

G-Cloud Lot 3: Cloud Support

Service Definition – Tekwurx Automated Discovery Solution Migration Service

Introduction

Tekwurx is a leader in IT Asset, Service, and Operations Management solutions, dedicated to empowering IT leaders with cutting-edge tools and expertise. Specialising in IT Asset Management (ITAM), IT Service Management (ITSM), and Operations Management, we help organisations maximise their return on investment (ROI) and ensure compliance with industry standards.

With a proven track record, Tekwurx delivers innovative solutions such as:

- **Complex migrations**, such as transitions from ServiceNow ITSM to EasyVista Service Manager and BMC to ServiceNow Discovery.
- **Critical integrations**, like bridging BMC Discovery with ServiceNow CMDB for seamless data flow.
- **Automated application modelling**, enabling rapid and efficient management of large-scale IT environments—such as modelling 633 micro-service applications in just five days using Tekwurx uControl automation.
- **Market-leading solutions** from EasyVista, BMC Helix and Lansweeper to a wide range of public and private organisations.

Tekwurx offers security-cleared (SC) resources, combined with industry-best practices from all major segments, including financial services, telecommunications, and retail.

Service Overview – Tekwurx Automated Discovery Solution Migration Service

The Automated Discovery Solution Migration Service supports organisations migrating between discovery platforms by providing a controlled, data-driven approach to transition discovery coverage with minimal risk and disruption.

The service ingests discovery data from both the existing (source) and target discovery solutions, enabling a **real-time, comparative view of the migration state**. This allows customers to clearly understand what assets, configurations, and dependencies have been successfully discovered in the new solution, and where gaps or discrepancies remain.

By continuously comparing discovery outputs, the service provides transparency, assurance, and measurable progress throughout the migration lifecycle, supporting informed decision-making and reducing the risk of incomplete or inaccurate discovery.

Service Features

- Ingestion of discovered assets from multiple discovery platforms
- Real-time comparison of source and target discovery datasets
- Visibility of discovered, missing, and partially discovered assets
- Identification of coverage gaps and data quality issues
- Support for phased parallel discovery migrations
- Dashboards and reports to monitor discovery completeness and accuracy

- Remediate discovery gaps to increase coverage
- PRINCE2-certified project management ensuring controlled, predictable delivery
- Leverage >20 years of asset discovery experience.
- Security-cleared (SC) resources.

Service Benefits

- Reduce the time and cost to migrate
- Reduced migration risks using our proven process
- Improved visibility of the project status
- Faster ROI from the new tooling
- Reduced risk of incomplete or failed discovery migration
- Improved confidence in discovery data accuracy and completeness
- Faster and more controlled transition between discovery platforms
- Reduced operational disruption during discovery migration
- Improved governance and auditability of the migration process
- Lower overall migration cost through early detection of gaps and issues

About Tekwurx

Tekwurx is a leader in IT Asset, Service, and Operations Management solutions, dedicated to empowering IT leaders with cutting-edge tools and expertise. Specialising in IT Asset Management (ITAM), IT Service Management (ITSM), and Operations Management, we help organisations maximise their return on investment (ROI) and ensure compliance with industry standards.

Tekwurx covers all major vertical markets, including public sector, banking and financial services, telecommunications, retail, and business services.

Tekwurx uControl provides IT leaders with visibility, accuracy, and control across complex, hybrid, and cloud environments by combining automated service mapping with automated data reconciliation. uControl builds confidence in the completeness and correctness of your CMDB, enabling you to reduce the time and complexity of working with your asset data, data sources, and automated discovery tools to create a complete and correct service-based view of your IT landscape.

Our Services

Tekwurx offers the following services to our customers:

- Implementation, architecture design, upgrade, and technical services for all partner cloud/SaaS products.
- Project Management using PRINCE 2 certified resources.
- Managed cloud-based IT Service Management service.
- Cloud migration readiness service

- Cloud BAU support service

Our Partners

EasyVista (www.easyvista.com) helps organisations harness the power of AI and data to transform IT into a strategic advantage. Their unified ITSM platform integrates service management, monitoring, automation, and remote support, empowering IT teams to simplify complexity, enhance security, and drive innovation.

BMC Helix (www.helixops.ai) boasts decades of leadership in IT service and operations management. Through relentless R&D, organic growth, and strategic acquisitions, we deliver forward-looking solutions that maximise IT.

Tekwurx specialise in:

- BMC Helix Discovery
- BMC Atrium CMDB
- BMC Discovery Synchronisation for ServiceNow CMDB

Lansweeper (Lansweeper.com) is an IT Asset Management platform that helps businesses better understand, manage, and protect their IT devices and networks. Lansweeper helps customers minimise risks and optimise their IT assets by providing actionable insights into their technology, offering trustworthy, valuable, and accurate information on the state of users, devices, and software.

Tekwurx is a **ServiceNow** (servicenow.com) development partner, specialising in:

- ServiceNow Discovery
- Asset management
- CMDB integration
