## Data Optimisation

## Introduction to Stellarmann

**Bespoke built, expert led, delivery driven**

**Stellarmann is a specialist technology and business transformation consultancy, supporting public and private sector organisations to deliver complex change with confidence.**

We launched in 2020 to help clients access exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Since then, we've supported multi-million-pound programmes for major government departments and organisations, including HMRC and The Crown Estate, by building and leading high-performing outcome-focused teams matched to each engagement.

Our shared-risk commercial approach keeps delivery anchored to agreed outcomes and measurable progress, while our Engagement Delivery Management team provides hands-on oversight shaping robust Statements of Work, maintaining alignment to deliverables and acceptance criteria and reducing the operational burden on client-side leaders.

## Data Optimisation

### Service Description

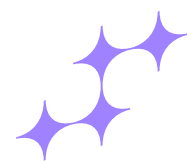

Data estates degrade over time: duplicate datasets, inconsistent definitions, and complex transformations that few people understand. This slows reporting, increases cost, and makes it hard to trust numbers.

Stellarmann improves the usability and performance of your data by optimising structures and flows. We start by reviewing the most important datasets, models and reporting journeys. We identify duplication, inconsistent definitions, transformation hotspots and quality issues that create rework or user confusion.

We then simplify and optimise. That can include redesigning models for clearer meaning, rationalising datasets, tuning queries and reducing transformation steps. We align metrics and definitions so reporting is consistent across teams and tools. Where lineage is unclear, we document data flows and decisions so teams can see where numbers come from and what they mean.

We also embed practical validation checks to prevent quality issues recurring, and we provide guidance for semantic layers and reporting structures so future changes remain manageable. We leave behind documentation and handover packs so teams can sustain the improvements. The outcome is faster insight, clearer metrics and data that teams can reuse with confidence without unnecessary complexity.

We leave behind clear documentation, ownership and measures so the approach is sustained after the engagement.

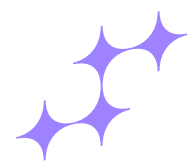

### Features

- ✦ Data model review and improved redesign
- ✦ Pipeline and transformation optimisation for efficiency
- ✦ Metric and definition alignment for consistency
- ✦ Data lineage and documentation for transparency
- ✦ Duplication and waste identification and removal
- ✦ Query tuning for faster performance
- ✦ Dataset rationalisation reducing complexity
- ✦ Quality checks and validation improving reliability
- ✦ Reporting and semantic layer design guidance
- ✦ Knowledge transfer and operational handover

### Benefits

- ✦ Faster, smoother reporting performance
- ✦ More consistent and trusted metrics
- ✦ Improved data reuse across teams
- ✦ Reduced duplication and inefficiency
- ✦ Lower rework and wasted effort
- ✦ Clearer lineage for better understanding
- ✦ Better overall data quality
- ✦ Simpler easier maintenance
- ✦ Lower operational and delivery risk
- ✦ Higher user confidence in data

### How this enables better outcomes

Data Optimisation improves the day-to-day usability of data and reporting. It complements data strategy, platform modernisation and governance by making data assets simpler, clearer and faster supporting transformation without unnecessary complexity.

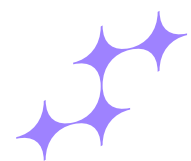

#### Common triggers

- ✦ Reporting is slow and inconsistent across teams
- ✦ Definitions differ and cause debate over numbers
- ✦ Duplicate datasets increase cost and confusion
- ✦ Lineage is unclear and hard to explain
- ✦ Teams need simpler models and pipelines

### Service Constraints

Requires access to data models, pipelines, queries and reporting artefacts. Platform replacement and tooling procurement are out of scope unless separately commissioned.

Remote-first; onsite workshops by agreement.

## Engaging Stellarmann

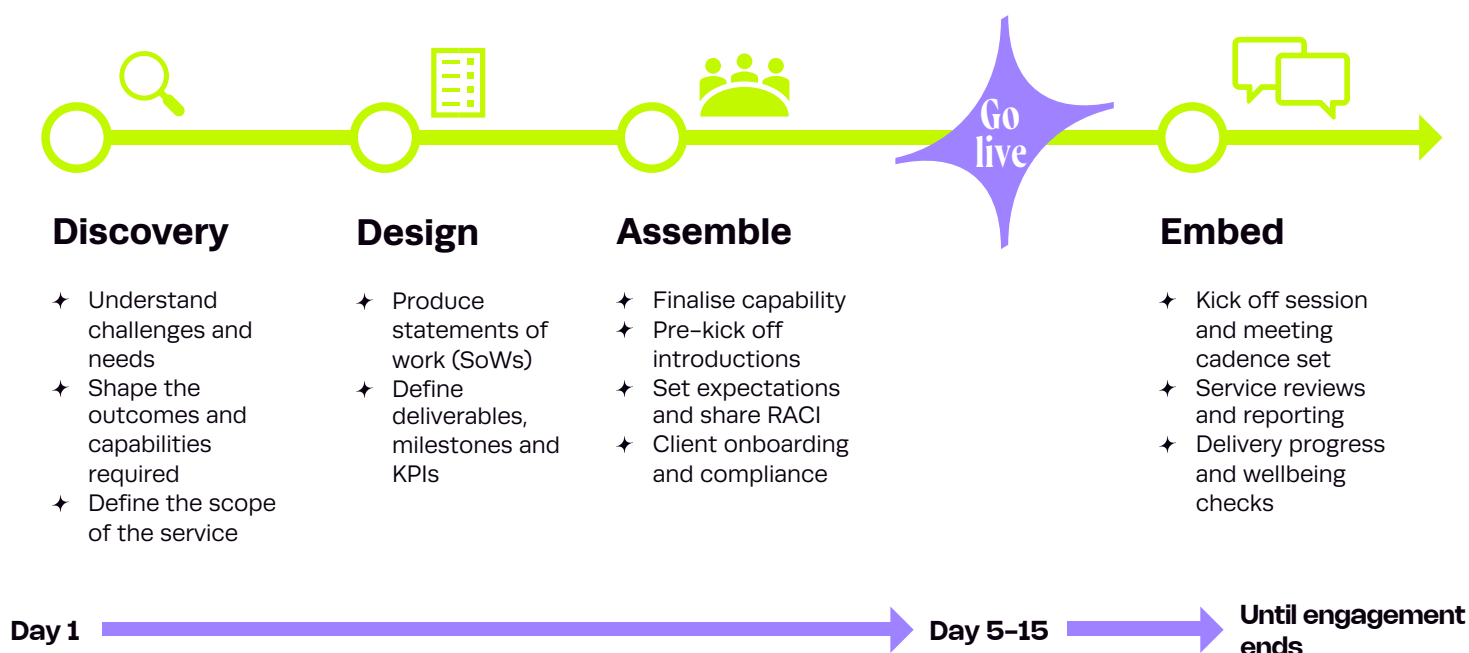

### Ordering

Our services can be engaged inline with the G-Cloud 15 framework call off terms. Please get in touch initially by emailing [gcloud@stellarmann.com](mailto:gcloud@stellarmann.com)

### Service Delivery

We assign each of our clients a dedicated, free of charge engagement delivery manager who will be responsible for shaping the services, outcome and deliverables as well as for ensuring the quality-of-service delivery.

We will guide you through our comprehensive four stage service delivery process that takes our buyers from initial discovery to the end of the engagement.

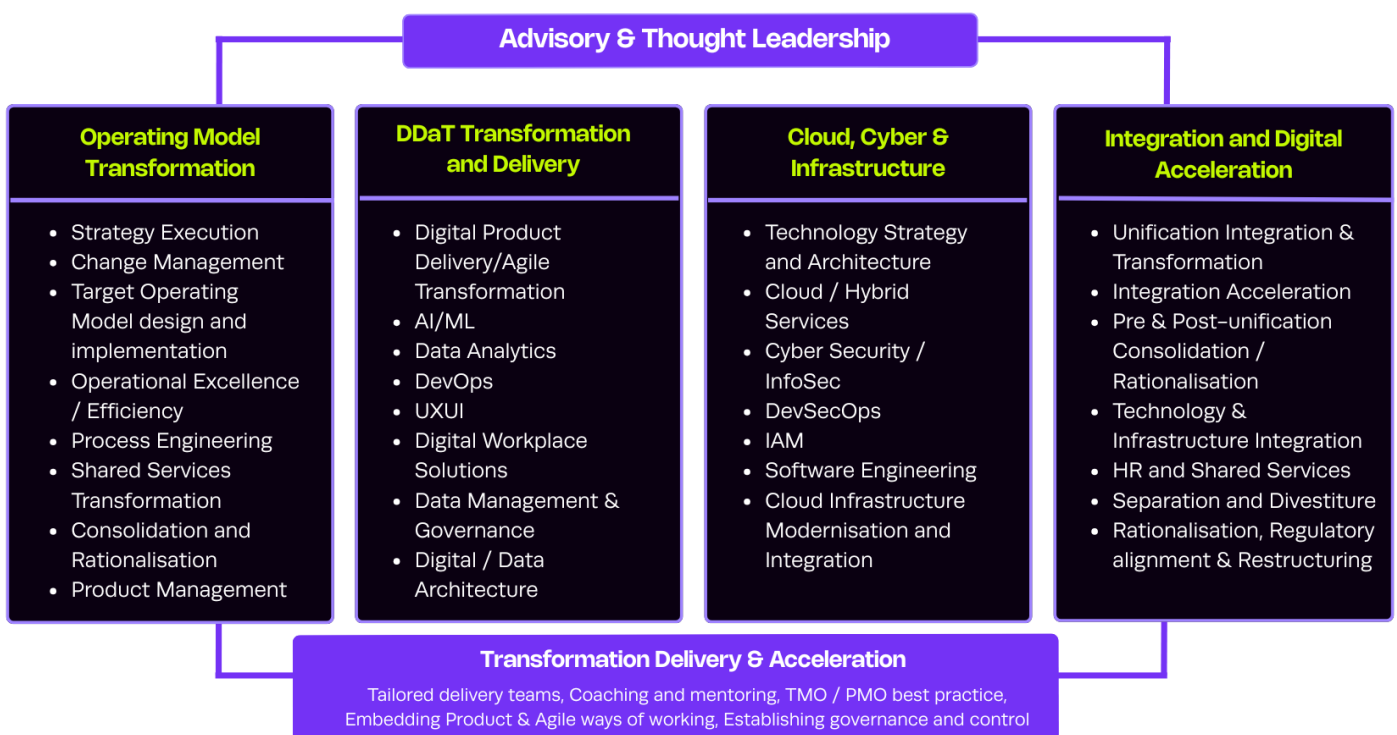

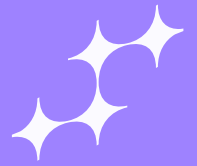

## Stellarmann Services Overview

Our breadth of capability across technology and business transformation enables us to build long-term partnerships and support customers in achieving strategic outcomes, whether you need targeted expertise for a critical workstream or end-to-end delivery across a complex programme. We help organisations lean on exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Services are designed to accelerate progress while minimising unnecessary complexity: we mobilise quickly (often within 10–15 working days) embed as “one team” with client and supplier stakeholders and transfer knowledge so capability remains with your organisation. Every engagement involves a shared-risk commercial approach, anchored to agreed deliverables and acceptance criteria, supported by dedicated Engagement Delivery Management to provide delivery assurance, governance and clear reporting.

We do the hard yards of delivery alongside you. Bringing clarity, momentum and execution to every stage of the journey.
