

G-Cloud 15 Pricing Document

Aaseya Pega Inspection Solution

1. Aaseya Pega Inspection Solution - Pricing

The Pricing for the Aaseya Pega Inspection Solution is determined following a detailed assessment of customer requirements and implementation scope. Commercials are defined based on a combination of factors, including (but not limited to):

- Inspection types and complexity
- Functional scope and configuration requirements
- Integration needs with existing enterprise systems
- Reporting, analytics, and data migration requirements
- Channels and user experience requirements
- Deployment model (on-premise, private, public, or hybrid cloud)
- Delivery model (onshore, offshore, or hybrid)
- Support, training, and operational requirements

AIS is built on the Pega Platform, and customers are required to hold valid Pega licences and select a hosting option in line with their organisational and regulatory policies.

AIS framework may be provided free of charge as part of an engagement where Aaseya is contracted to deliver a relevant Inspection Solution implementation or programme. Any configuration, extension, or customisation of the solution will be delivered in line with Aaseya's standard Pega implementation services.

All implementation, configuration, and enhancement activities are priced using Aaseya's SFIA-aligned Pega rate card, provided below for reference.

2. General Conditions & Restrictions

On provision of the 'Work Product', no licence is applicable or offered.

Post the implementation, there is no maintenance of the 'Work Product' charged and the customer is free to modify and enhance the product.

The customer cannot transfer or sell the product to any organisation, affiliate or subsidiary.

3. Contact Information

Matthew Leamy – Vice President, Sales Europe
