

Strategy and Risk Service

G-Cloud 15 service definition document

Strategy and Risk Service

Daintta supports senior leaders in creating, iterating and maintaining data, intelligence, technology and security strategies that support realising the full potential of cloud-based solutions.

Daintta offers support over the full lifecycle from strategy through to implementation and continuous improvement.

About the Service

The Strategy and Risk service supports organisations to develop risk-informed strategies across cloud, data, technology and security.

The service focuses on clarifying priorities, dependencies and trade-offs to support confident decision-making.

Daintta works with senior leaders to ensure strategy is grounded in operational reality and aligned to delivery capability.

This reduces strategic risk and improves alignment between intent and execution.

Service Features

- Develop risk and business-outcome-driven data and security strategies
- Develop digital strategy and implementation roadmap
- Define problem statements to drive digital strategies
- Communicate strategic objectives to business units and senior leaders
- Vendor agnostic independent advice on technology and solution selection
- Cross-functional approach and culture for analytics
- Provide advisory services for boards and senior executives
- Provide subject matter expertise in data, security, technology and analytics
- Develop change impact assessment for digital strategy
- Facilitate cross department and government collaboration"

Service Benefits

- Tailored digital approach aligned to key business outcomes
- Data driven risk based decision making
- Adoption of open source solutions, technology and software
- Innovation embedded into business wide strategy
- Increased resilience across the organisation
- Data, technology and security strategy to enable cloud transformation
- Rapid implementation of changes through Agile planning methodologies
- Release potential and increase productivity of existing solutions
- Leverage additional insights from existing data
- Develop innovative and digital culture

G CLOUD 15 Service Description Details

Scope of our Services

Daintta helps public sector organisations successfully deliver complex cloud-enabled programs and transformations.

We support clients to move from early discovery through to live operation, ensuring delivery activity is aligned to strategic intent, operational readiness and measurable outcomes.

Our Approach

Our approach recognises the practical realities of public sector delivery, including complex stakeholder environments, multi-supplier ecosystems, assurance obligations, and evolving policy and technology contexts.

We work alongside client teams to provide experienced, impartial delivery leadership that enables progress while managing risk in a proportionate, transparent & controlled manner.

Customer Stories

Secure AI on Private Cloud

Designed, trialed and deployed a Generative AI capability into production for a central government department within a secure private cloud environment. The solution integrated identity controls, governance and repeatable deployment patterns, enabling improved operational efficiency while maintaining security, assurance and responsible AI expectations.

Critical Resilient Infrastructure

Led the design, build and preparation for operation of a secure, resilient infrastructure spanning on-premise and cloud environments. Delivered systems engineering, secure architecture and software releases, maintaining alignment between design intent and live environments and enabling confident transition towards sustained operational use.

Digital Collaboration Platform

Enabled improved collaboration across a government department and its arm's-length bodies to develop shared data and digital products. Daintta supported delivery planning, governance and stakeholder alignment, reducing fragmentation and enabling confident, coordinated delivery across a complex multi-organisation ecosystem.
