

Investigative Fusion Platform

Accelerate investigations with real-time intelligence and unified evidence analysis

Penlink's PLX is a state-of-the-art platform designed to collect, normalize, and analyze data from hundreds of diverse sources. Purpose-built for mission-critical investigations, it delivers proven results through seamless digital evidence management and real-time data analysis.

Whether you're loading historical data, intercepting live communications, or working with telephonic or internet-based sources, PLX delivers a comprehensive AI-based analysis to uncover insights and reveal hidden connections, trends, and relationships within your data.

From instant insights to courtroom-ready reports, PLX delivers clarity, speed, and control at every stage of your investigation.

Collect and Analyze Digital Evidence from Thousands of Sources

Search Warrant Returns

- ✓ Normalize communication data from major telecom providers and enable consistent structure and interpretation.
- ✓ Support standardized formatting, time zone alignment, and seamless integration across diverse record types.

Mobile Forensics Data

- ✓ Analyze extracted data from multiple devices, operating systems, and vendors to uncover communication patterns.
- ✓ Streamline forensic exports review using powerful and intelligent analysis to quickly surface device data and insights.

Telecom Data

- ✓ Analyze CDRs, tower dumps, RTT data, and location pings to uncover movement patterns and shared locations.
- ✓ Identify links between multiple subjects by examining calls frequency, geospatial data, and connection analysis.

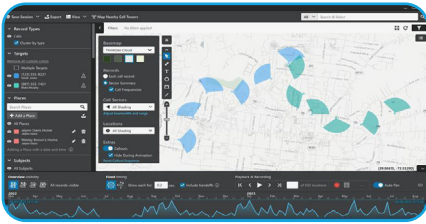

Internet-Based Activity

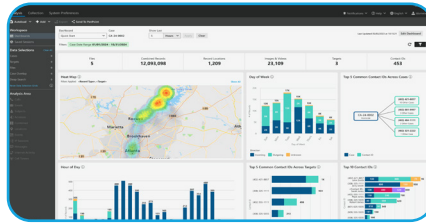

- ✓ Analyze behavior and content trends across leading social media platforms to uncover digital footprints and patterns.
- ✓ Gain visibility into online activity through web browsing history and IP session data to analyze internet communications.

Drive Investigations with Powerful Data Analysis

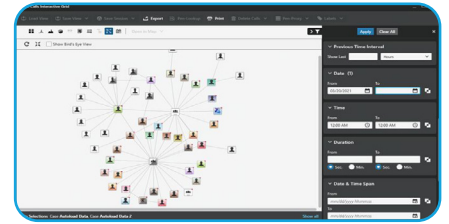

PLX transforms complex data, structured and unstructured, into actionable, intelligence-driven insights, enabling smarter investigations and faster case resolution.

Interactive Mapping

Customized Dashboards

Powerful Visualization

Comprehensive Analysis

Analyze complete conversations from various online social media platforms, and seamlessly combine the data with phone records for deeper insights.

Financial Data

View transaction data from banks, Venmo, Bitcoin, CashApp, and other platforms to uncover patterns, relationships, and financial links between subjects.

OSINT Discovery

Integrate PLX with Penlink's Tangles platform to uncover data and provide openly available account information associated with a given phone number.

Image Recognition

Automatically tag and organize images to streamline review and quickly surface critical visuals, making it faster to locate the most relevant images.

Transcription and Translation

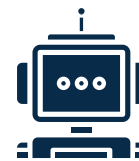

Rapidly convert communications into accurate, searchable text, saving valuable time, uncovering new leads, and streamlining digital evidence analysis workflows.

Cross-Case Deconfliction

Get notified of overlaps to help investigators make faster connections, enhance officer safety, and uncover broader criminal networks.

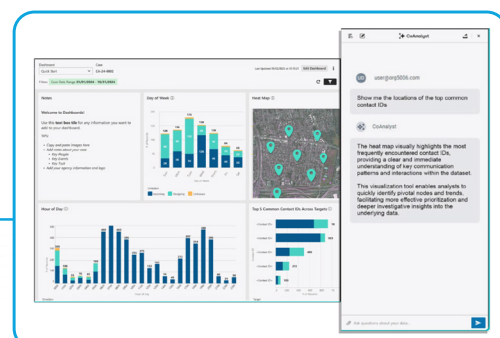

Turn complex data into actionable intelligence with PLX CoAnalyst and Agentic AI

Ask me anything

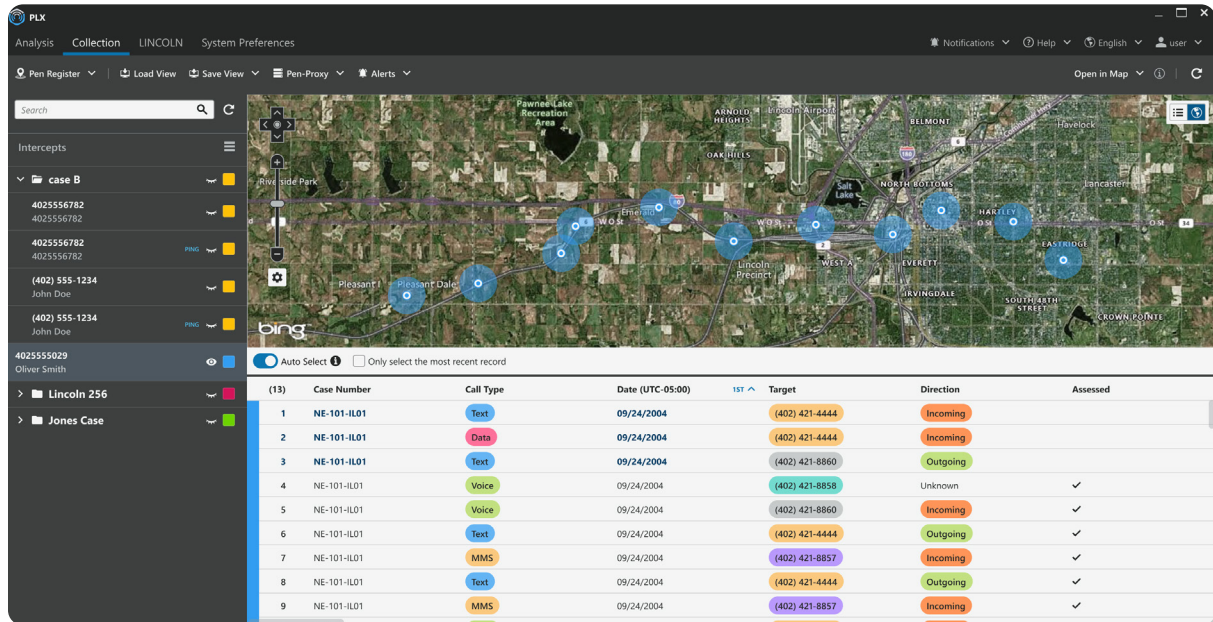

CoAnalyst is a groundbreaking platform at the forefront of generative AI, designed to streamline complex investigations and analyze large data sets. It enhances the analysis of digital communication data collected from various sources, including phone records, social media, and other digital evidence. Our platform harnesses the most sophisticated generative AI technologies, powered by large language models.

 **CoAnalyst**
AGENTIC AI

Lawful Collection Made Simple

Capture real-time intelligence with our platform's live data-collection system. Track and monitor communications as they happen, ensuring that you gather crucial insights instantly. Our solution offers seamless integration, secure data handling, and easy access to critical data for immediate action.

Aggregate and Analyze All Your Data in One Place

PLX supports thousands of native file types and live data-delivery standards, enabling real-time ingestion and normalization of incoming data streams into a single integrated fusion system.

Unmatched Intercept Capabilities

Capture what matters with comprehensive support for all major data types, including telephony, internet activity, social media, and GPS trackers.

Real-Time Monitoring

Quickly review, flag, and share pertinent telephony and social media communications, all from a single intuitive workspace.

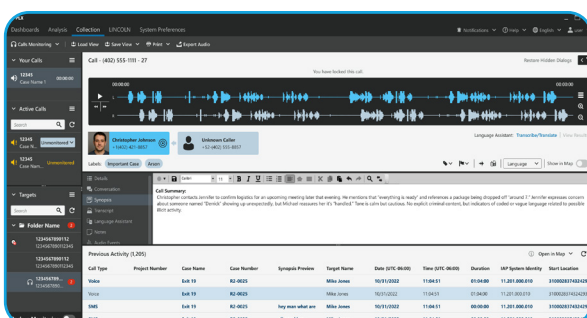

Field-Ready Tracking

Visualize your target's latest locations to support field operations from location pings to real-time tracker feeds.

IMSI Catcher Integration

Seamlessly deliver real-time identifiers, including 5G, to cell site simulators via our API, for enhanced tracking and precision.

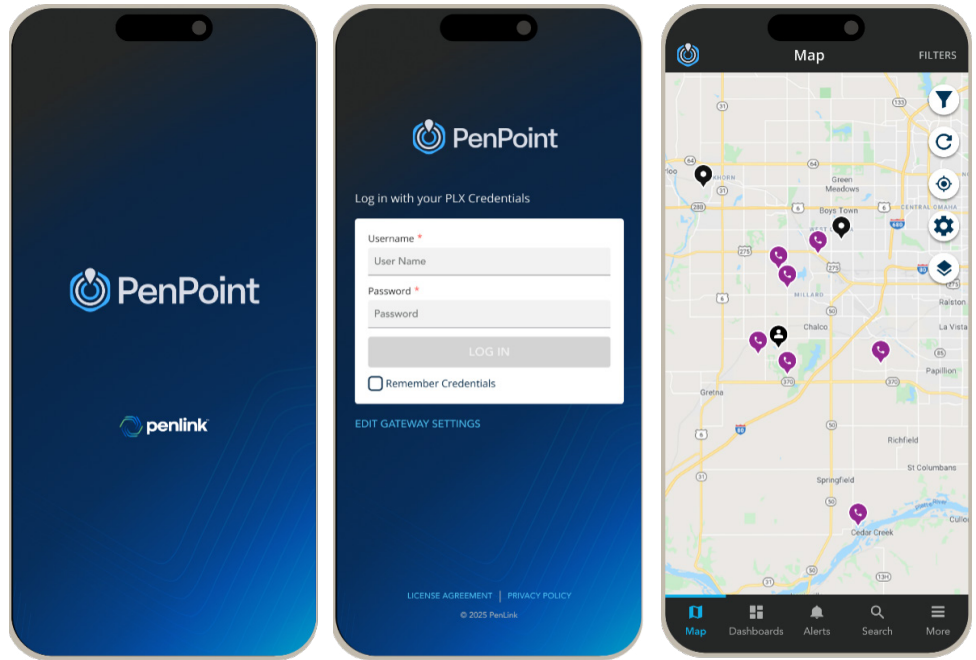

Built for Security and Trust

Keep your data protected at every stage. PLX provides secure storage, complete audit trails, and digitally signed evidence packages, ensuring flexibility and confidence for sensitive missions.

Stay Ahead with PenPoint

Built for the Field

Stay mission-ready anywhere. The PenPoint mobile app keeps field teams connected with real-time access to case data, team locations, and search tools, plus uninterrupted tracking through direct integration with cell site simulators.

Trusted and Secure

PenLink is grounded in integrity, accountability, and a deep commitment to compliance across all areas of our operations. Full data integrity and complete audit trails ensure that sensitive operations remain secure and fully accountable. By leveraging innovation and acting with purpose, we aim to deliver long-term value, protect vital resources, and contribute to a more resilient, responsible global ecosystem.

About Penlink

Penlink stands at the forefront of digital intelligence, offering comprehensive solutions tailored for the law enforcement, national security, the defense sector, and organizations. Our expertise lies in seamlessly integrating extensive digital evidence with open-source intelligence, gathered from a vast number of sources, and harnessing the power of AI for critical insights. Comprehensive data coverage ensures the rapid and efficient identification of key leads and crucial connections in complex investigations.

Our robust product portfolio enables end-to-end digital investigations and threat monitoring, leveraging technologies equipped with a broad spectrum of AI analytics capabilities. These technologies are designed to swiftly and accurately uncover key insights, ensuring efficient and informed decision-making.
