PERFORMPARTNERS

A professional services consultancy
& strategic partner that works for you.

What We Do

Perform Partners is an award-winning professional services consultancy, founded with a clear mission: to help organisations deliver technical and business change.

Our teams deliver results. As experts in business and technical change, we provide the capability organisations need, when they need it. Whether shaping transformation strategy or supporting hands-on delivery, we strengthen internal capability and help make change happen across public sector and regulated environments.

We deploy specialist teams experienced in data centre optimisation and exits to both public and private cloud platforms, supporting organisations to plan and deliver secure, compliant cloud transformation.

Working with us means partnering with a consultancy committed to practical delivery, clear governance and measurable outcomes.

A Migration and Modernisation Service

Migration Service

This service is suitable for organisations that are ready to modernise and/or migrate applications, data, and platforms into cloud environments following planning or assessment.

It supports controlled delivery where security, continuity, and governance are critical.

This service enables:

- Secure, structured cloud migration delivery
- Reduced risk during complex migration activity
- Clear accountability and operational control

The Migration Service enables organisations to move from cloud strategy into execution.

Perform Partners manage cloud set-up and migration by organising data, designing information structures, and coordinating mobilisation. We plan communication, optimise services, and apply strong project governance throughout delivery.

By combining technical expertise with clear management and engagement, we ensure smooth migration, controlled delivery, and successful adoption of cloud services.

Service Features

Structured, controlled delivery of cloud migration from mobilisation to go-live.

Secure & Controlled Migration

Secure cloud landing zone setup and configuration

Cloud security configuration and hardening

Hybrid and multi-cloud connectivity enablement

Migration Execution & Automation

Automated infrastructure provisioning using Infrastructure-as-Code

Application migration execution across cloud environments

Data migration, validation, modernisation and reconciliation

Readiness, Cutover & Optimisation

Testing, cutover, and go-live support

Operational readiness, documentation, and handover

DevOps tooling and CI/CD pipeline setup

Post-migration performance and cost control

Service Benefits

Clear outcomes that reduce risk and accelerate value during cloud migration.

Reduced Risk &
Controlled Delivery

Reduced downtime and
migration risk

Predictable, stable application
go-lives

Continuous business operations
during migration

Speed, Automation &
Delivery Confidence

Faster transition from plan to
production

Lower operational effort through
automation

Faster release cycles and
innovation

Secure, Scalable &
Sustainable Outcomes

Secure, compliant cloud
environments from day one

Improved performance, scalability,
and reliability

Stronger internal team capability

Faster realisation of cloud benefits

How the Migration Service is Delivered

Mobilisation & Planning

- Confirm scope, priorities, success criteria
- Finalise migration waves, dependencies, and cutover approach
- Establish governance, controls, and communications

Build & Prepare

- Landing zone build and security hardening
- Connectivity, automation, and tooling setup
- Environment readiness and validation

Migrate & Cutover

- Application and data migration execution
- Testing, cutover, and go-live support
- Controlled releases with minimal disruption

Stabilise & Optimise

- Post-migration validation and support
- Performance and cost optimisation
- Documentation, handover, and operational readiness

Migration Outputs

Practical outputs that provide control, assurance, and operational readiness throughout and following migration.

Migration plan and detailed runbooks

Application and data migration execution records

Target cloud architecture and configuration documentation

Security, risk, and compliance evidence

Cutover plans, testing outcomes, and go-live sign-off

Operational documentation and support handover

Performance and cost optimisation findings

Recommendations for stabilisation and optimisation

Security, Compliance & Risk Management

Security, compliance, and risk management are embedded throughout migration delivery.

Security, compliance and risk management are integral to how Perform Partners deliver the Migration Service.

From mobilisation through cutover and stabilisation, we embed security controls, regulatory requirements and risk management into delivery activities, not as separate workstreams.

We apply strong governance, assurance and documentation to ensure migrations are secure, controlled and aligned to public sector and regulatory expectations. Risks are identified and managed early, with clear decision points, audit evidence and operational readiness throughout the migration lifecycle.

Delivering Innovation, Efficiency, and Security in Higher Education

The University of Sheffield engaged Perform Partners to modernise its IT infrastructure through a controlled cloud migration, enhancing efficiency, security, and future growth capacity.

Learn how our team supported a large-scale modernisation programme for higher education, delivering award-winning, cost-effective, secure, and scalable solutions for a future-proof academic environment.

"Perform Partners played a crucial role in our complex transformation journey, providing the technical expertise, Cloud design, engineering, and change management support necessary for success. Overcoming the significant risk and complexity of our IT infrastructure roadblock, Perform Partners proved to be the remedy we needed. Their unwavering commitment and drive enabled our internal team to deliver the required solution. Their rigorous and candid approach kept the project on track, ensuring its successful execution. Without Perform Partners' invaluable contributions, we would not have been able to overcome this major challenge and progress towards our goals."

Arthur Clune, CTO at The University of Sheffield

Why work with Perform Partners?

Independent, delivery-focused expertise across complex technology environments.

Choosing Perform Partners means working with an independent consultancy focused on delivering the right outcomes for your organisation; not promoting specific technologies or platforms.

We operate across a broad ecosystem of partners and platforms, allowing us to remain objective and align recommendations to your needs, constraints, and long-term strategy.

Our experience supporting public sector and regulated organisations ensures that delivery decisions and recommendations are grounded in governance, security, and real-world delivery considerations.

This breadth of experience enables us to support informed decision-making, flexibility, and confidence as organisations plan and progress their transformation journeys.
