

Cloud Transformation & Data Migration Services

Secure Modernisation for Legacy Systems & Platforms

Cloud transformation is not only infrastructure migration—it is the modernisation of systems and data to improve agility, resilience, and operational efficiency.

ACS delivers end-to-end cloud migration and transformation services to support organisations in moving workloads and data securely with minimal disruption.

OUR CORE SUPPORT SERVICES

Cloud Transformation Services

- Cloud readiness assessment & migration roadmap
- Target cloud architecture & governance setup
- Application migration planning and execution
- Hybrid and multi-cloud enablement

Data Migration Services

- Data extraction, transformation and load (ETL)
- Migration validation and reconciliation
- Secure data transfer and access controls
- Cutover planning and post-migration support

Advanced technical & specialist support

- Security posture management + monitoring
- IAM controls, encryption and audit logging
- Disaster recovery planning and resilience
- Cloud cost optimisation and performance tuning

Benefits & Value Proposition

- Reduced infrastructure overhead and improved agility
- Improved resilience with better availability and DR readiness
- Strong governance, monitoring and access controls
- Reduced risk migration using phased delivery approach
- Optimised cloud performance and cost management

Tiles

Governance:

Phased migration, controls, measurable delivery milestones

Security & Compliance:

IAM, encryption, audit readiness, GDPR aligned approach

Expertise:

Migration, integration and cloud engineering capabilities

Continuous Improvement:

Cloud optimisation, monitoring and cost controls

Key metrics:

Reduced downtime • improved availability • optimised costs

WHY ORGANISATIONS CHOOSE ACS

- Low-risk migration approach with validation and testing
- Governance-first delivery aligned to compliance standards
- Strong integration capability with cloud modernisation
- Flexible delivery model UK / Europe / India

OUR DELIVERY MODEL

- Assess → Plan → Migrate → Validate → Optimise
- Managed support and continuous improvement

INDUSTRIES WE SERVE

Public Sector • Healthcare • Retail • Manufacturing • Logistics • Finance • Technology
