

Data Protection Service

G-Cloud 15 service definition document

Data Protection Service

Daintta provides operational and strategic services and capabilities that position Data Protection & Privacy as a Strategic Enabler of Business Objectives.

Daintta support in embedding Data Protection by Design and Default for operational efficiency, regulatory compliance and building a Data Protection as a trusted, respected and customer centric function.

About the Service

The Data Protection service supports organisations to embed Data Protection and Privacy by Design and Default into cloud services.

The service focuses on improving compliance, governance and operational confidence.

Daintta helps organisations manage data protection risks while enabling effective service delivery.

This reduces regulatory risk and supports responsible data use.

Service Features

1. Analyse, evaluate, and interpret Data Protection compliance gaps and risks
2. Define, deliver, and present key recommendations to address compliance gaps
3. Deliver Records Management suite of services
4. Deliver Data Protection Incident and Risk Management suite of services
5. Deliver Data Protection Governance and Assurance suite of services
6. Deliver Data Protection Disclosure and Compliance suite of services
7. Design Data Protection strategies, operating models and governance processes
8. Develop Data Protection culture and awareness programmes
9. Advise and guide on complex Data Protection challenges
10. Drive continuous improvement across the Data Protection landscape

Service Benefits

Service Description Details

Scope of our Services

Daintta helps public sector organisations successfully deliver complex cloud-enabled programs and transformations.

We support clients to move from early discovery through to live operation, ensuring delivery activity is aligned to strategic intent, operational readiness and measurable outcomes.

Our Approach

Our approach recognises the practical realities of public sector delivery, including complex stakeholder environments, multi-supplier ecosystems, assurance obligations, and evolving policy and technology contexts.

We work alongside client teams to provide experienced, impartial delivery leadership that enables progress while managing risk in a proportionate, transparent & controlled manner.

Customer Stories

Secure AI on Private Cloud

Designed, trialed and deployed a Generative AI capability into production for a central government department within a secure private cloud environment. The solution integrated identity controls, governance and repeatable deployment patterns, enabling improved operational efficiency while maintaining security, assurance and responsible AI expectations.

Critical Resilient Infrastructure

Led the design, build and preparation for operation of a secure, resilient infrastructure spanning on-premise and cloud environments. Delivered systems engineering, secure architecture and software releases, maintaining alignment between design intent and live environments and enabling confident transition towards sustained operational use.

Digital Collaboration Platform

Enabled improved collaboration across a government department and its arm's-length bodies to develop shared data and digital products. Daintta supported delivery planning, governance and stakeholder alignment, reducing fragmentation and enabling confident, coordinated delivery across a complex multi-organisation ecosystem.
