

G-Cloud 15 Pricing Document

Aaseya Quality Assurance and Testing Services

1. Aaseya Quality Assurance and Testing Services - Pricing

Pricing for **Aaseya Quality Assurance and Testing Services** is engagement-specific and structured to align with each customer's quality objectives, delivery approach, and application landscape. Recognising that quality assurance requirements vary significantly across programmes and organisations, Aaseya adopts a flexible and transparent pricing approach that balances commercial predictability with delivery agility while ensuring outcomes are aligned to risk, compliance, and release objectives.

Pricing is determined based on several key factors, including:

- Scope and type of testing services required, such as functional, regression, automation, performance, security, accessibility, and non-functional testing
- Complexity and scale of the application landscape, including web, mobile, API-led, integrated, and low-code platforms
- Volume and criticality of applications, test cases, and regression coverage
- Release frequency, delivery cadence, and Agile or waterfall delivery models
- Level of test automation, tooling, and framework setup required
- Governance, reporting, and quality assurance controls expected
- Duration of the engagement and required onshore, offshore, or blended delivery model
- Regulatory, compliance, and performance assurance requirements specific to the organisation or industry

Based on the defined scope and delivery characteristics, Aaseya Quality Assurance Services can be delivered under a fixed-price model for clearly defined testing phases or milestones, or under a time-and-materials model for iterative, Agile, or evolving programmes. For customers seeking sustained quality capability, Aaseya can also provide a dedicated or managed QA team aligned to ongoing delivery and release cycles.

For transparency and commercial clarity, an **SFIA-aligned rate card for Aaseya Quality Assurance Services** is provided for reference, outlining role-based pricing mapped to recognised SFIA skill levels and supporting consistent commercial governance.

Aaseya works collaboratively with customers to agree the most appropriate pricing structure based on delivery needs, risk profile, and quality objectives, ensuring flexibility while maintaining cost control, delivery assurance, and measurable value throughout the engagement
