

STREAM Pricing

G-Cloud 15

1. Service Description

This document describes the pricing under G-Cloud 15 for STREAM Professional Services.

Services would include **consultation workshops, requirements analysis, design and configuration services** to help customers implement STREAM Integrated Risk & Assurance Manager to address requirements / Use Cases including the following:

- Integrated Risk Management (Cyber, Enterprise, BCM, H&S)
- Controls Assurance (against multiple frameworks).
- Incident Management (incidents and incident response)
- Audit Management (audits, nonconformities, opportunities for improvement, audit reporting)
- Policy/procedure management (e.g. integrated with SharePoint)
- Vulnerability Management (infrastructure assets, vulnerabilities and remediation management/tracking)
- Vendor Assurance and Risk Management
- Business Continuity Management
- Data Privacy
- ISO 27001 ISMS or integrated management system

To support the above we would provide support with the following activities:

- Migration from spreadsheets, other home-grown applications, third-party applications and cloud services, including importing legacy data
- Configuration of risk frameworks and risk assessment schemes, including quantitative, qualitative or mixed-mode schemes
- Configuration of control catalogues, standards, frameworks and control assessment schemes
- Configuration of audit frameworks
- Configuration of entities, such as incidents, near-misses, vulnerabilities, threat intelligence, issues
- Configuration of webforms
- Configuration of APIs with third party tools
- Import of scanning data from vulnerability management applications
- Import of data from threat intelligence applications
- Import of controls state data from third-party security applications
- Import of asset data from configuration management applications
- Export of data to business intelligence applications
- Software Integrations with third party solutions
- Workflow and auto-scheduling design and configuration
- Reporting and dashboarding
- Creation of custom documentation
- Creation of custom training materials
- Administrator training
- End user training.

2. Professional Service Fees

Service Tier	Daily Rate	Best Suited For	Typical Activities
Tier 1: Standard Implementation	£1,350	New clients needing core platform setup and onboarding.	- Platform configuration for a single primary use case. - User onboarding and standard training sessions. - Building standard dashboards and reports. - Basic data import and setup.
Tier 2: Advanced Configuration & Integration	£1,850	Clients with complex requirements, multiple use cases, or integrations.	- Configuration for multi-departmental or multi-framework use cases. - Mapping and importing complex control frameworks (e.g., NIST, ISO 27001). - API integration with other business systems. - Creation of advanced workflows and automated reporting.
Tier 3: Strategic Advisory & Development	£2,750	Clients requiring bespoke solutions, GRC program strategy, or custom development.	- GRC program design and strategic consulting. - C-level workshops and risk maturity assessments. - Development of custom features or modules for STREAM. - Scoping and delivery of highly complex, non-standard builds.

Notes:

- Services are delivered at a fixed fee which may reduce the day rate.
- The consultancy rate includes expenses when delivered within the M25. Where services are delivered outside of the M25 (London), expenses will be recharged at cost.
- All fees exclude VAT.
