Scanning Customers

If you are a scanning customer with our parent company Storetec, you also have the option to use MDI Cloud.

This flexible and budget-friendly platform provides secure document storage, powerful full content search, and easy-to-use document management tools, helping you gain better control and quick access to your information.

IDP Module

From £500 per month

Intelligent Document Processing:

- ✓ *AI data extraction*
- ✓ *Includes x1 AI agent*
- ✓ *Data tables*
- ✓ *Bespoke AI prompts*
- ✓ *Customised AI token limit*

IDP Set-Up

We'll build a proof of concept that scales to your extraction needs. Most deployments use between 500,000 tokens (£45 per month) and 1,000,000 tokens (£90 per month).

Our team handles the build, testing, deployment, and post go-live support. This typically takes between 1.5 and 3 days, with professional services charged at £300 per half day.

Need more power? You can deploy additional IDP agents by upgrading to the Professional package. We'll configure them as part of your professional services days, with no extra charge for deploying the agents themselves.
