4.	Complementary Services	6
5.	Copyright.....	7

1. Service Summary

Cloud adoption often moves faster than cloud architecture, especially as teams deploy services and scale environments, with decisions made in the moment leading to design drift. Over time, this creates complexity, hidden risks, cost leakage, and missed opportunities to optimise. Without regular architecture checks, many businesses end up overpaying, under-protecting, or operating with unplanned fragility, all of which can delay transformation or damage trust.

Delivered through collaborative workshops and deep technical insight, we will evaluate your current IT estate, pinpoint risks, inefficiencies and architectural blind spots, before delivering a clear report and action plan, aligned to your goals, optimizing your AWS, Azure & IBM public cloud in the most effective way.

2. Features & Benefits

Simplify Your Cloud Complexity	Our Experts will bring structure and clarity across technical, operational and business layers
Optimise Spend	During this service, we identify where cloud cost is being wasted and make suggestions to align investment with performance and value
Strengthen Compliance	We assess your architecture against industry certified best practices across many vendors to help you reduce risk and improve audit readiness
Clarity Across Your IT Estate	Provide clarity across operational, security, performance, cost and sustainability domains
Take Back Control of Your Environment	Working with our Experts, our reports will identify actionable insights with a prioritised risk report and remediation plan which allows you to enhance architectural resilience, scalability and security

3. Why Choose Digital Space?

Cloud	Digital Space has more than twelve years' experience in providing Cloud solutions as an AWS Advanced Partner, a Microsoft Gold Partner and an IBM Gold Partner. We have our own UK-based private Cloud and therefore able to offer hybrid and multi-Cloud services that meet all needs from basic co-location, through to full public Cloud.
Connectivity	Cloud requires reliable connectivity and Digital Space is able to provide that through its own networking and connectivity business which includes a dedicated national network as well as the ability to provide everything from mobile connectivity to PWAN and SD-WAN solutions.
Security	Digital Space Cloud solutions have security built-in via the use of architectural patterns and technical staff who are Security Cleared but we also have partners who are security experts and can offer everything from Security Operations Centre as a service to ethical hacking and penetration tests.
Managed Service	Digital Space is expert in providing managed services and has held the AWS Managed Service Partner accreditation which involves regular external audits for more than 9 years. We also hold the following accreditations: ISO27001 – Information Security ISO27017 – Cloud Security ISO 20000 – IT Service management ISO14001 – Environmental management ISO9001 – Quality Management Our experience in this area means that we can either run services for you, making use of our automated Cloud monitoring services and Security Cleared experts, or implement services that can be easily managed and then train your team in how to provide that service themselves. Migrating your workloads to AWS allows you to innovate quickly by having compute infrastructure ready as required, enabling you to respond more quickly to shifting business conditions.
Public sector	Digital Space is experienced in working with the public sector including managing critical national infrastructure for central government, deploying artificial intelligence services for the NHS and delivering Cloud migrations for a wide range of organisations. This experience means that we understand your drivers and focus and are better able to supply your needs.
Innovation	In addition to a wide range of infrastructure engineers and architects, we also have developers who create innovative solutions on Cloud platforms.

4. Complementary Services

Business Continuity	Digital Space Backup as a Service Digital Space Disaster Recovery as a Service Digital Space Microsoft 365 native Backup as a Service Digital Space Microsoft Teams Backup as a Service
Communications	Digital Space 8x8 Cloud PBX Digital Space 8x8 Hosted PBX Digital Space 8x8 Meetings Collaboration Digital Space 8x8 Video Conferencing Digital Space 8x8 Voice for Microsoft Teams Digital Space Hosted Mitel Cloud (Flex)
Connectivity	Digital Space Managed SD-WAN Service
Contact Centre	Digital Space 8x8 CCaaS (Contact Centre as a Service) Digital Space 8x8 CPaaS (Contact Platform as a Service) Digital Space 8x8 UCaaS (Unified Communications as a Service) Digital Space 8x8 XCaaS (Experience Communications as a Service) Digital Space Amazon Connect Administrative Extensions Digital Space Cloud Contact Centre (Amazon Connect) Digital Space Cloud Contact Centre Managed Service
Migration	Digital Space Cloud migration Microsoft 365 Discovery Digital Space Microsoft 365 Migration Digital Space Cloud Contact Centre Migration
Platform	Digital Space AWS Managed Service Digital Space Azure Managed Service / Platform Digital Space Cloud Architecture, Design and Build Services Digital Space Cloud Solution Brokerage & Implementation Digital Space FinOps & Cloud Cost Optimisation Digital Space Private Cloud Managed Service Digital Space Well Architected Review
