www.ASSETforSchools.com

This product is based upon the same data that underlies Department for Education (DfE) Analyse School Performance (ASP) service. Access has been granted following satisfaction of the security and usage criteria set out in DfE's ASP Accreditation Route.

ASSET for Schools has been supporting schools across the county since 2006. ASSET for Schools has worked with an experienced Virtual School headteacher to develop PEP for Success. Many Virtual School Headteachers, VS Data Managers, Education Advisors, Social Workers, IROs have made amazing contributions to add more features to suit their needs over the years.

SERVICE OVERVIEW

Our analytics are second to none. We have been using Department for Education data to help schools analyse their performance using pupil attainment and progress data for a long time.

We have a sophisticated suite of analytic tools which you can use to produce a huge variety of reports. These can be pupil level, cohort level or whole school level.

You can quickly and easily compare your Virtual School results with National data or National Looked After data. Want to know how you compare with your statistical neighbours? Easy. Want to know if your BAME cohort is doing as well as any other cohort? Easy.

It is a fully integrated suite of modules designed to make your life easier!

All your data is held in one place, securely in the Cloud. Different modules can easily communicate with each other.

It is extremely easy to use for many different types of user with minimal training. It is intuitive and robust and very secure.

AWARD-WINING SOFTWARE

Exciting News!

We are thrilled to share some exciting news with you!

Stat Solutions Ltd has been recognised as the 99th fastest-growing technology supplier in the UK public sector in the Tussell Tech 200 rankings.

This achievement reflects our commitment to delivering innovative, data-driven solutions that empower the public sector.

Thank you for being part of our journey.

We look forward to continuing to support your success.

SERVICE FEATURES

Navigation around the product is easy and intuitive. Everything starts with the dashboard page.

Reporting functionality is extensive. Reports can easily be generated for individual pupils, small groups or the whole VS cohort. Tables and graphs can be exported and used in, for example, the Virtual School Annual Report.

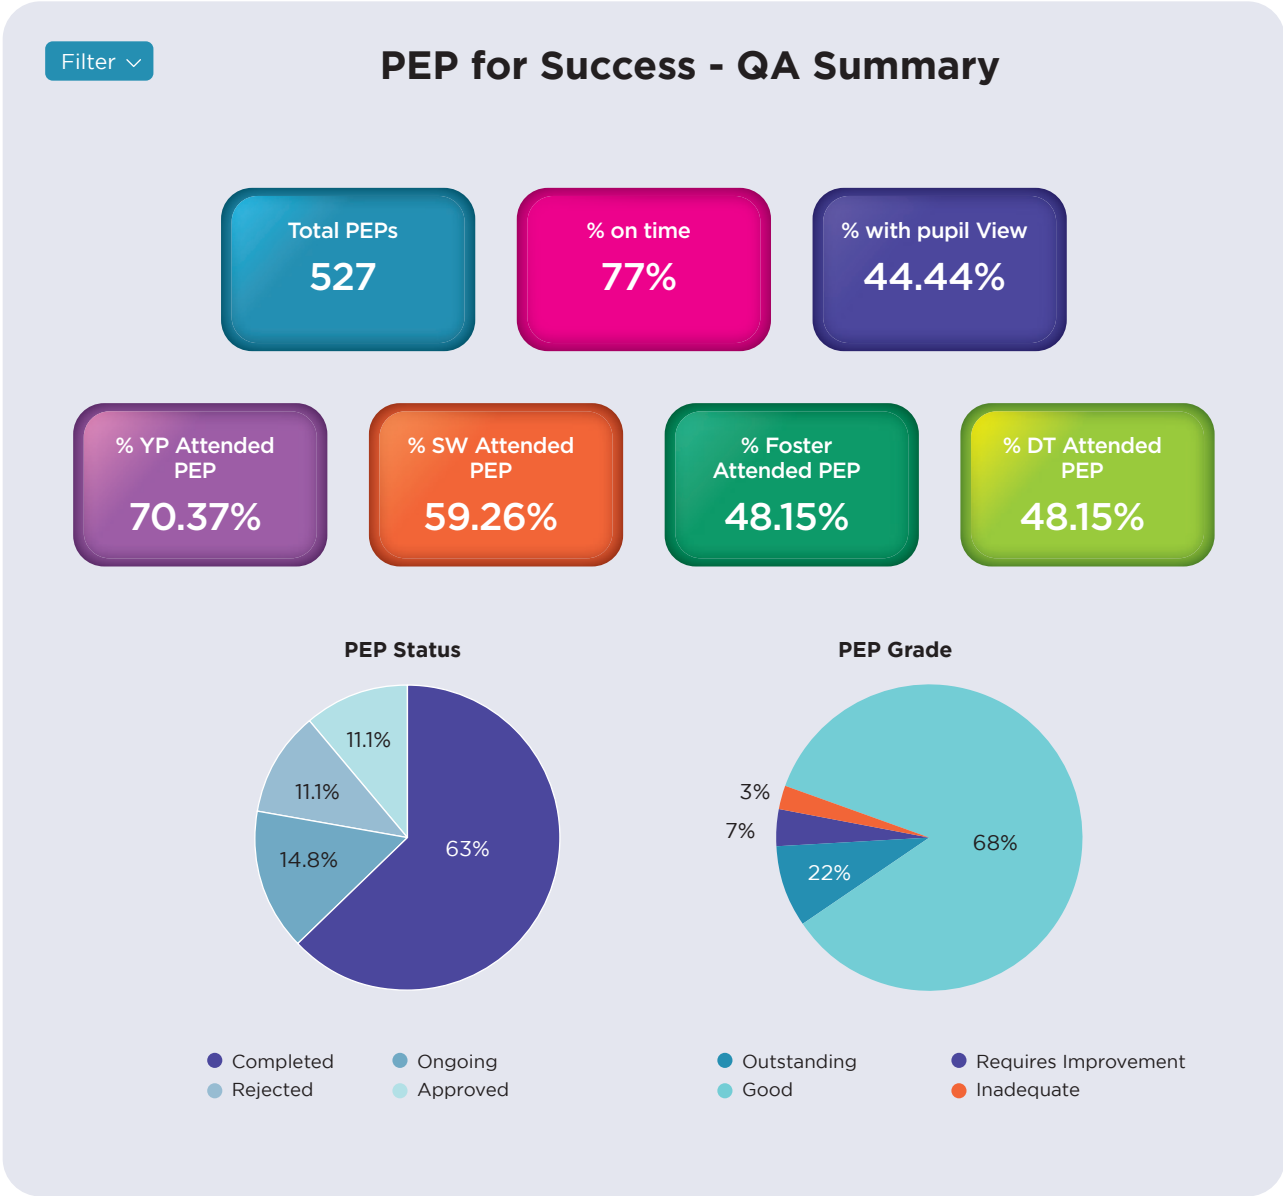

Clients can log in on a variety of devices and still have the full user experience. It works well on tablets, smartphones, laptops and desktop computers.

Accounts with Administrator’s ability to make sections read-only or read-write means the product is accessible yet extremely secure.

Navigation around the product is easy and intuitive. IMS starts with bespoke dashboard page.

There is a one click function.

We offer a fully integrated platform where clients can access the ePEP, attendance monitoring, data analysis and the information management system all in one place.

Why ASSET?

Can easily upload and download many file types including videos for Pupil Voice

Built in and customisable profile types, alerts for a range of users

Bespoke

Easy to learn and to use

Highly secure

Allows simultaneous multiple users

Users only need to interact with 'their' modules so no timewasting.

Annual report against statistical neighbours each year

CLIENT BENEFITS

Client reports improved compliance with higher completion rates and better-quality PEPs.

Simple and straightforward interface and ability to upload and download documents very easily.

ASSET for Virtual Schools is encrypted by our SSL certificate to 256 standard, any data transferred to us can be done securely through our website. The data is also encrypted in transit and in storage, ensure that your data is safe with us.

Accounts with Administrator's ability to make sections read-only or read-write means the product is accessible yet extremely secure.

Navigation around the product is easy and intuitive. Everything starts with the dashboard page.

Reporting functionality is extensive. Reports can easily be generated for individual pupils, small groups or the whole VS cohort. Tables and graphs can be exported and used in, for example, the Virtual School Annual Report.

There is a one click function to show you the attainment flightpath of any individual pupil compared against National data and the pupil's own target.

Clients can log in on a variety of devices and still have the full user experience. It works well on tablets, smartphones, laptops and desktop computers.

We offer a fully integrated platform where clients can access the ePEP, attendance monitoring, data analysis and the information management system all in one place.

DATA SECURITY

The key protocols we have in place for the product and services:

- Email notifications, flag notifications (in ASSET) and phone calls
- Quality Assurance
- Ensuring no names or key details are shared over the phone or via email
- For communication and notifications to identify pupils we use pseudonymisation
- Names and further details are available to view in the secure software only
- Emails only state the type of information available
- Ensuring the person on the line is the right person
- For phone calls, to identify themselves, we use a two-part key (in order to confirm that they are speaking with the right people)
- Policies and Procedures are reviewed and updated at least every 6 months to ensure that the right actions are being taken with regards to safeguarding, data protection, security, complaints, incidents, quality, corrective and preventative action and more.

SECURITY PROTOCOL

Our security protocols for data security include:

- ASSET for Schools website is securely protected by 256 SSL Advanced Encryption Standard
- Background checks on staff who have access to any data
- Annual IT Health Checks, including penetration tests conducted internally and externally
- Data back-ups to our tier 4 secure Data Centres in London and Cardiff
- GDPR data breach, deletion and rectification processes and procedures
- Business Continuity and Disaster Recovery plan tested bi-annually
- Physical and Environmental Security, Privacy, Incident Reporting, Email Acceptable Use, Email Attachments, Confidentiality, Website, Clear Desk, Clear Screen and Password Policies are in place
- CCTV, Outer Building fob key access and monitored concierge desk, Office Pin Code and fob key access and Separate designated and logged fob key access to our server rooms
- BitLocker passcodes on all PC's (Management or IT must log in in each PC before use on a daily basis)
- All users have individual account access and limited access to only suitable files

ACCREDITATIONS

We are pleased to inform you of the below Accreditations and Certifications:

Cyber Essentials Plus Certified

We protect ourselves from common online security threats.

ASP Data Supplier

"This product is based upon the same data that underlies DfE's Analyse School Performance (ASP) service. Access has been granted following satisfaction of the security and usage criteria set out in DfE's ASP Accreditation Route".

ISO 27001 Certified

We are ISO 27001 certified. Our annual audit is conducted by the British Assessment Bureau.

IT Health Check

Several internal and external penetration tests. We had a certified external service provider perform a check on all of our applications and infrastructure to identify risk. We passed with flying colours.

QG GDPR Certified

Our organisation was assessed and certified as meeting the QG-GDPR Management Standards.

We have various accreditations and checks performed to ensure we meet all legislation and security measures within our company and across our systems and software. All data is stored and process in the UK in our SSL website which is ISO 27001 certified, Cyber Essentials Certified, QG GDPR Certified software. ASSET undergoes yearly IT Health Check's (ITHC).
