IMPLEMENTATION AND ANNUAL LICENSE PRICING

Onboarding: Pricing is based on a fixed implementation fee covering deployment, configuration, training, and IG activities. **£10,000 - £25,000** depending on local pathway complexity.

ANNUAL LICENSE (PER-PATIENT PRICING)

The service is licensed on a per-patient basis, based on the number of patients actively monitored during the contract period.

Pricing is tiered, with lower per-patient costs available for larger populations.

Billing is typically quarterly in arrears based on active patient numbers.

Patients are counted once per contract year, regardless of discharge or re-referral.

Active annual patients	Price per patient per year
1 - 250	£45
251 – 1,000	£35
1,001 – 5,000	£25
5,001 - 10,000	£18
10,001+	£12

The applicable unit price is determined by the total number of active patients supported within the contract year and applies to all patients for that year.

INVOICING AND RECONCILIATION

An estimated annual licence value will be agreed at contract commencement based on anticipated patient volumes.

The estimated annual value will be invoiced quarterly in advance, with each invoice representing one quarter of the estimated annual charge.

Actual patient numbers will be confirmed at the end of the contract year and the total annual charge reconciled accordingly. Any over- or under-payment will be adjusted through a credit or balancing invoice.

No additional in-year charges will be applied outside the agreed quarterly invoices unless expressly agreed in writing.

ADDITIONAL CUSTOMISATION

Minor configuration and standard setup activities are included.

Additional configuration or change requests outside the standard service scope may be provided subject to agreement and charged at £800 per day*

** Based on remote work. Travel to sites can be arranged on an ad hoc basis with travel and subsistence expenses reimbursed.*

NOTES

All prices are ex VAT. VAT will be applied at invoicing stage
