About WISEflow

WISEflow is a digital assessment platform which provides educational institutions with a product to support the entire assessment process. It supports several different methods of assessment, from essay submissions and multiple-choice papers to locked-down, secure assessments with camera and microphone monitoring.

About WISEflow Originality

WISEflow Originality is a plagiarism control solution that integrates closely with WISEflow, so that the similarity report is displayed directly where the assessment takes place. The solution supports academic quality and fairness in written assessments, simplifies the work of teachers and external examiners, and provides the study administration with clear management options. Methodologically, Originality combines understanding of meaning/meaning in text with classic string-based comparisons, so that both verbatim copying and paraphrasing can be detected. Originality also functions as a stand alone solution as required and can integrate with other institutional solutions.

WISEflow – Core, Advanced and Premium

WISEflow Core

WISEflow Core is the base level of the platform. It will give clients access to the core of the product, such as the six main FLOW types: FLOWassign, FLOWhandin, FLOWmulti, FLOWlock, FLOWoral and FLOWattend.

WISEflow Advanced

As Core, but with the lockdown browser, FLOWcombine and FLOWseries, ability to have larger permitted file sizes for submissions and also the ability to use marking rubrics.

WISEflow Premium

All features of Core and Advanced. Contains all the enhancements (see below) included at no additional charge.

Onboarding

Onboarding for WISEflow is charged as a flat fee of £2,600 plus a monthly fee of £865. The onboarding process normally takes three months (for a total of £5,100) but can vary depending on the size of the institution and the scope of the project. Please contact us for more information.

Onboarding for WISEflow Originality is charged at £3,000 plus £875 for every 500,000 legacy institutional assignments to be uploaded into the system.
