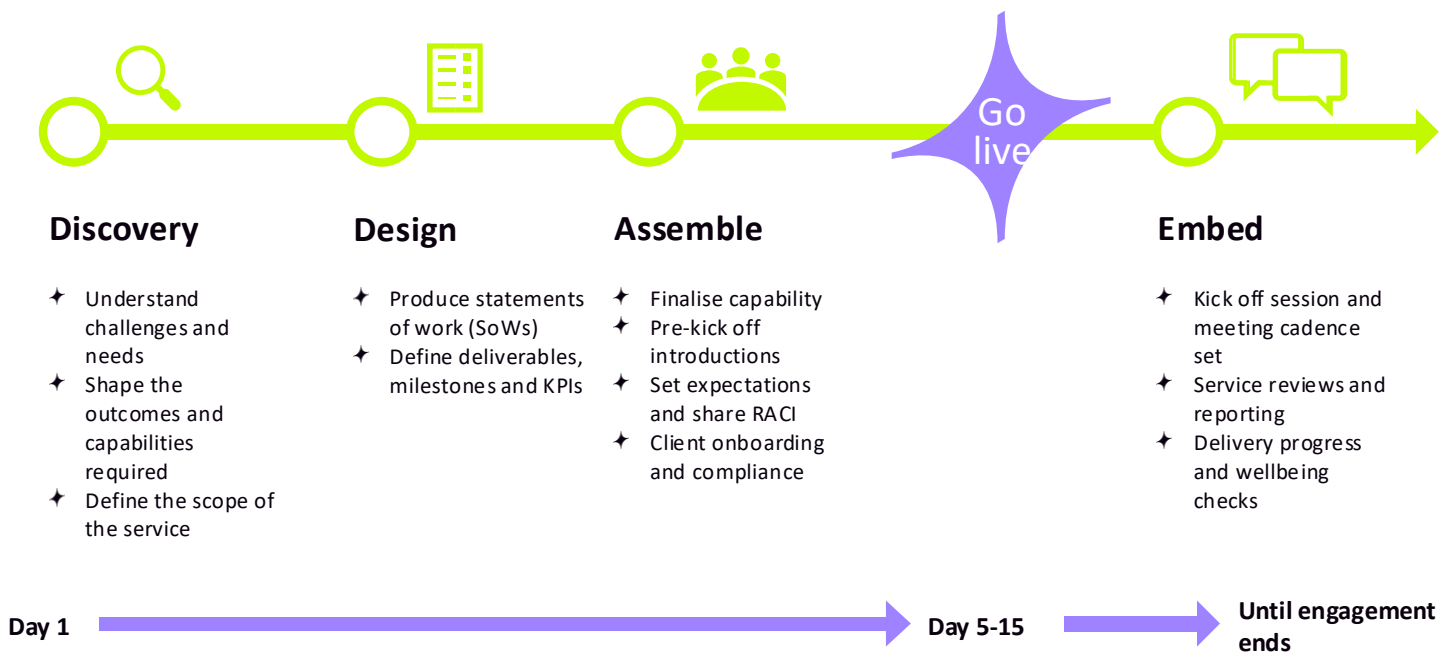

Ordering

Our services can be engaged inline with the G-Cloud 15 framework call off terms. Please get in touch initially by emailing gcloud@stellarmann.com

Service Delivery

We assign each of our clients a dedicated, free of charge engagement delivery manager who will be responsible for shaping the services, outcome and deliverables as well as for ensuring the quality-of-service delivery.

We will guide you through our comprehensive four stage service delivery process that takes our buyers from initial discovery to the end of the engagement.

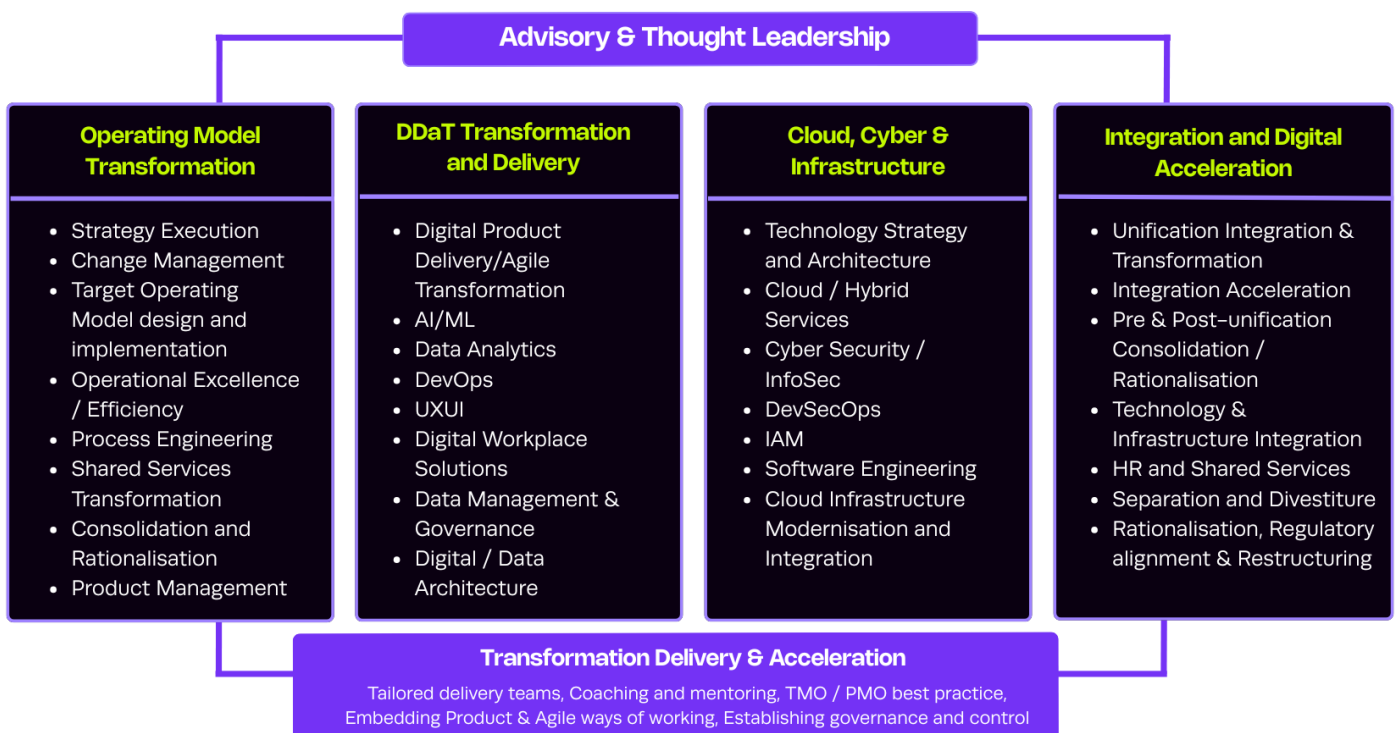

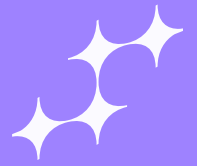

Stellarmann Services Overview

Our breadth of capability across technology and business transformation enables us to build long-term partnerships and support customers in achieving strategic outcomes, whether you need targeted expertise for a critical workstream or end-to-end delivery across a complex programme. We help organisations lean on exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Services are designed to accelerate progress while minimising unnecessary complexity: we mobilise quickly (often within 10–15 working days) embed as “one team” with client and supplier stakeholders and transfer knowledge so capability remains with your organisation. Every engagement involves a shared-risk commercial approach, anchored to agreed deliverables and acceptance criteria, supported by dedicated Engagement Delivery Management to provide delivery assurance, governance and clear reporting.

We do the hard yards of delivery alongside you. Bringing clarity, momentum and execution to every stage of the journey.
