Cyber Security and Zero Trust

Introduction to Stellarmann

Bespoke built, expert led, delivery driven

Stellarmann is a specialist technology and business transformation consultancy, supporting public and private sector organisations to deliver complex change with confidence.

We launched in 2020 to help clients access exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Since then, we've supported multi-million-pound programmes for major government departments and organisations, including HMRC and The Crown Estate, by building and leading high-performing outcome-focused teams matched to each engagement.

Our shared-risk commercial approach keeps delivery anchored to agreed outcomes and measurable progress, while our Engagement Delivery Management team provides hands-on oversight shaping robust Statements of Work, maintaining alignment to deliverables and acceptance criteria and reducing the operational burden on client-side leaders.

Cyber Security and Zero Trust

Service Description

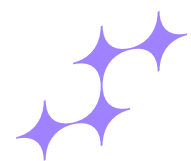

Security programmes stall when strategy is disconnected from delivery reality or when controls are defined but not embedded. Teams need workable patterns, clear ownership and evidence that supports approvals, audits and incident response.

Stellarmann delivers pragmatic cyber security and zero trust support. We baseline risk and current controls across identity, devices, networks, applications and data. We identify gaps that create exposure or slow delivery, then prioritise actions based on risk and operational impact.

We define zero trust patterns that teams can implement: identity hardening, segmentation approaches, policy baselines and monitoring expectations. We design governance cadence and decision routes so approvals are timely and consistent, and we align supplier controls where third parties are involved.

We create evidence packs and dashboards that show control status and support audits and reviews. We improve incident readiness through practical response expectations and logging requirements. The outcome is reduced risk, faster approvals and security controls that work day to day without unnecessary complexity.

We leave behind documentation and clear ownership so the approach is sustained after the engagement.

Features

- ✦ Security strategy and roadmap defined with clear priorities
- ✦ Risks and controls baselined with documented gaps
- ✦ Zero Trust patterns designed for practical implementation
- ✦ Identity controls hardened with consistent policy baselines
- ✦ Segmentation guidance provided to reduce blast radius
- ✦ Threat modelling run to improve detection and readiness
- ✦ Dashboards built for continuous security control visibility
- ✦ Governance cadence and approval routes established
- ✦ Supplier security evidence aligned to expectations
- ✦ Audit evidence and security handover documentation produced

Benefits

- ✦ Controls and monitoring reduce overall security risk
- ✦ Baselines and patterns speed governance approvals
- ✦ Logging and response expectations improve readiness
- ✦ Accountabilities clarified across teams and suppliers
- ✦ Evidence packs simplify audits and compliance
- ✦ Standard patterns reduce variation and control gaps
- ✦ Suppliers aligned to consistent security controls
- ✦ Dashboards improve visibility of security posture
- ✦ Reduced exposure lowers breach likelihood
- ✦ Governance routines sustained after handover

How this enables better outcomes

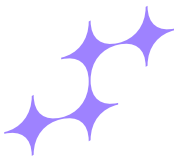

Cyber security and zero-trust supports cloud, data and digital delivery by providing workable control baselines and governance. It links with IAM, architecture and DevOps so security is embedded into delivery without unnecessary complexity.

Common triggers
✦ Access risk is high or poorly controlled
✦ Onboarding and role changes are slow and manual
✦ Privileged access lacks clear governance
✦ Audit evidence for access controls is weak
✦ Cloud adoption needs consistent identity patterns

Service Constraints

Pen testing and formal certification are out of scope unless separately commissioned. Requires access to policies, environments, logs and SMEs.

Remote-first delivery; onsite workshops by agreement.

Engaging Stellarmann

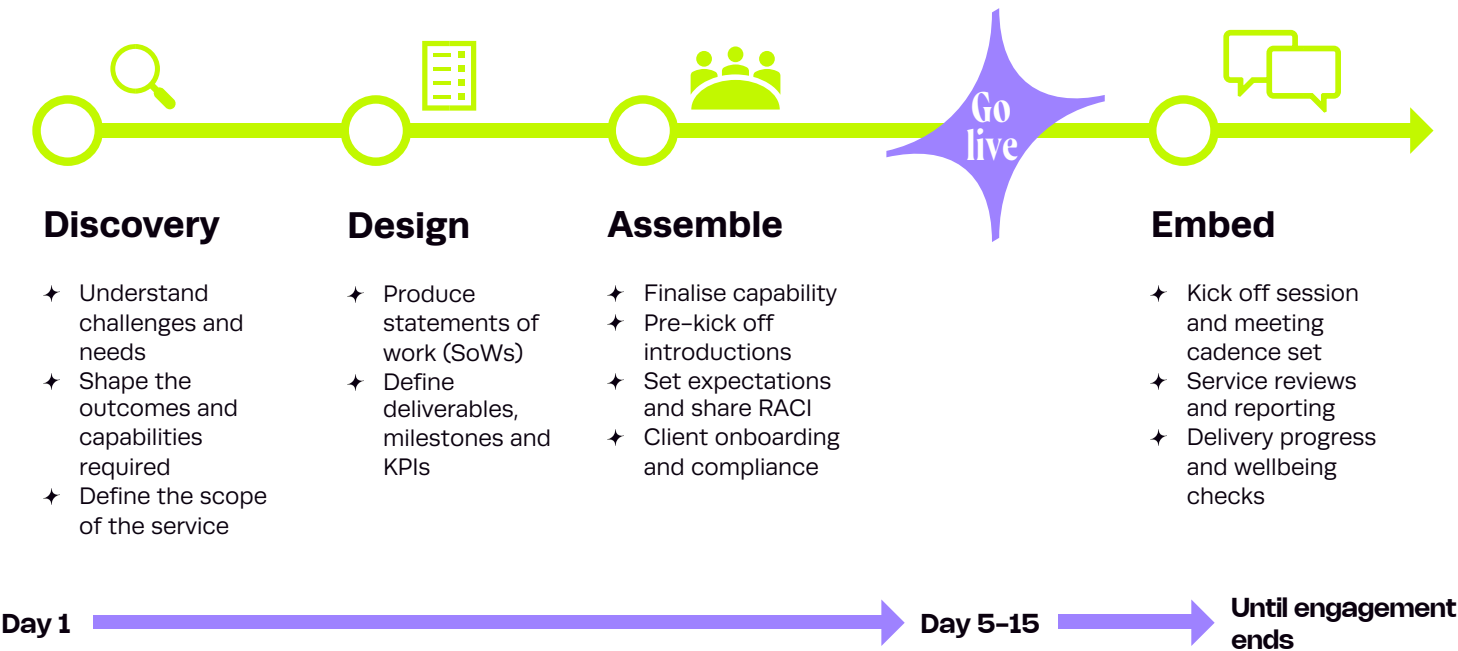

Ordering

Our services can be engaged inline with the G-Cloud 15 framework call off terms. Please get in touch initially by emailing gcloud@stellarmann.com

Service Delivery

We assign each of our clients a dedicated, free of charge engagement delivery manager who will be responsible for shaping the services, outcome and deliverables as well as for ensuring the quality-of-service delivery.

We will guide you through our comprehensive four stage service delivery process that takes our buyers from initial discovery to the end of the engagement.

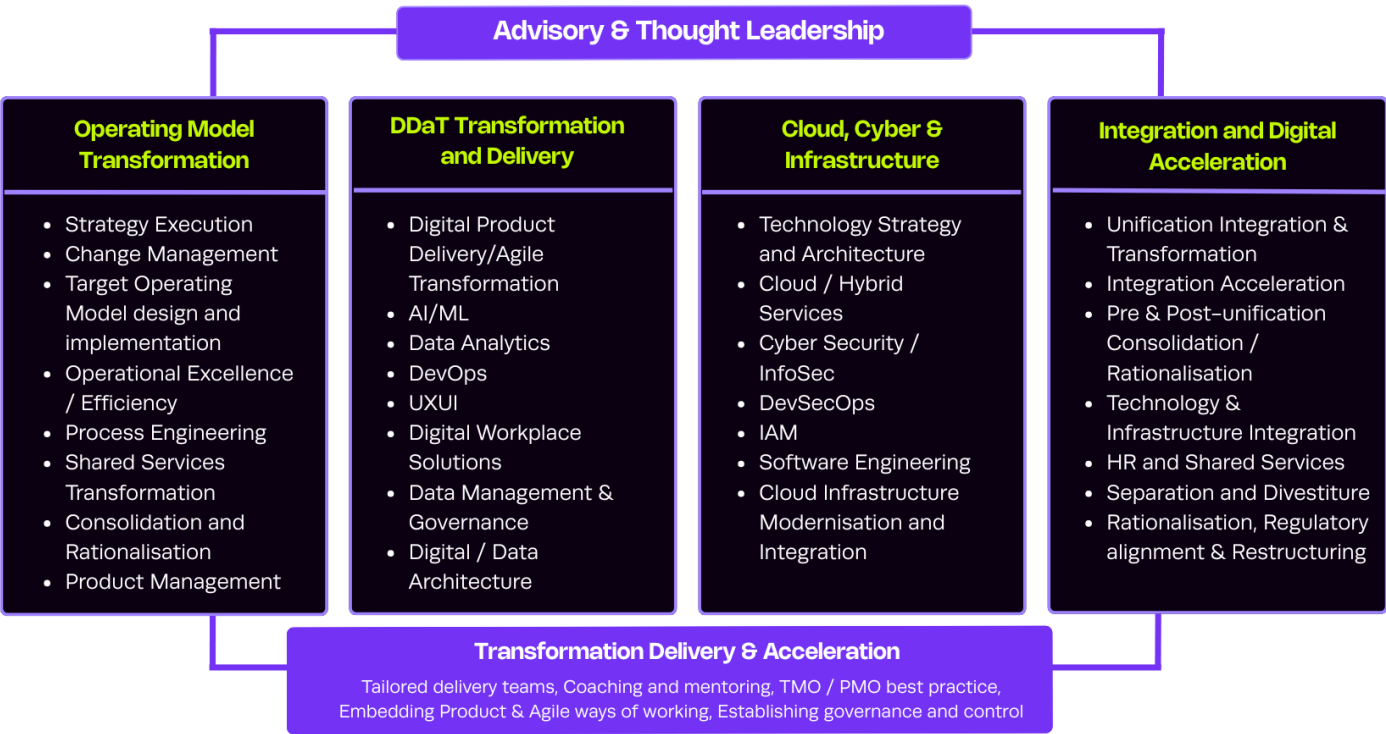

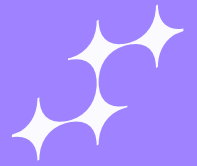

Stellarmann Services Overview

Our breadth of capability across technology and business transformation enables us to build long-term partnerships and support customers in achieving strategic outcomes, whether you need targeted expertise for a critical workstream or end-to-end delivery across a complex programme. We help organisations lean on exceptional expertise while putting stronger accountability behind delivery, supported by clear governance in a rapidly evolving delivery landscape.

Services are designed to accelerate progress while minimising unnecessary complexity: we mobilise quickly (often within 10–15 working days) embed as “one team” with client and supplier stakeholders and transfer knowledge so capability remains with your organisation. Every engagement involves a shared-risk commercial approach, anchored to agreed deliverables and acceptance criteria, supported by dedicated Engagement Delivery Management to provide delivery assurance, governance and clear reporting.

We do the hard yards of delivery alongside you. Bringing clarity, momentum and execution to every stage of the journey.
