

G-Cloud 15

BRUHATI CLOUD SOFTWARE SERVICES G-CLOUD 15 SERVICE DEFINITION

BRUHATI SOLUTIONS LTD

SHORT SERVICE DESCRIPTION

Bruhati's offering of Cloud Software services offer a comprehensive list of cost-effective cloud solutions to enable Digital Transformation programmes. Bruhati specialise in **Enterprise Architecture** and **AI Governance, and AI Solutions**. We are **Ardoq partners** and have extensive experience with reselling and implementing the Ardoq platform to over 25+ customers. We were awarded Ardoq Services Partner of the year in 2023 and 2024.

- **Bruhati offering of Ardoq – automated, data-driven SaaS for Enterprise Architecture & AI Governance.** Ardoq, a modern tool for EA, helping organisations with change management across their projects, strategies, business processes, applications, infrastructure, capabilities. EA modelling through automated, data-driven approach. Impact assessment, managing change, analysing interdependencies, reliable decision-making, are all easier with Ardoq.

KEY SERVICE FEATURES & BENEFITS

Bruhati offering of Ardoq

- **Features:**
 - **Cloud-native SaaS platform:** Enterprise-ready with robust, secure cloud infrastructure.
 - **Advanced Graph Technology:** Enables clear modelling of systems, dependencies, relationships.
 - **Highly Configurable Metamodels:** Flexible to support evolving organisational needs.
 - **Centralised Data Repository:** Provides a single source of truth.
 - **Dynamic Visualisations:** Real-time, customisable dashboards and diagrams for up-to-date analysis.
 - **Stakeholder Engagement Tools:** Collaboration-focused tooling to involve business and IT.
 - **API Integrations:** Seamlessly integrates with external tools and data sources.
 - **Scenario Modelling:** Assess current versus future states and simulate changes.
 - **Out-of-the-Box Solutions and Templates:** Accelerate time-to-value with pre-configured models.
 - **AI Governance:** AI Lens to model and govern AI-enabled technologies.
- **Benefits:**
 - **Enhanced Collaboration:** Bridges gaps between business and IT, enabling communication.
 - **Accelerated Transformation:** Drives modernisation, eliminates silos, and supports rapid change.
 - **Improved Decision-Making:** Delivers actionable insights, impact analysis, and reporting.
 - **Strategic Alignment:** Helps organisations align IT investments and strategic projects.
 - **Reduced Risk:** Visibility into technology risks, dependencies, and compliance requirements.
 - **Faster Onboarding:** User-friendly interface and intuitive workflow, that supports users.
 - **Operational Efficiency:** Reduce duplication, eliminate manual reporting, streamline architecture.
 - **Data Integrity & Governance:** Maintains models with automated data refresh.
 - **Scalability and Flexibility:** Adapts easily to organisational growth and change.
 - **Unlimited users:** Every stakeholder across business and IT can participate.

ABOUT BRUHATI

Bruhati Solutions Ltd is a boutique UK consultancy that specialises in **Enterprise Architecture, AI Governance** and **AI Solutions**. We bring a wealth of expertise to implement effective Enterprise Architecture and EA tools for our public and private sector customers across EMEA. We are Ardoq partners and have extensive experience with reselling and implementing Ardoq to over 25+ customers. We were awarded Ardoq Services Partner of the year in 2023 and 2024.

We have a portfolio of case studies that showcase our experience in delivering Enterprise Architecture, EA tools and solutions for organisations across many industries. Here are some of the highlights:

- **ICO:** We resold and implemented the Ardoq SaaS platform and provided end user training via G-Cloud.
- **Alzheimer's Society:** We resold the Ardoq SaaS platform license to this charity through G-Cloud.
- **Notting Hill Genesis Housing Association:** We resold the Ardoq SaaS platform license to this charity through G-Cloud.
- **British Army:** We provided EA tool implementation assurance, strategic business process and EA repositories, end to end tooling integration.
- **NHS Blood & Transplant:** We provided digital strategy, EA function implementation, EA tooling introduction, and EA and SA managed service for core national programmes, such as COVID-19.
- **Major UK Mobile operator:** We led the Architecture and Design for Digital Transformation programmes for all the Smart Metering project in the UK. We also designed their most complex Cloud solutions.
- **Major FS&I:** We implemented EA operating model, EA tooling introduction, EA and SA managed service for core strategic programmes across the group.
- **Major UK Pension Fund:** We introduced EA tooling, EA operating model redesign and implementation, EA office managed service.
- **South London & Maudsley NHS Foundation Trust:** We delivered an IoT remote management solution to monitor and control infrastructure, air quality, space occupancy, and personnel location as part of the Future of Wireless Private 5G trial.

OUR TEAM

We have an incredibly talented, experienced, and diverse team who are the experts at what they do.

- ✓ **Experience:** 25 plus years delivering Enterprise Architecture, Solution Architecture, and Business Architecture consulting and solutions
- ✓ **Region:** Full time consultants delivering across EMEA both onsite and remote.
- ✓ **Roles and Responsibilities:** Enterprise Architects, Solution Architects, Business Architects, Data Architects, Infrastructure Architects, Business Analysts, EA Tools SME's, Trainers, Support Specialists, Testers, Project Managers
- ✓ **Domain Knowledge:** Ardoq certified, TOGAF certified, SAFe certified, Certified AI Practitioners, BPMN 2.0, ArchiMate, and Industry specific methodologies.
- ✓ **Industries:** UK Public sector: Healthcare, Defence. Ireland Public sector: Transportation. Private sector: Financial Services & Insurance, Telecoms, Transportation, Oil & Gas.

BRUHATI OFFERING OF ARDOQ CLOUD SOFTWARE

Our comprehensive Ardoq Cloud Software Services offering delivers excellent value and supports you across all aspects of your cloud journey with Enterprise Architecture and Process Modelling. Our service offering helps our clients to select Ardoq offering which is built upon industry leading outcomes framework that comprises of Visibility, Transformation and Oversight. Our experienced and Certified Enterprise Architects can help you to Architect, Deploy, Setup and Integrate Ardoq services for your organisation.

Benefits of choosing Ardoq Cloud Software from Bruhati:

1. Ardoq Services Implementation Partner for two consecutive years.
2. A partner that has implemented over 25+ Ardoq implementations, many in the public sector. Ensuring successful implementation and adoption of the Ardoq platform.
3. Experienced Ardoq platform experts who are professionally certified by Ardoq.
4. Our consultants have vast amount of Enterprise Architecture experience and help to act as trusted advisors.
5. Partners with The Open Group and active members in the working groups to help define the framework.
6. **Most competitive on pricing** for the Ardoq platform and optional accelerators.

Software Commercial Model

Ardoq's pricing is built to be simple, transparent and easy to plan for, both for buyers and their procurement teams. It is grounded by some key principles:

1. **You pay for what you manage** - Instead of an oversized licence you may never fully use, you only pay in line with the scope you manage. Vendors that promise "unlimited apps" often mean you are subsidising other customers, whereas Ardoq's model is tied to real usage so you see value from day one.
2. **Aligned to your footprint** - Pricing scales with the true complexity of your IT landscape – specifically, the number of applications you manage – rather than arbitrary user counts or rigid bundles.
3. **Predictable and scalable** - Clearly defined application tiers make costs predictable and easy to forecast. As your number of apps grows, your per-app cost goes down, so growth is rewarded rather than penalised, helping procurement budget without surprises or mid-year renegotiations.
4. **Unlimited users = limitless collaboration** - With unlimited users, every relevant stakeholder across business and IT can participate in maintaining a living architecture. This removes collaboration barriers so teams can focus on driving tangible outcomes together.
5. **Faster ROI** - With no complex à la carte pricing, you can realise initial value within 30 days without overcommitting upfront, accelerating time to benefit.
6. **You stay in control** - If your application estate grows, you know exactly what it will cost; if it shrinks, your spend reduces accordingly. Clearly defined app tiers show when you will scale up and at what price, making it straightforward to plan growth or right-size your architecture based on real needs.

The **Ardoq platform** has a mandatory module of **Business & IT Optimisation Suite** and additional modules for **Strategic Planning Suite** and **Governance, Risk & Compliance Suite**.

The price is based on the number of applications you want to model in Ardoq for your organisation (not per user). This makes Ardoq your go-to source of truth and provides a platform for collaborative decision making with **unlimited users** available for the entire organisation.

Visibility

Business & IT Optimization Suite

Contact Sales

- See what you have
- Cut the waste
- Build your EA baseline

Expected Outcomes

- Gain visibility** into how the business uses apps, data, and infrastructure
- Identify rationalization**, cost control, and modernization opportunities
- Establish** a reliable architecture backbone for future growth

Helps You Understand & Optimize:

- How your business works
- How it uses data
- How it uses applications
- How it leverages technology to deliver

We've identified **\$600,000 in savings** potential by rationalizing applications

Context-driven and Customizable UX

- Gather data from domain experts through simple, customized surveys without requiring them to learn a new tool
- Easily adapt the text to speak to the individual, without losing the benefit of structured living data
- Share the most up-to-date data, using real-time collaboration with your experts

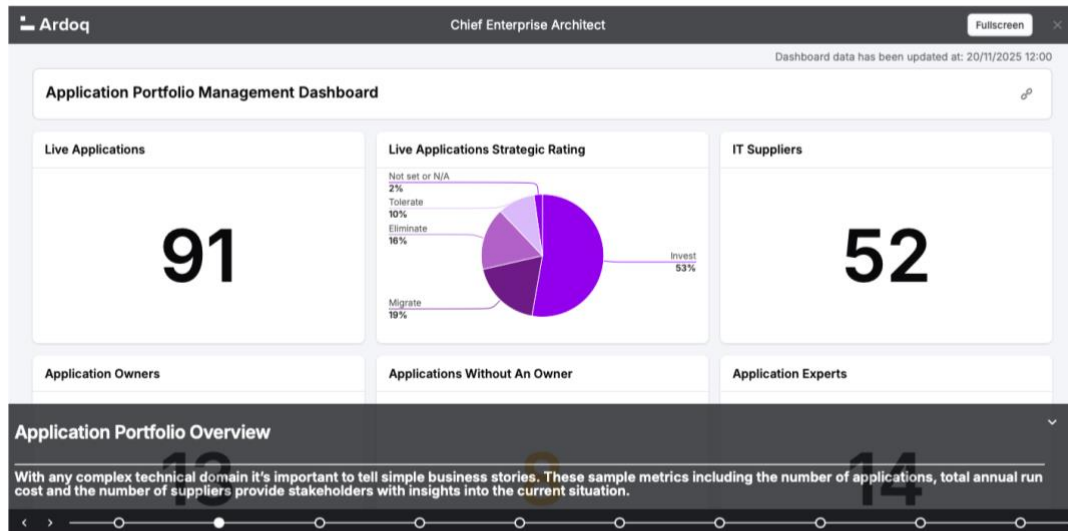

Secure and Democratized Data Collection

- Combine surveys with democratized approval workflows to include the experts in data validation
- Securely distribute surveys across wide audiences without losing control of access management through your existing SSO solutions
- Include external partners without exposing sensitive data with publicly available surveys

FIGURE 3 SURVEYS FROM ARDOQ

Presentations

Automate Insightful Storytelling

Out-of-the-box, Living Presentations

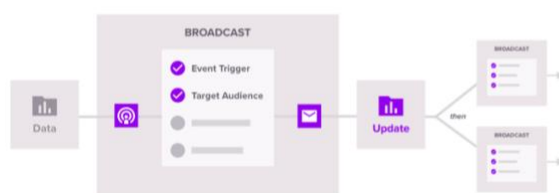

- Share any of Ardoq's 20+ automated and dynamic visualizations as permission-guided presentations
- Include textual context, heat mapping, and perspectives that speak to each stakeholder with no manual drawings
- Be confident that front-line decisions are made on the same data, free from siloes

FIGURE 4 INSIGHTFUL STORYTELLING WITH ARDOQ

Broadcasts

Collaborate Effectively Far Beyond IT

WORKFLOW

Intelligent, Automated Workflows

- Target the people you need based on real-time data
- Integrate notifications to change events in your architecture such as risk, outages, or quality metrics
- Distribute stakeholder-specific surveys, dashboards, and presentations without any manual interviews, spreadsheets, or drawings

Efficient Democratized Governance

- Assign approvals to the subject matter experts based on their relationships to your architecture
- Improve data quality and ownership by removing centralized command and control
- Enable communities to contribute safely without losing trust in the data

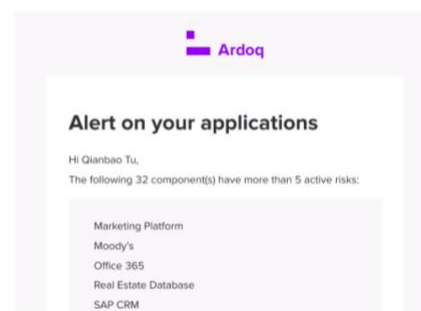

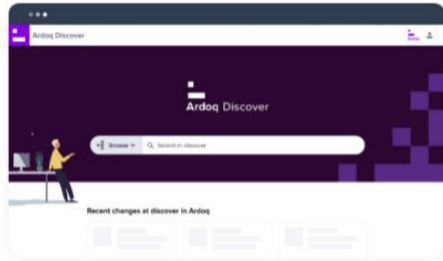

FIGURE 5 COLLABORATE EFFECTIVELY FROM ARDOQ

Ardoq Discover

Make User Experiences Easy and Intuitive

Ardoq Discover has a unique user interface that makes it easy to view the enterprise architecture, check the status, see planned changes or projects, and add information.

- Ideal for CIOs, CISOs, IT teams, business leaders, and others involved in strategic planning, IT optimization, and digital transformation
- Promote collaboration between business and IT by increasing visibility and understanding of key projects and plans
- Know who and what will be impacted by changes to technologies
- Manage business change and transformation in a collaborative manner

FIGURE 6 INTUITIVE USER EXPERIENCE WITH ARDOQ

Ardoq vs. Traditional EA Tools

	Ardoq's Data-Driven Platform	Traditional EA Tools
Unlimited Users	✓ Included in every plan	✗ Costs scale with users
Full Metamodel Flexibility	✓ Adaptable to any EA practice	⚠ Fixed templates only
Application Rationalisation	✓ Fast, dynamic analysis	⚠ Static spreadsheets
Application Lifecycle Management (ALM)	✓ Full lifecycle transparency	✗ No end-to-end visibility
Application Hosting & Infrastructure Mapping	✓ Live infra + app mapping	⚠ Hard-coded diagrams
Application Integration Management	✓ Dynamic, visual cross-app data flow	✗ Not captured or visualized
Business Capability Modelling	✓ Linked to real architecture	⚠ Generic frameworks only
Scenario Modelling	✓ Instant modelling	⚠ Manual Visio or slides

Risk & Compliance Management	 Embedded controls & traceability	 Disconnected docs
Technical Debt Tracking	 Track, prioritize, resolve	 Not tracked systematically
Value Stream Mapping	 Flow mapped to systems	 Standalone point tools
Data Lineage	 Data automatically mapped to apps	 Not connected to architecture
Crowdsourced Insights	 Structured SME inputs (surveys)	 Email chains or meetings
Workflow Automation	 Auto-prompted reviews & approvals	 Manual follow-ups
Custom Business Views	 Role-based, business-friendly	 No business-user access
Roadmaps & Transformation Planning	 Live, interactive roadmaps	 Static slides & docs
Initiatives Dashboard	 Track programs across architecture	 No live linkage to apps
Automated Diagramming	 Real-time via Lucidchart integration	 Drawn by hand
Dynamic Dependency Mapping	 Real-time impact visibility	 Impossible to maintain manually
Open APIs & Integrations	 Flexible, secure, broad coverage	 Limited or brittle
SSO & Granular Access Control	 Fine-grained control by field & role	 All-or-nothing data access

TABLE 1 ARDOQ COMPARISON WITH TRADITIONAL EA TOOLS

Optional Ardoq Accelerators to extend your platform with targeted enhancements:

- **ShiftX** – Easy process design with native, AI-powered process modelling. Can be purchased once the Ardoq Business & IT Optimisation Suite has been purchased.
 - Drag and Drop mapping, linking of Process to Architecture, Real-time collaboration.
 - Easily build, adjust, and visualise workflows with a simple, no-code interface – perfect for business users.
 - Seamlessly connect business processes to applications, and dependencies within Ardoq.
- **Sandbox** – Additional environments can be made available to safely develop, test and validate architecture ideas.
 - Reduce risks of unwanted changes, improve testing & innovation, increase confidence in deployments, safely test new metamodels, workflows, and integration without disturbing production.

Pricing of Optional Ardoq Accelerators:

- **Sandbox** from £7,500*
- **ShiftX** from £37,000*

* Price is per annum and per SaaS Sandbox environment and/or ShiftX application.

Optional Bruhati Accelerators to extend your platform with targeted enhancements:

- **Bruhati Publication Framework** – Produce technical architecture documents in your organisations template using data within the Ardoq platform.
 - Reduce the time to produce documentation through this automated route.
 - Increase productivity
- **Bruhati PowerBI integration** – API Integration between Ardoq and PowerBI
 - Increased visualisation capability using the data held in the Ardoq repository
 - Ability to combine other organisation data sets to produce enterprise-wide views in PowerBI.
- **Custom Enterprise Architecture Portal** – A company EA portal to navigate through EA artefacts including Ardoq viewpoints.

Pricing of Optional Bruhati Accelerators:

- **Bruhati Ardoq Publication Framework** starts from £2,000*
- **Bruhati Ardoq PowerBI Integration** starts from £2,000*
- **Custom Enterprise Architecture website** starts from £4,000

* Please note prices are per annum.

Bruhati Professional Services offering for Ardoq

Benefits of choosing Professional Services from Bruhati:

1. Ardoq Services Implementation Partner for two consecutive years.
2. A partner that has implemented over 25+ Ardoq implementations many in the public sector. Ensuring successful implementation and adoption of the Ardoq platform.
3. Experienced Ardoq platform experts who are professionally certified by Ardoq. We follow Ardoq's exact implementation methodology and approach for our pre-packaged Professional Services.
4. Our consultants have vast amount of Enterprise Architecture experience and help to act as trusted advisors.
5. Partners with The Open Group and active members in the working groups to help define the framework.
6. **Most competitive pricing** for Ardoq professional services.

We offer two types of Professional Services for Ardoq:

- **Pre-packaged:** Engagement delivered at a flat rate or defined block of time. Billed based on pre-packaged module completion with clear activities and deliverables.
- **Custom package:** A Time & Material approach is used custom services. These contracts provide payment of resource costs based on fixed daily rates which are specified in our listing.

Pre-packaged:

Onboarding for new customers		
	Activities & Deliverables	Cost (£)
Foundations	4 enablement workshops & basic set-up.	Included with license purchase

Onboarding for existing customers – refresher		
	Activities & Deliverables	Cost (£)
Standard Admin User Training	A series of consultant-led workshops and offline preparation time, that provides the necessary knowledge and practical skills in the key Ardoq features: permissions, data loading, visualisations, reports, dashboards, surveys, broadcasts, viewpoints and scenarios.	2,000
Standard Use Case Deployments	A series of consultant-led workshops covering three of the standard Ardoq Best Practice Use Cases, i.e. its purpose, its metamodel, data sourcing and loading, prebuilt artefacts, customisation principles, ad-hoc Q&A and a post-deployment review.	3,000
Onboarding Price		5,000

Business Outcomes		
Modules	Activities & Deliverables	Cost (£)
Application Rationalisation	8 workshops focused on creating a comprehensive application view.	8,000
Strategy to Execution	6 workshops focused on developing a comprehensive view of initiatives, supporting elements and visualisations.	6,000
Application Risk	6 workshops focused on understanding your controls, risks, and regulations.	6,000

Business Outcomes Extensions		
Modules	Activities & Deliverables	Cost (£)
Application Rationalisation	Model my Servers and where Applications are hosted	2,000
	Model my Technical Capabilities	1,000
	Model how data is transferred across applications	1,000
	Model my Value Streams	1,000
	Model my AI-enabled technologies	1,500
Strategy to Execution	Plan my Cloud Migration	1,000
Application Risk	Capture Architectural Decisions	1,000
	Catalogue my Technical Debt	1,000
	Catalogue my Technologies	1,000
	Evaluate our Internal Policies for compliance	1,000
	Govern my AI-enabled technologies	1,500
Additional Standard Use Case	Standard Use Case Deployment (can be ordered in multiples)	1,500

Additional Add-on Services			
Service Category	Service	Activities & Deliverables	Cost (£)
Integrations & API	Standard Integration Connector Set-up: ServiceNow	The Ardoq ServiceNow Importer is an out-of-the-box connector that enables the synchronisation of ServiceNow assets data with Ardoq. Connectivity enablement workshop, Service Now data analysis workshop, loading & scheduling workshop, and best practice & real-life use case workshop.	2,500
	Integration Assistance: Ardoq to ServiceNow	Integration Assistance is provided for synchronisation of Ardoq assets with ServiceNow.	2,500
	Standard Integration Connector Set-up: Signavio	The Ardoq Signavio Process Modeller Importer is an out-of-the-box connector that enables the synchronization of Signavio processes with Ardoq. Connectivity	2,500

		enablement workshop, export and import workshops, and best practice & real-life use case workshop.	
	Standard Integration Connector Set-up: Azure	The Ardoq Microsoft Azure Importer is an out-of-the-box connector that enables the synchronisation of Azure-hosted application data with Ardoq. Connectivity enablement workshop, filtering and resource access workshop, loading & scheduling workshop and best practice & real-life use case workshop.	2,500
	Standard Integration Connector Set-up: Jira	The Ardoq Jira Cloud Platform Importer is an out-of-the-box connector that enables the synchronisation of Jira project data with Ardoq. Connectivity enablement workshop, filtering and resource access workshop, and best practice & real-life use case workshop.	2,500
	API Education	Two consultant-led workshops of two hours covering the theory and practical exercises of using the Ardoq API.	1,000
	Integration Logical Design	Two consultant-led workshops plus offline preparation time, totalling eight hours, to define and document the logical architecture of component and reference mapping between Ardoq and a single third-party application. Excludes field mapping and data transformation rules.	1,000
Training, Migration and Ad Hoc Services	Train-the-Trainer Education	A series of consultant-led workshops totalling twenty hours covering how to train others on key Ardoq features and the deployment of use cases.	3,000
	Legacy EA Tool Data Migration	Legacy EA tool data migration can be achieved with one of the following approaches: a) Export all legacy EA tool data into a “golden copy” spreadsheet file for later Ardoq import b) Migrate all legacy EA tool data into Ardoq in a single “big bang” event c) Migrate legacy EA tool data into Ardoq in phases, aligned to your Ardoq roadmap. Three workshops totalling 10 hours.	5,000

	Ad-hoc Assistance Block of 8 hours (can be ordered in multiples)	Ad-hoc consultant assistance totalling eight hours, to be used as directed by the customer. This can be used to add contingency to the Professional Services engagement.	1,000
	Ad-hoc consulting of 1 hour (can be ordered in multiples)	Ad-hoc consultant assistance to be used as directed by the customer. This can be used to add contingency to the Professional Services engagement.	Ranging from 100-150 per hour
	Evaluate	Aimed at new and existing customers to help build a roadmap to business objectives. Target business priorities and outcomes to personas in the organisation and how Ardoq is best placed to achieve this.	2,500
	Education – Discover recap	Aimed at existing customers to go over the Discover module that was covered in the Standard Admin Training.	500
	Education – Broadcasts recap	Aimed at existing customers to go over the Broadcasts module that was covered in the Standard Admin Training.	500
	Education – Scenarios recap	Aimed at existing customers to go over the Scenarios module that was covered in the Standard Admin Training.	500
	Education – Surveys recap	Aimed at existing customers to go over Surveys that was covered in the Standard Admin Training.	500
Health Check	Health check – High-level	Aimed at existing customers or those with some data and artefacts already in the Ardoq platform. A series of consultant-led workshops and offline documentation, to review folder/ workspace structure and metamodel in Ardoq and produce a report of recommended next actions and best practices.	2,000
	Health check – Deep-dive	Aimed at existing customers or those with significant data and artefacts already in the Ardoq platform. A series of consultant-led workshops and offline documentation, to review folders/ workspaces, components, references, fields, permissions and artefacts in Ardoq and produce a report of recommended next actions and best practices.	5,000

Custom Package:

Custom Professional Services are used for specific requirements and/or extended durations. The contracts provide for the payment of resource costs based on fixed daily rates which are specified in our listings.

Example activities but not limited to:

- Custom Integration & Functionality
- Custom Development
- Complex Legacy EA Tool migration
- Persona Based Training
- Strategy Assessment
- Data Assessment
- Queries, Reports, & Dashboards
- Meta-Model and Workspace
- Visualisations & Presentations
- Survey & Broadcast
- Data Preparation & Migration
- Ardoq platform admin
- Ardoq SME support

NEXT STEPS

Please feel free to get in touch if you have any questions.

We are happy to offer a free initial assessment for any of our services to help provide any further clarifications your organisation may need.
