Setting New Standard in 3D Mapping and Analytics

GeoTime Desktop is a sophisticated 3D mapping and analysis tool designed to visualize events over time and space. It enables users to analyze complex datasets by adding a temporal dimension to traditional geospatial data, facilitating the identification of patterns, relationships, and trends.

Flexible, Powerful and Easy-to-use

Desktop is used by HIDTAs, fusion centers, national defense organizations and law enforcement agencies worldwide for criminal investigations, intel analysis, surveillance operations and courtroom presentations.

Find answers to your investigative questions and create irrefutable prosecution materials.

All your geolocation data in one comprehensive platform

Accelerate investigations and improve your agency's clearance rate

Easily process, analyze, map, combine, visualize and share your case data

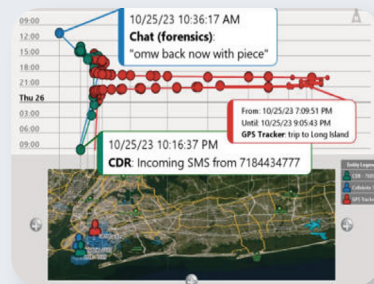

Instantly show the location of a suspect's device at the time of a crime

Import data from virtually any communications, surveillance, or forensic provider, handling formats from hundreds of sources.

- | | | |
|------------|--------------|---------------|
| ➔ AT&T | ➔ Cellebrite | ➔ Berla |
| ➔ Sprint | ➔ Uber | ➔ US Cellular |

| ➔ Rogers | ➔ Tracfone | ➔ Telus |

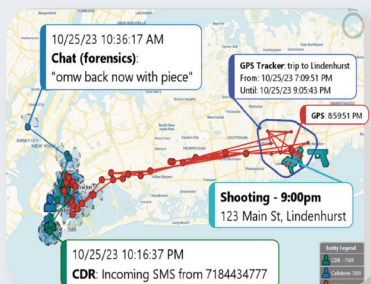

Make use of all your case data

- ➔ Drag-and-drop your data for instant cleaning, mapping and analysis.
- ➔ Import and layer data from a variety of sources: CDRs, mobile forensics, social media, chat and im, tower dumps, vehicle extractions, mobile apps, gps trackers, lpr, and more!
- ➔ Intuitive workflows and automated reporting tools accurately normalize and map your data twice as fast.

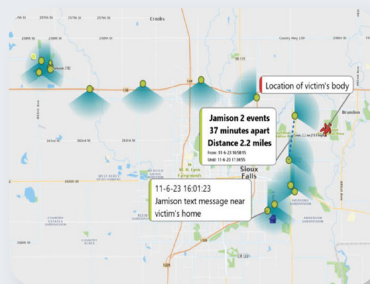

The industry's only 3D mapping and analysis tool, capturing time and space.

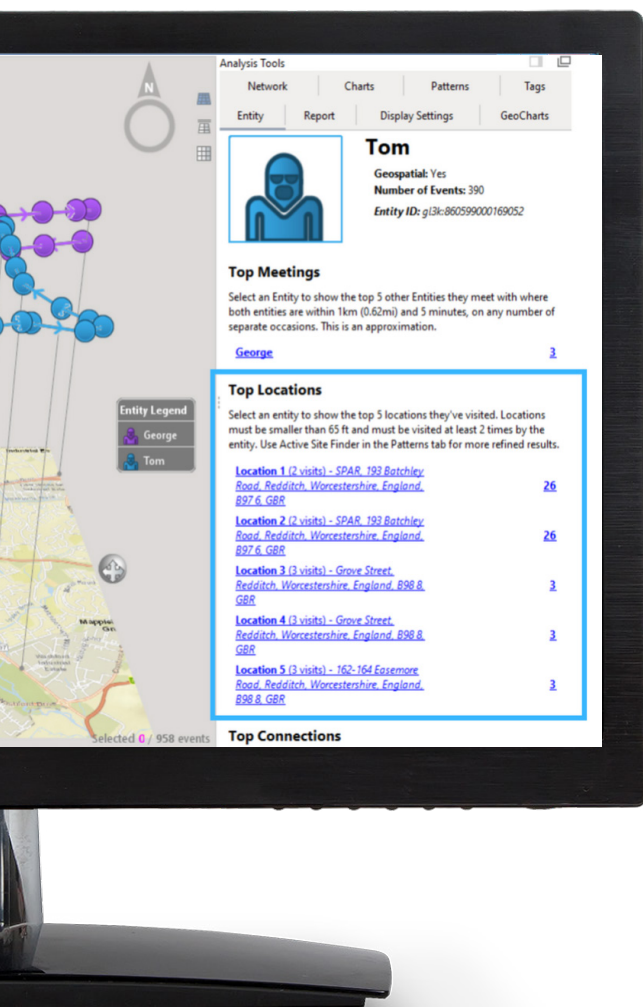

Find and fill gaps with your evidence

- ➔ 3d mapping tool shows time and space to uncover hidden details.
- ➔ Easily identify top callers and locations, time of day, and patterns or relationships between entities.
- ➔ Instantly find activities such as meetings, important locations, stops and co-travel, to help place your target's device at the crime.

Maps that the entire courtroom will understand

- ➔ The best presentation tool for displaying data in the courtroom.
- ➔ Produce easy to understand visuals, allowing you to confidently show investigators, judges and juries where your suspect's device was during the time of a crime.
- ➔ Export powerpoints and videos with one-click to share evidence and create effective, high-impact presentations.

Trusted and Top of the Industry

Certification and training

- ➔ On-demand online training and webinars through the geotime learning portal.
- ➔ PenLink's training and certification program offers an official designation for analysts and investigators with proven skills and experience using Desktop for data analysis and presentation.

Partnerships and affiliations

- ➔ Industry-leading 14-step data validation process sourced from our global network of law enforcement professionals and Subject matter experts who have successfully testified in court.
- ➔ Affiliations include IALEIA, IACA, FBINAA, IACP, Cold Case Foundation, ESRI, and Blockchain Intelligence Group.

Technical support and resources

- ➔ Our dedicated technical support specialists are available by telephone and online to support you when it matters most.
- ➔ Access to PenLink's knowledge base where you can ask questions and share best practices with thousands of law enforcement experts from around the world.

About Penlink

Trusted Innovation for Intelligent Decisions

Penlink, the leading authority in digital intelligence, provides seamless integration of open-source intelligence and digital evidence for law enforcement, national security, the defense sector, and organizations. Penlink leverages broad-spectrum AI capabilities to enable end-to-end digital investigations and threat monitoring. Comprehensive data intelligence ensures the rapid and efficient identification of leads and crucial connections in complex investigations. Penlink proudly represents innovation and ingenuity. The company is headquartered in the US, with global offices and customers worldwide.
