Application Rationalisation

Introduction to Stellarmann

Bespoke built, expert led, delivery driven

Stellarmann is a specialist technology and business transformation consultancy, supporting public and private sector organisations to deliver complex change with confidence.

We launched in 2020 to help clients access exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Since then, we've supported multi-million-pound programmes for major government departments and organisations, including HMRC and The Crown Estate, by building and leading high-performing outcome-focused teams matched to each engagement.

Our shared-risk commercial approach keeps delivery anchored to agreed outcomes and measurable progress, while our Engagement Delivery Management team provides hands-on oversight shaping robust Statements of Work, maintaining alignment to deliverables and acceptance criteria and reducing the operational burden on client-side leaders.

Application Rationalisation

Service Description

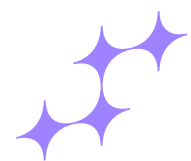

Large application estates often contain duplication, unused services and fragile legacy components. This increases cost, slows change and creates security and resilience risk. Rationalisation provides a clear path to simplify the estate while protecting service continuity.

Stellarmann starts by building an evidence based view of the estate: inventory, ownership, usage, cost, technical debt, risk and dependencies. We work with stakeholders to confirm business criticality and the operational impact of change.

We support decision making using clear criteria. For each application we recommend retire, retain, replace or modernise, with the rationale and trade offs documented. We map dependencies and define sequencing so changes can be delivered safely.

Outputs include a rationalisation roadmap, benefits/savings model and transition plans covering cutover, data considerations, support impact and risks. We provide decision packs so governance forums can approve quickly. The outcome is a simpler estate with clearer ownership, lower cost and reduced risk without unnecessary complexity.

We leave behind documentation and clear ownership so the approach is sustained after the engagement.

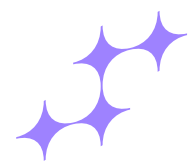

Features

- ✦ Inventory created with ownership, usage and key risks
- ✦ Duplication and complexity drivers identified across the estate
- ✦ Retire, retain, replace or modernise decisions recommended
- ✦ Technical debt, security and resilience risk assessed
- ✦ Criticality and dependencies mapped to protect continuity
- ✦ Target-state options defined with a sequenced roadmap
- ✦ Benefits and savings modelled with clear assumptions
- ✦ Transitions and cutovers planned with rollback options
- ✦ Stakeholders and suppliers coordinated around decisions
- ✦ Decision packs produced to support governance approvals

Benefits

- ✦ Fewer systems reduce handoffs and change overhead
- ✦ Unneeded applications and capacity removed or right sized
- ✦ Sequencing focuses effort where it delivers most value
- ✦ Legacy risk made visible and addressed deliberately
- ✦ Simpler estates become easier to support and recover
- ✦ Duplication removed through evidence-based decisions
- ✦ Costs, risks and benefits support clearer choices
- ✦ Cutover and support impacts planned upfront
- ✦ Decisions and assumptions recorded for assurance
- ✦ The organisation can maintain the approach after handover

How this enables better outcomes

Application Rationalisation supports cloud, data and digital delivery by simplifying what needs to be run and changed. It connects to governance, architecture and change by creating clear decisions, sequencing and ownership helping transformation land without unnecessary complexity.

Common triggers

- ✦ Application costs are rising and value is unclear
- ✦ Duplication and legacy risk slow down change
- ✦ Cloud migration needs a clear application plan
- ✦ Security or resilience findings require action
- ✦ Leaders need a prioritised roadmap and savings view

Service Constraints

Requires access to application inventories, usage data, contracts/licences and key stakeholders. Build, refactoring, licensing changes and contract renegotiations are out of scope unless separately commissioned.

Remote-first; onsite workshops by agreement.

Engaging Stellarmann

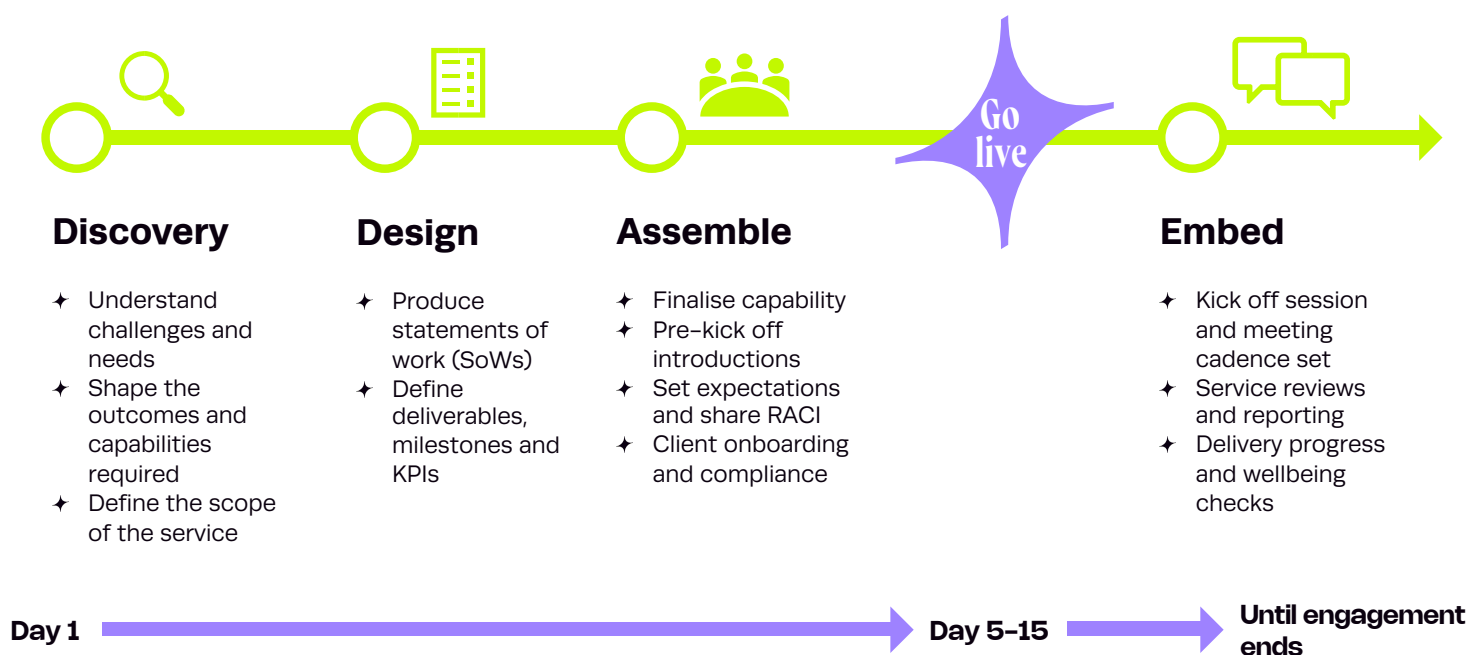

Ordering

Our services can be engaged inline with the G-Cloud 15 framework call off terms. Please get in touch initially by emailing gcloud@stellarmann.com

Service Delivery

We assign each of our clients a dedicated, free of charge engagement delivery manager who will be responsible for shaping the services, outcome and deliverables as well as for ensuring the quality-of-service delivery.

We will guide you through our comprehensive four stage service delivery process that takes our buyers from initial discovery to the end of the engagement.

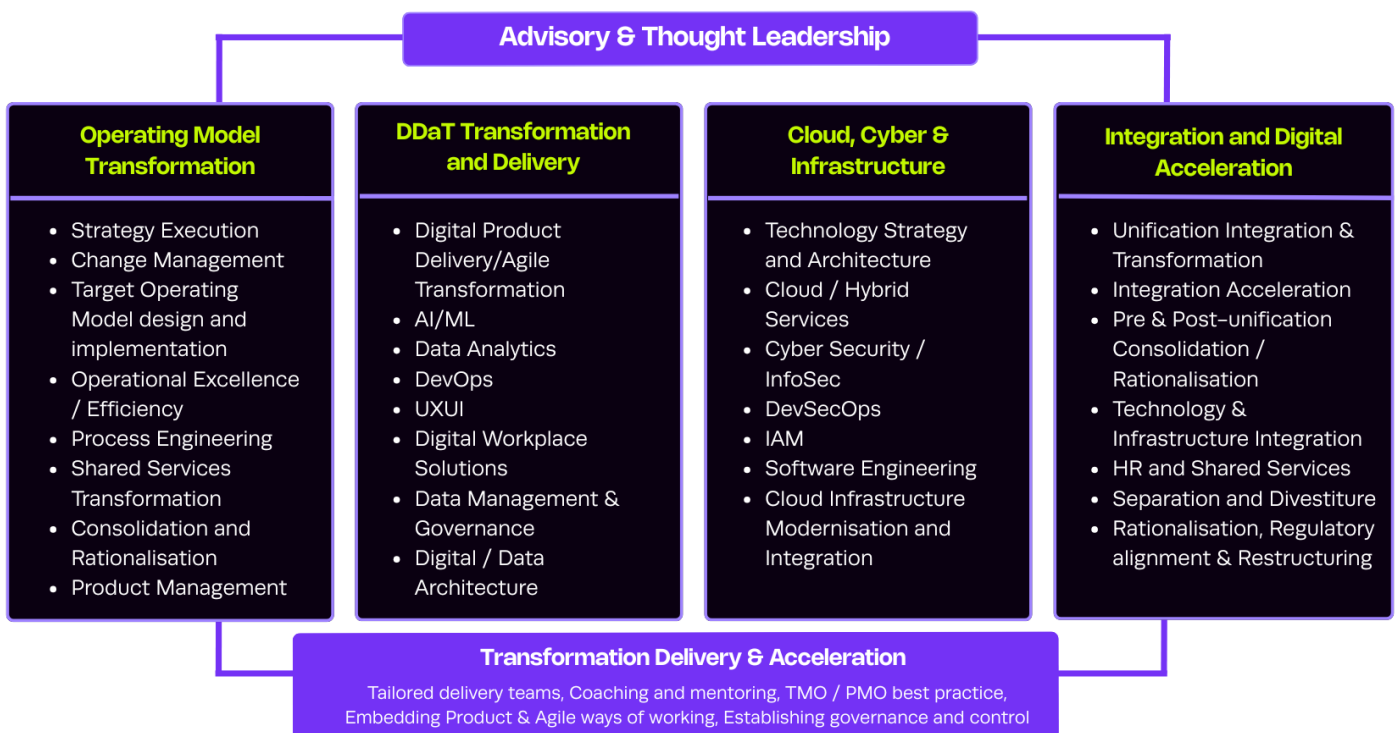

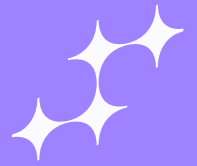

Stellarmann Services Overview

Our breadth of capability across technology and business transformation enables us to build long-term partnerships and support customers in achieving strategic outcomes, whether you need targeted expertise for a critical workstream or end-to-end delivery across a complex programme. We help organisations lean on exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Services are designed to accelerate progress while minimising unnecessary complexity: we mobilise quickly (often within 10–15 working days) embed as “one team” with client and supplier stakeholders and transfer knowledge so capability remains with your organisation. Every engagement involves a shared-risk commercial approach, anchored to agreed deliverables and acceptance criteria, supported by dedicated Engagement Delivery Management to provide delivery assurance, governance and clear reporting.

We do the hard yards of delivery alongside you. Bringing clarity, momentum and execution to every stage of the journey.
