

# Data Compliance Extender for Microsoft Purview - Pricing Document

## Subscription Summary

i-ARM Extender for Microsoft Purview enhances governance by extending retention, classification, archival and protection features to data in Microsoft365 and Azure Cloud. It synchronizes metadata and policies, automates remediation workflows, delivers advanced analytics, and streamlines compliant records lifecycle management, enabling unified, scalable, and defensible data governance across hybrid environments.

**Note:** Refer to Infotechtion listing 'Data & AI Risk Compliance for Microsoft cloud, SaaS and hosted platforms' for coverage beyond Microsoft365 and Azure to non-Microsoft cloud and hosted platforms and applications.

## A. Platform Core (M365 Native)

Designed for Local Authorities, NHS Trusts, and Central Government departments.

| Component                          | Features                                                                                                                                                             | Annual Price (GBP) |
|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| Compliance Core                    | <ul style="list-style-type: none"><li>SharePoint &amp; OneDrive integration;</li><li>Automated Deletion/Disposition;</li><li>NHS/DPA compliance workflows.</li></ul> | £30,500 / year     |
| Inclusive Archiving                | First 5 TB of M365 Data Archiving included to support storage optimization and end of retention archiving to support submission to TNA.                              | FREE               |
| Standard Audit Vault               | Inclusive 10-year retention of data and user activity audit Logs.                                                                                                    | FREE               |
| Excess Archiving                   | Consumption tier for data exceeding 5 TB.                                                                                                                            | £500 / TB / year   |
| Classification and Protection Core | Automated classification of sensitive data, sensitivity labelling, data access compliance and oversharing control.                                                   | £40,000 / year     |

## B. Hybrid Source Add-ons

For organisations requiring governance over the full Microsoft stack and legacy infrastructure. Each connector includes **5 TB of free data processing** for initial discovery and cleanup.

| Source Category     | Supported Platforms                                       | Annual Base Price (GBP) | Processing (after 5TB) |
|---------------------|-----------------------------------------------------------|-------------------------|------------------------|
| Microsoft Messaging | Exchange Online (Mailboxes, Shared Mailboxes, Teams Chat) | £4,500                  | £5 / TB / Month        |
| Azure Data & AI     | Microsoft Fabric, Dataverse, ADLS Gen2                    | £7,500                  | £12 / TB / Month       |

Note: To purchase a hybrid add-on, either Compliance core / Classification and Protection Core modules are a pre-requisite.
