License Structure

edison365 operate a subscription-based licensing model, whereby access to the software is determined by user type and required functionality. Our platform supports a range of scopes, from idea / demand management only, to full end-to-end business case development and project execution.

edison365 offers four licensing options: Base, Standard, Professional and Premium; each tailored to different organizational needs:

- **Base:** Supports the full project intake process, enabling users to launch idea campaigns, collect project requests from across the organization, and collaboratively evaluate submissions. It fosters engagement through discussions, voting, and prioritization to ensure high-quality, aligned project proposals.
- **Standard:** Builds on the Base tier by adding business case management capabilities. This allows users to transform selected requests into structured business cases with defined benefits, costs, risks, and timelines, enabling better decision-making and alignment with strategic goals.
- **Professional:** A complete solution that includes all features from the Base and Standard tiers, along with robust project management functionality. This includes Gantt charts, task tracking, resource allocation, portfolio visibility, and benefit realization tracking to ensure effective execution of approved initiatives.
- **Premium:** Includes all features from the Base, Standard, and Professional tiers, with added support for event-driven APIs to enable real-time integration with other systems, and advanced auditing capabilities for detailed activity tracking, compliance, and governance.

Base

Great for teams to **accelerate innovation** and manage their early-stage pipeline or simply get a handle on demand.

- ✓ Gamified ideation
- ✓ Complete admin controls
- ✓ Dashboards and templates

[Discover More](#)

Standard

Perfect for teams who want to **manage business cases** and streamline the approval process, or for those looking to push their innovation game to the next level!

- ✓ Strategic Innovation
- ✓ Business case controls
- ✓ Custom reporting

[Discover More](#)

Professional

Excellent for teams focused on **all things project management**, handling resources, creating strong business cases, and portfolio analysis. Plus, if **end-to-end innovation** is your goal, look no further!

- ✓ Data-led innovation
- ✓ Powerful project management
- ✓ Resource Management
