

Revolutionising Electronic Meal Ordering for Catering Services

ACS-Life is a web and mobile-based solution designed to streamline meal production with transparency, nutritional accuracy, and allergen tracking.

Proven Expertise & Commitment

- Over 14 years of experience serving the UK and European public sector through our software house.
- Dedicated to delivering "Food as Medicine" solutions tailored to NHS, HMPS, and other critical institutions.

Comprehensive Digital Meal Management

- **AI-Driven Meal Ordering:** Patients can order meals based on historical data and clinical references through HL7 integration with Electronic Patient Records (EPR).
- **Multilingual Support:** Catering to diverse patient demographics with language accessibility.
- **Companion Meal Ordering:** Enables relatives and caretakers to place orders conveniently.
- **Advance & On-Demand Ordering:** Flexibility to order meals in advance or request additional meals per trust policies.

Enhanced Patient Experience & Transparency

- **Visual Meal Representation:** Patients can view images and details of meals, including nutritional and allergen information.
- **Incident Management System:** Direct patient-to-catering manager incident reporting for swift resolution.
- **Personalized Nutritional Tracking:** Supports patient health by integrating clinical references from EMC (Medicines.org.uk).
- **Nil by Mouth Selection:** Enables dietary restrictions for improved healthcare compliance.

Smart Automation & Efficiency

Real-time inventory control to minimize waste

Automated ERIC data management for compliance

AI-enabled support & security with 24/7 chatbot assistance

ACS-Life is your sustainable, AI-driven, and patient-centric catering solution, ensuring optimal meal planning, seamless operations, and enhanced patient satisfaction across healthcare and institutional settings
